

Happy Birthday, Hubble!

<https://hubblesite.org/30>

Did you know it's the Hubble Space Telescope's 30th birthday? Hubble was launched into space on April 24, 1990. It is still orbiting Earth, capturing beautiful images of planets, stars, nebulas, and galaxies across the universe.

Help us celebrate Hubble's 30th!

Step 1: Learn more about the Hubble Space Telescope

- Explore [iconic images](#) from Hubble
- Watch [a video](#) showing hundreds of Hubble images
- Read [articles](#) about Hubble discoveries

Step 2: Say Happy Birthday to Hubble with a Space-Inspired Activity

- Print out and hang up your favorite Hubble image
- Draw or paint your own version of a Hubble Image
- Write a story set on another planet or even in another galaxy

Step 3: Share your creation!

- Display your creation in a window for neighbors to enjoy
- Share your creation on social media using the hashtag #Hubble30
- Follow the #Hubble30 hashtag to see and share others' creations

Join us on Friday, April 24th for the grand unveiling of the all-new Hubble 30th Anniversary Image!
