Market overview

The rise in theft and vandalism, and the increasing difficulty of finding security guards, have prompted many car dealership owners to actively seek out managed security solutions.

Constantly evolving technologies help video surveillance operators to do their jobs more efficiently.

Canada

From 2021 to 2023, auto theft rates surged in Canada, with Ontario seeing a 48.2% increase, Québec 57.9%, Atlantic Canada 34%, and Western Canada 5.5%. Across the country, a vehicle is stolen every 5 minutes, significantly affecting car dealerships. Additionally, catalytic converter thefts in Canada skyrocketed by 1700% between 2018 and 2022.

USA

In the United States, over a million vehicles were stolen in 2022, amounting to \$8 billion in assets. FBI data shows nearly 12,000 motor vehicle thefts at USA dealerships in 2022, with a vehicle stolen every 31 seconds across the country. The nation experienced a 25% rise in thefts from 2019 to 2022.

Voice interventions

Loud & clear.
Vocal power that deter.

Event portal

Welcome to your
knowledge hub.
Empowering stats.
Viewing power.

Sirix mobile app

Arm & disarm your site.
Access live & recorded footage.
Whenever. From wherever.

IncidentCode

"Veni, vidi, vici."
Visual, actionable real-time
incident report.

Alarm video verification

From verifying alarms to catching
intrusions early, we'll protect
inside your car dealership.

Remote video monitoring

Unwanted activity detected.
Threat neutralized.
Security assured.

AktivSense

Seeing clearly. Continuously.
With Sirix's security camera
health monitoring AI.

Secure horizons.

Thwart threat with powerful voice interventions.

We detect. We protect. Period.

Threat detected

When an intrusion or threat is detected at the car dealership, a video alarm is instantly triggered at the operator's station.

Footage analysis

The operator examines the video footage to confirm the situation.

Voice intervention

The operator performs a voice intervention, the best tactic to keep intruders away.

Operation success

The intruder leaves the secured site.

Event recorded

A report is automatically generated and saved in the client's account in Sirix's portal.

Ultimate deterrence

As the news spread, intruders decide to go elsewhere to commit theft.

Security procedure alternatives

If the intruder does not leave the premises, the security operator will follow the SOP, which may include calling the emergency contact or dispatching police or security guards.

Insight in sight.

Sirix provides tools for actionable data into each site's security performance.

Sirix's operator performance statistics for each site

Site-specific alarm numbers and outcome reports

Safekeeping simplified.

Arm and disarm with a touch from anywhere, with Sirix's mobile app.

Site name

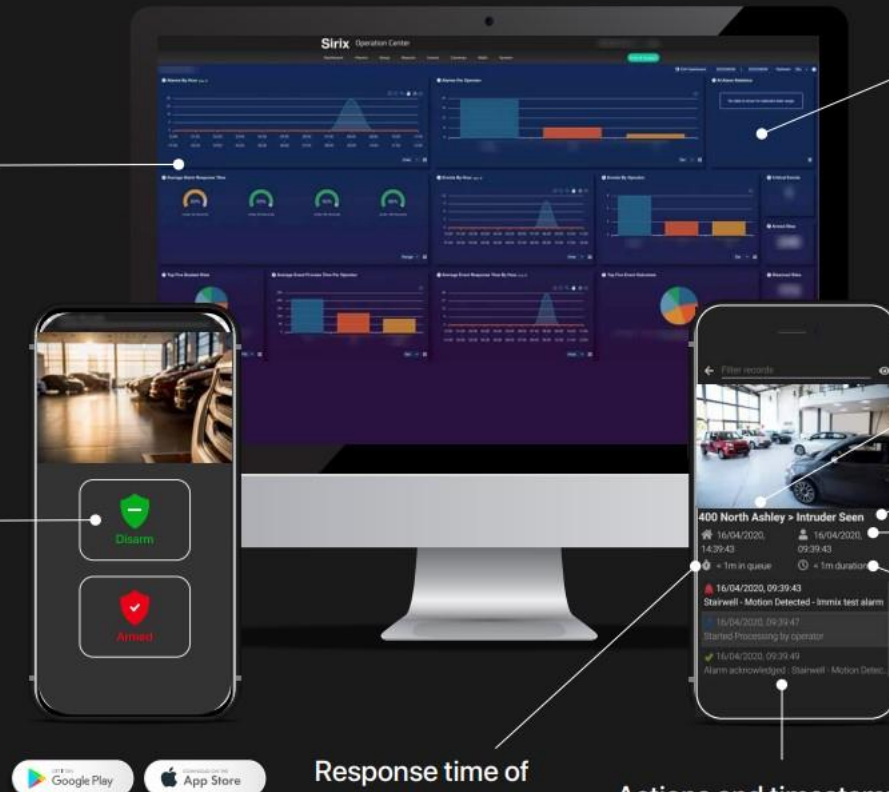

Cause of the alarm

Date and time the event was detected

Duration for Sirix's operators to address the alarm and implement the standard operating procedure (SOP)

Response time of Sirix's operators to the alarm

Actions and timestamps of Sirix's operators in responding to the alarm

Swiftly showing. Always knowing.

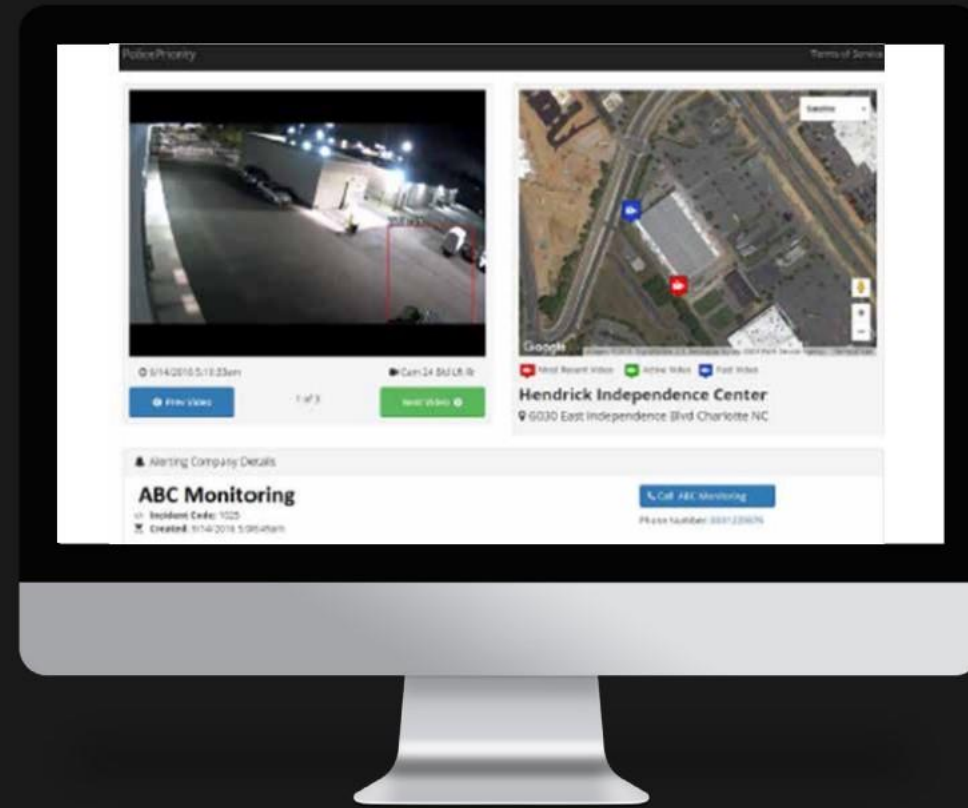

Real-time access, visibility, and control of every security incident on the site.

Incident visualization. Each incident report includes relevant images, offering a comprehensive visual understanding of the incident for review & analysis.

Instant stakeholder alert. When an incident report is initiated, site owners and security integrators receive SMS or email alerts. Alerts include a link for real-time updates, allowing stakeholders to follow the incident as it unfolds.

Cancel dispatch feature. Our advanced interactive reports have "Cancel Dispatch" buttons. This crucial tool allows stakeholders to stop security teams or police deployment if they deem it unnecessary, giving them more control over the incident response.

Automatic authority notification. Our system automatically sends the advanced report's link to police or security teams if an incident requires authority intervention. This ensures fast, effective communication in emergencies.

The text or email link opens a real-time report with video and images of the incident.

AktivSense.

Our AI software instantly notifies you of any problems with the security camera evidence you expect to have.

Cloud-based, hardware-free solution.

Proactive protection.

Get alerts at the first sign of anomalies in the security camera systems.

AI image integrity

We identify camera view problems.

Connection issues

We detect when the connection to the NVR or VMS is down.

Camera failures

We monitor and alert if a camera disconnects for a predefined duration.

Hard disc failures

We identify hard disc read/write problems.

Recording issues

We alert if the recording duration is below expected.

Time & date inaccuracy

We notify when the time is incorrect or tampered.

Camera view issue alerts.

The power of AI. Take a look at what it can do.

The Sirix command center difference. Even more reasons to choose us.

Scalable solutions.
Easily adjust to your dealership's growing security needs.

Expert remote operators. Skilled professionals monitoring every site and responding to alarms around the clock.

24/7 surveillance.
Continuous protection to ensure peace of mind, day and night.

Advanced AI solutions.
Cutting-edge technology for precise threat detection.

Cost efficiency. More affordable than employing on-site guards, without compromising quality.

AI-powered solutions

Collaboration fuels daily creativity. Together, we
overcome major challenges.
