

***Southwest Ohio Rocketry Association
(SORA)
January 21, 2020 Meeting***

Opening:

The meeting was brought to order at 6:45pm at the Lebanon Library Tech Center.

Business:

A new waiver has been signed for the use of Hisey Park for the time frame of 1/1/20 through 12/31/20. A copy of our insurance with the Warren County Parks Board named in document was left. I was given some dates that we are unable to launch on; there is Bird watching, weddings, etc. I let them know that we will not launch if there are scheduled events. We are fortunate to have good relationship with them.

We will soon get a key to a barn on site, so that we can store launch equipment.

We discussed getting a checking account for the club and briefly discussed 501. 3C status, this would open more funding opportunities, but the paperwork looks like a nightmare!

I will update the web site and if anyone has suggestions, let me know or see's mistakes.

We officially recognize SORA as our official acronym. (My bad)

A suggestion of Standard Operating Procedures manual is drafted by the club for all relevant information.

Looking at the idea of having a Jr. Meeting prior to our regular meeting for education and hands on activity for younger group. In the past I've watched the kids eyes glaze over when we start talking about newton-seconds, CG, CP, etc.

Our TARC team is doing well and they are working hard on the project.

Presentation:

Thank You to Rick for presenting on Reloadable Motor Systems (RMS). The presentation was excellent. We were able to watch Jon put together his first RMS motor. I'll post some pictures on the web site.

Meeting adjournment: 8:20 pm

Club Launch:

January 26th, 12:00-400 Pm

Hisey Park, Waynesville, Oh

Come see if the RMS motor works?
