ABOUT THESE ASSESSMENTS

These breeder-developed temperament and aptitude profiles combine evaluations at approximately eight weeks old with our daily observations of each puppy throughout development. Testing includes social interaction, handling, play, problem-solving, obstacles, and responses to new sights and sounds.

Temperament testing is a snapshot of emerging tendencies—not a prediction of who a puppy will become. Puppies continue to develop through experience, training and lifestyle. We use these observations to help identify the puppy whose natural tendencies may best complement each family.

Ollivander “Ollie”

Joyful • Adventurous • Curious • Playful • Affectionate

AT A GLANCE

Social Style:	Affectionate + Joyfully Social
Activity Style:	Highly Playful + Adventurous
Learning Style:	Curious + Independently Motivated
Handling:	Comfortable + Increasingly Confident
Novelty:	Explore → Play → Discover

OVERALL PERSONALITY

Ollie may be tiny, but he has developed an **enormous enthusiasm for life**. He is playful, adventurous and intensely curious, with an increasingly confident approach to exploring his world.

One of the most remarkable things about Ollie has been watching his confidence blossom. He began as one of the smallest and more reserved puppies in the litter and has grown into one of our most enthusiastic little explorers. Once comfortable in a situation, Ollie seems genuinely delighted simply to play, investigate and participate in life. His confidence often expresses itself through **movement, play and discovery rather than indiscriminate boldness**.

Ollie is also an affectionate, socially connected puppy. He seeks his people during play, enjoys physical closeness and frequently returns for connection before heading off to explore again.

HIS EMERGING PERSONALITY

Joyful Self-Possession

Ollie's confidence has a particularly happy quality to it. He frequently moves through familiar environments with **buoyant enthusiasm**, initiating play and investigating whatever catches his attention.

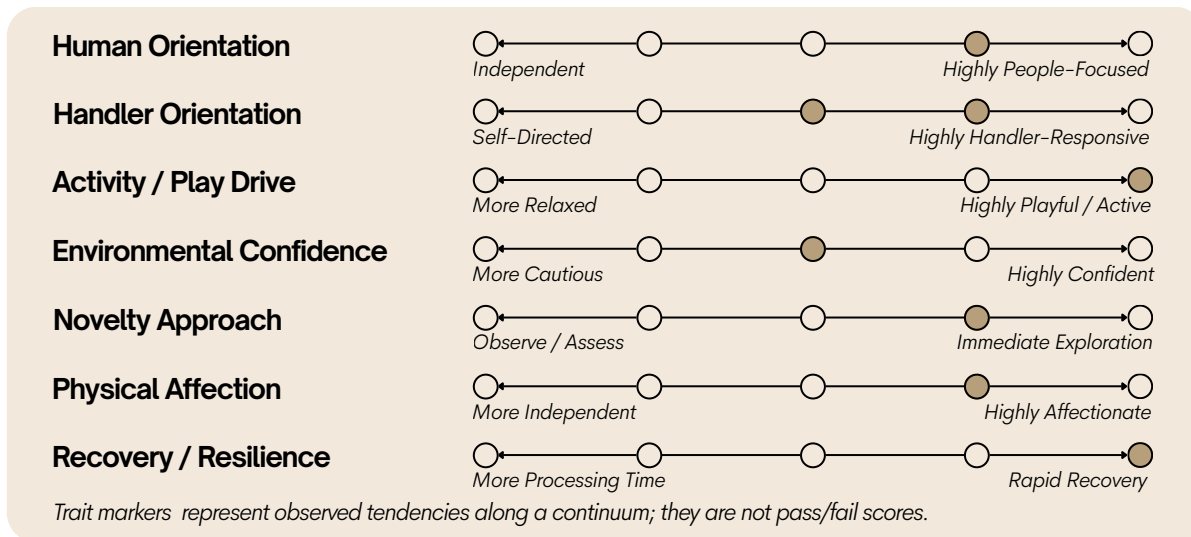

His emerging outlook often seems to be: **“Life is great! Let's see what's over there.”**

Olliwander "Ollie" | Temperament & Aptitude Profile

WHAT WE SAW DURING TEMPERAMENT TESTING

- Very strong curiosity and exploratory motivation
- High play and toy engagement
- Affectionate and strongly connected to people
- Good engagement with obstacles and new experiences
- Comfortable with ordinary touch and handling
- Initial uncertainty in a completely unfamiliar environment, followed by voluntary social engagement
- **Excellent recovery, learning and increased confidence with successful repetition**

TEMPERAMENT TRAIT SNAPSHOT

HE MAY BE ESPECIALLY WELL-SUITED FOR

- An engaged, affectionate family wanting a playful companion
- A family wanting a little adventure buddy for outings, play, exploration and enrichment
- Owners who appreciate an expressive, joyful personality
- A home that will continue encouraging his developing confidence

POTENTIAL APTITUDES

Ollie shows promising early traits for therapy or assistance-oriented work, including **strong human connection, responsiveness, resilience** and a **joyful social presence** that may be an asset in people-centered work.

His future potential will depend on continued development of environmental confidence, handler focus and regulation around exciting distractions.

As with all puppies, these are early aptitude observations—not a prediction or guarantee of future therapy, service or working suitability.

THINGS TO KNOW

Ollie showed some initial uncertainty with elevated/outward handling and in a completely unfamiliar environment. His confidence increased substantially with successful repetition, reflecting a **puppy who learns quickly from positive experiences.**

Continued positive exposure to new environments and varied handling should support his developing confidence; **his resilience and growth throughout development have been especially notable.**
