2024 Pricing Guide

Katie Perkins - (270)543-0935 - Katiesflowerfarm.com - facebook.com/katiesflowerfarm

Local Flowers

Flowers are started by seed at the farm and grown using organic farming methods. Products are limited to what can be grown in climate zone 6b.

- Products not included in this list (ranunculus, tulips, anemones, etc.) may be requested for future growing seasons. I would love to work with local florists to provide as many local alternatives as possible.
- Availability is first come first serve. Pre-Orders are the best way to ensure availability as several varieties require multiple successions throughout the growing season.
- Products are harvested and conditioned within 24 hours of delivery.

Products	Unit	Varieties	Cost

Dried Florals

Dried flowers are available starting July. Pre-Orders are the best way to ensure availability as drying takes 3-4 weeks with many florals.

- Expect a small amount of natural shedding.
- Can be affected by moisture, humidity, high heat and direct sunlight.
- Recommended for indoor use. May be used outdoors for weddings and events.
- Variations are to be expected and embraced with natural products.
- Handle with care. Shedding and breakage is natural, will occur and should be expected with this product type.

Products	Unit	Varieties	Cost
Dried Florals			
Amaranthus	8-10 Stems	Red Spike, Hot Biscuit, Love Lies Bleeding	\$10

Lookbook

Most varieties are tried and true to our farm; however, we are constantly looking and trying new varieties. If there are any flowers you do not see below please reach out about possibly growing later in the current season or reserving for next year.

- Images directly below are from our past growing season at Katie's Flower Farm.
- Stock images included are directly from our seed suppliers (Johnnys, Floret, Gardeners Workshop).
- Availability is first come first serve. Pre-Orders are the best way to ensure availability.
