## Letter from the Board

# HAPPY 4th of JULY!!

We are so fortunate to live here in the **United States of America**,

In a country that values these fundamental rights:

**Life** to exist in a safe, peaceful, and most of all protected space

**Liberty** to freely express ourselves through thoughts, words and actions

**Pursuit of Happiness** to take responsibility for our own well being and personal fulfillment

We exercise these rights each and every day without usually giving it a second thought.

Let's intentionally focus on this blessing and truly appreciate what we've been given, in every facet of our lives.

Enjoy the holiday and your **Freedom** to chose how to celebrate!

Your MCMGA Board

## Website/Online Payment Notice

We appreciate the flexibility of the online payment system for dues, plant sales, etc., but it comes at a cost. With every transaction, comes a 4.3% service fee. MCMGA is willing to absorb that cost to make payments easier for you and us. However we have had several instances where online payments have been duplicated and another service fee is charged. Effective 5/1/2025, if duplicate payments are made, a refund will be made to you via check less the incurred service fee. Thank you!

### **Go Beyond Beauty for Wildlife, Clean Waters and Beautiful Gardens**

July 17, 2025

6:30 to 8:00 p.m.

Presenter: Brooke Hiller

Friends of the St. Clair River

Class Description: This presentation gives an overview of the Go Beyond Beauty program, highlights the top invasive ornamental plants in Michigan, offers resources for removal and replacement, and advises individuals on how to get involved with the program. Go Beyond Beauty was developed to recognize gardening professionals who have committed to not selling or using high priority invasive ornamental plants, and recognizes individuals, businesses and organizations who also make this pledge. Go Beyond Beauty educates professionals and the public on the importance of using native plants in landscaping projects and offers ideas for native plant alternatives in place of traditional ornamental plants that have found their way into our natural areas and are compromising the health of our ecosystem.
