

X

- Full Digital inflation unit
- Capable of inflating an 11' board to 18 psi in just over 4 minutes
- Available as a free vend station or with contactless card payment option
- Ideal solution for retailers and schools at location of action
- Simple to use and maintain

# SUP INFLATION STATION

**The UK's first air tower for inflating paddleboards designed for public use**

We have teamed up with PCL – the World Leader in inflation devices – to launch an easy-to-use solution for paddle board inflation at launch locations. Just connect a board and let the Inflation station do the rest. Clear user info allows for safe use.

Available as a free vend station, or with contactless card payment facilities for revenue generation. An easy to install, weatherproof solution ensures paddlers are using boards pumped to the correct pressure.

DRIVEN BY AIR.

Heavy duty SUP valve connector

Easy to use with self-explanatory instructions

Large easy to read digital backlit screen
