

Happy coincidence

The multitude of demons gathered in the spacious room, upon learning of the existence of a traitor, began to boo uncontrollably. As explained by the philosopher, one of the most faithful followers of THE CONSORTIUM has betrayed them. These words were like a cold-water bath, which shook the evilest of all of them and all those attending the meeting. The leader of the High Council raggedly demanded:

“Who is the traitor?”

The philosopher in a tone full of intrigue said:

“Is not a person...”

This revelation aroused curiosity and immediately the silence was felt. The philosopher said:

“It's a discipline...”

Confused by the words of the philosopher, attorney Odeim, demanded to explain what he was trying to say. The philosopher, with hatred in his tone of voice, said:

“Science has betrayed us.”

A change of direction occurred, in the spacious room, when the philosopher revealed the horrible secret. Panic looks on the faces of demons, confirm the crisis represented by the fact that science stopped supporting THE CONSORTIUM. It is uncomfortable and annoying to know that, because of this traitor, many atheists are deserting. The philosopher, in his frustration, crunched his teeth and said:

“In the past, "Science" was an unconditional ally of THE CONSORTIUM.”

All the members of the High Council moved their hoods in the affirmative.

"Today everything is changing!" the philosopher emphasized.

Attorney Odeim asked:

"What is changing?"

"The concept of time and coincidence.

In the past, time and coincidence supported science in its attempt to discredit God. According to science, millions of years mixed with coincidence are responsible for the perfection found in creation. Today, the evidence that science is accumulating causes serious discomfort among demons. Instead of rejecting the existence of God, is confirm.

"What evidence do you have to validate your comment?" asked the attorney.

The philosopher opened the folder of his report and said:

"In this chapter... I talk about the two theories... that are deflating."

There are many theories, based on human wisdom, that are full of air. They look great and impressive, but because they have no substance, when confronted with the truth they deflate. The two theories, written in the report, are, the theory of the Great Explosion and the Evolution. In an annoying tone, the philosopher emphasized:

"Science" has turned its back on us."

The body language, of the philosopher, reveals disgust. Trying to maintain his composure, he said:

"The time and coincidence factor has begun to be questioned."

As evidence to support his daring commentary, he presented the theories of the Great Explosion and the Evolution. These prestigious theories have been holy ground for atheists. Every time a scientist declares himself in favor of these theories, the God of Creation is ridiculed. To attack them is to endanger the well-being of THE CONSORTIUM. The philosopher, holding his report in his hand said:

“A new theory has emerged in the panorama that harms us.”

The mood inside the room began to boil. It bothers and annoys to think that "science" has ceased to be an unconditional ally of THE CONSORTIUM. In the past, "time and coincidence" favored the theory of the Great Explosion and the Evolution. Today, "science" has begun to discard "coincidence" by giving way to the new theory.

"What is the name of that new theory?" the attorney asked outraged.

“Is known as the "Happy Coincidences".”

The DC division, with its smokeballs, has confused many, but if humans insist on seeking God... they will find Him. The world is full of evidence, which reveals the existence of God. According to the theory of intelligent design, the Power of God is responsible for everything that is seen and what is not seen. The GREAT BOOK summarizes it:

"God, in the beginning, created the heavens and the earth" (Genesis 1:1).

It is uncomfortable in THE CONSORTIUM that more and more scientists are accepting this creepy theory. The thought that life and the universe are the product of these "Happy Coincidences" is a cause for panic in the realm of Darkness.

The philosopher's report describes four "Happy Coincidences" related to planet Earth:

1. The position of planet Earth in our Galaxy (Milky Way).
2. The orbit of the planet.
3. The magnetic field.
4. The ingenious system that replenishes the air.

Everything related to the "happy coincidences" is an uncomfortable "pain in the neck" for the members of THE CONSORTIUM. It bothers and annoys!

The report prepared by the philosopher explains in detail the danger

of these "Happy Coincidence".

First "Happy Coincidence": The position of planet Earth in the Milky Way. Before 2018, humans calculated that the diameter of our galaxy was 100,000 light years away, or an average of one and a half trillion kilometers. From that date on, the calculations varied and now is talked of a diameter of 200,000 light years away. It is estimated that they contain between 200,000 and 400 billion stars. Impressive!

The universe is full of galaxies. The Milky Way is a drop of water in the middle of an immense ocean. A simple galaxy between billions and billions of them. The harmony and balance of the universe confirms the existence of an "intelligent design".

The location of the planet is a zone free of gases and cosmic dust. This "happy coincidence" has allowed humans to know and study the greatness of the universe. If they had been in an area full of gases and cosmic dust, the telescopes would be ineffective.

Second "Happy Coincidence": The orbit of planet Earth. Considering its inclination, its rotation speed, its translation and the effects of its unique Moon, coincidence loses ground.

The most complicated thing has to do with the location of planet Earth in the solar system. If the planet becomes one inch closer to the Sun, or further away, the existence of life on the planet would be impossible.

To think that coincidence is responsible for so many "happy coincidences" is an attack on reasoning and murders common sense.

Third "Happy Coincidence": Magnetic field. This powerful invisible shield of energy protects humans from excess solar radiation and is responsible for phenomena as beautiful as the Northern Lights. The magnetic field also helps in human navigation and animal migrations, in ways that scientists are beginning to understand.

The Magnetic field is a giant dynamo, which generates mechanical energy and converts it into electrical energy. To think that something

so huge and complex is the product of coincidence is a monument to stubbornness and foolishness.

Fourth "Happy Coincidence: The ingenious system that replenishes the air. Without air, humans and fauna cannot exist. Humans inhale oxygen and exhale carbon dioxide. This gas is deadly for humans. There is a "happy coincidence," which prevents billions of people from contaminating the world and is called "photosynthesis."

The whole process related to "photosynthesis" is a serious challenge for the theory of coincidence. It is a wonderful and ingenious recycling process, through which plants are responsible for purifying the air.

Plants, in addition to feeding humans and all fauna, are an ingenious and wonderful system for recovering lost oxygen. This incredible "intelligent design" ridicules coincidence!

Fortunately, the information in the report is confidential, and none of the demons in the room learned about the deadly implications of the "Happy Coincidences."

Screams and squeals increased in the Room of the Hidden Secrets. The philosopher Lose Todo stopped the presentation of his report. Before continuing, he took a deep breath, because he knows that what he is about to say, in addition to being humiliating, is offensive. Anticipating an increase in boos, he said quietly:

"The most distressing thing is what is happening with the atheists."

"What's going on with atheists?" the attorney asked.

"They are deserting!" the philosopher shouted because of his frustration.

The increase the number of people, with master's degrees and doctorates, who reject the "theory of evolution" and the "big explosion" is alarming. The offensive thing, for these demons, is that atheists are rejecting these two theories. This astonishing reality is a cause for serious concern in THE CONSORTIUM. Uncomfortable

Chapter 14: Happy coincidence.

and annoying Nose Nada said:

“It's all the fault... of the three ORIGINS.”
