

ELDERS ENERGY, LLC.

COMPANY PROFILE

Elders Energy, LLC has the experience and resources to bring turnkey solutions, including financing, to critical needs in developing countries. We have over thirty years of experience in the industry that includes major multi national organizations with networks covering the globe.

We support you during the construction or renovation of your power facilities and energy projects including Oil & Gas assets.

Whether a barge mounted power plant or lignite coal production meets your needs, we are your solution.

The need for power plants exists in all countries, either to add production capacity or to renovate existing ones. In both cases, it is likely that Elders Energy has a branch affiliate nearby to supply your project with electrical products, leveraging our sourcing expertise, inventory management and resources next to your local project team. If there is no local pre-existing Elders Energy affiliate presence, we create it, deploying warehousing and material management capability next to / on your project site in order to optimize logistic flows while generating measurable savings.

There as well, applying all required standards in terms of safety and compliance programs, may it be a nuclear or non-nuclear project.

Financing is critical to all projects. That's why Elders Energy, LLC works with our clients to bring unique and customized financing solutions to each project. These financing solutions may include grants, debt and equity from the global financial markets. If primary financial markets are not available, then we are able to bring secondary market solutions with the associated requirements.

Elders Energy, LLC has a history of several decades of working in high risk environments. This history has helped us to organize secure work environments in emerging and wore torn environments. We work very closely with governmental institutions as well as private organizations to bring about safe work environments that provide security for personnel, equipment and other assets.

Logistics is a major part of Elders Energy, LLC services. Therefore we are partnered with major logistics providers that work closely to provide services in developing and war torn countries. We have provided "fast track" solutions by air and more traditional logistics solutions that meet critical path construction schedules worldwide.

Elders Energy, LLC looks forward to working closely with your group to bring about a uniquely customized turnkey solution.
