

# Executive Diploma in Medical Documentation & Healthcare Documentation Sciences

Industry-Oriented Professional Diploma Program  
with Online Industrial & Hospital Internship

## Program Details

| Particulars                  | Details                                                                        |
|------------------------------|--------------------------------------------------------------------------------|
| Course Name                  | Executive Diploma in Medical Documentation & Healthcare Documentation Sciences |
| Total Duration               | 7 Months                                                                       |
| Theory Training              | 4 Months                                                                       |
| Online Industrial Internship | 3 Months                                                                       |
| Class Schedule               | Every Sunday                                                                   |
| Mode                         | 100% Live Online                                                               |
| Course Start Date            | September 20, 2026                                                             |
| Last Date to Register        | September 20, 2026                                                             |
| Total Fee                    | ₹6,999/- <del>₹30,000/-</del> (two instalment available)                       |
| Certifications               | Diploma + Internship Certificate                                               |

# Section 1: Understand the Domain

## What is a Medical Documentation Specialist?

A Medical Documentation Specialist is a trained healthcare professional responsible for preparing, organizing, reviewing, managing, and maintaining accurate healthcare and clinical documentation used across hospitals, pharmaceutical industries, clinical research organizations, healthcare technology companies, insurance sectors, and digital healthcare systems.

Medical documentation professionals play a crucial role in ensuring accuracy, legal compliance, patient safety, healthcare communication, and smooth clinical workflow management.

With rapid digitalization in healthcare and increasing adoption of Electronic Health Records (EHR), AI-assisted documentation systems, telemedicine, and healthcare analytics, the demand for trained medical documentation specialists is increasing globally.

## Key Responsibilities of Medical Documentation Specialists

- *Preparing and maintaining medical records*
- *Clinical documentation and patient case documentation*
- *Medical scribing and physician support*
- *Electronic Medical Record (EMR/EHR) documentation*
- *Preparing discharge summaries and clinical notes*
- *Documentation for clinical trials and research projects*
- *Pharmacovigilance and drug safety documentation*
- *Medical writing and healthcare communication*
- *Reviewing documentation accuracy and compliance*
- *Insurance and billing documentation support*
- *Quality and accreditation documentation*
- *AI-assisted healthcare documentation workflows*
- *Maintaining confidentiality and healthcare compliance standards*

# Major Domains Under Medical Documentation

**The field of medical documentation includes multiple high-demand healthcare sectors:**

## Clinical Documentation

*Patient records, SOAP notes, progress notes, discharge summaries, and clinical workflows.*

## Medical Scribing

*Real-time physician documentation support in hospitals and telemedicine.*

## Medical Transcription

*Conversion of physician audio notes into structured healthcare documents.*

## Clinical Research Documentation

*Trial master files, informed consent documentation, study documentation, and protocol-related records.*

## Pharmacovigilance Documentation

*Adverse event reporting, case narratives, literature documentation, and drug safety workflows.*

## Medical Writing

*Scientific writing, healthcare communication, regulatory writing, & publication support.*

## Hospital Quality Documentation

*NABH/JCI documentation, audit preparation, SOP documentation, and quality systems.*

## Insurance & Claims Documentation

*Medical coding basics, reimbursement support, and insurance workflows.*

## AI-Assisted Healthcare Documentation

*AI-integrated clinical documentation, digital health records, and healthcare automation systems.*

# Skills Required & Developed During This Course

**Participants will develop practical and industry-oriented skills including:**

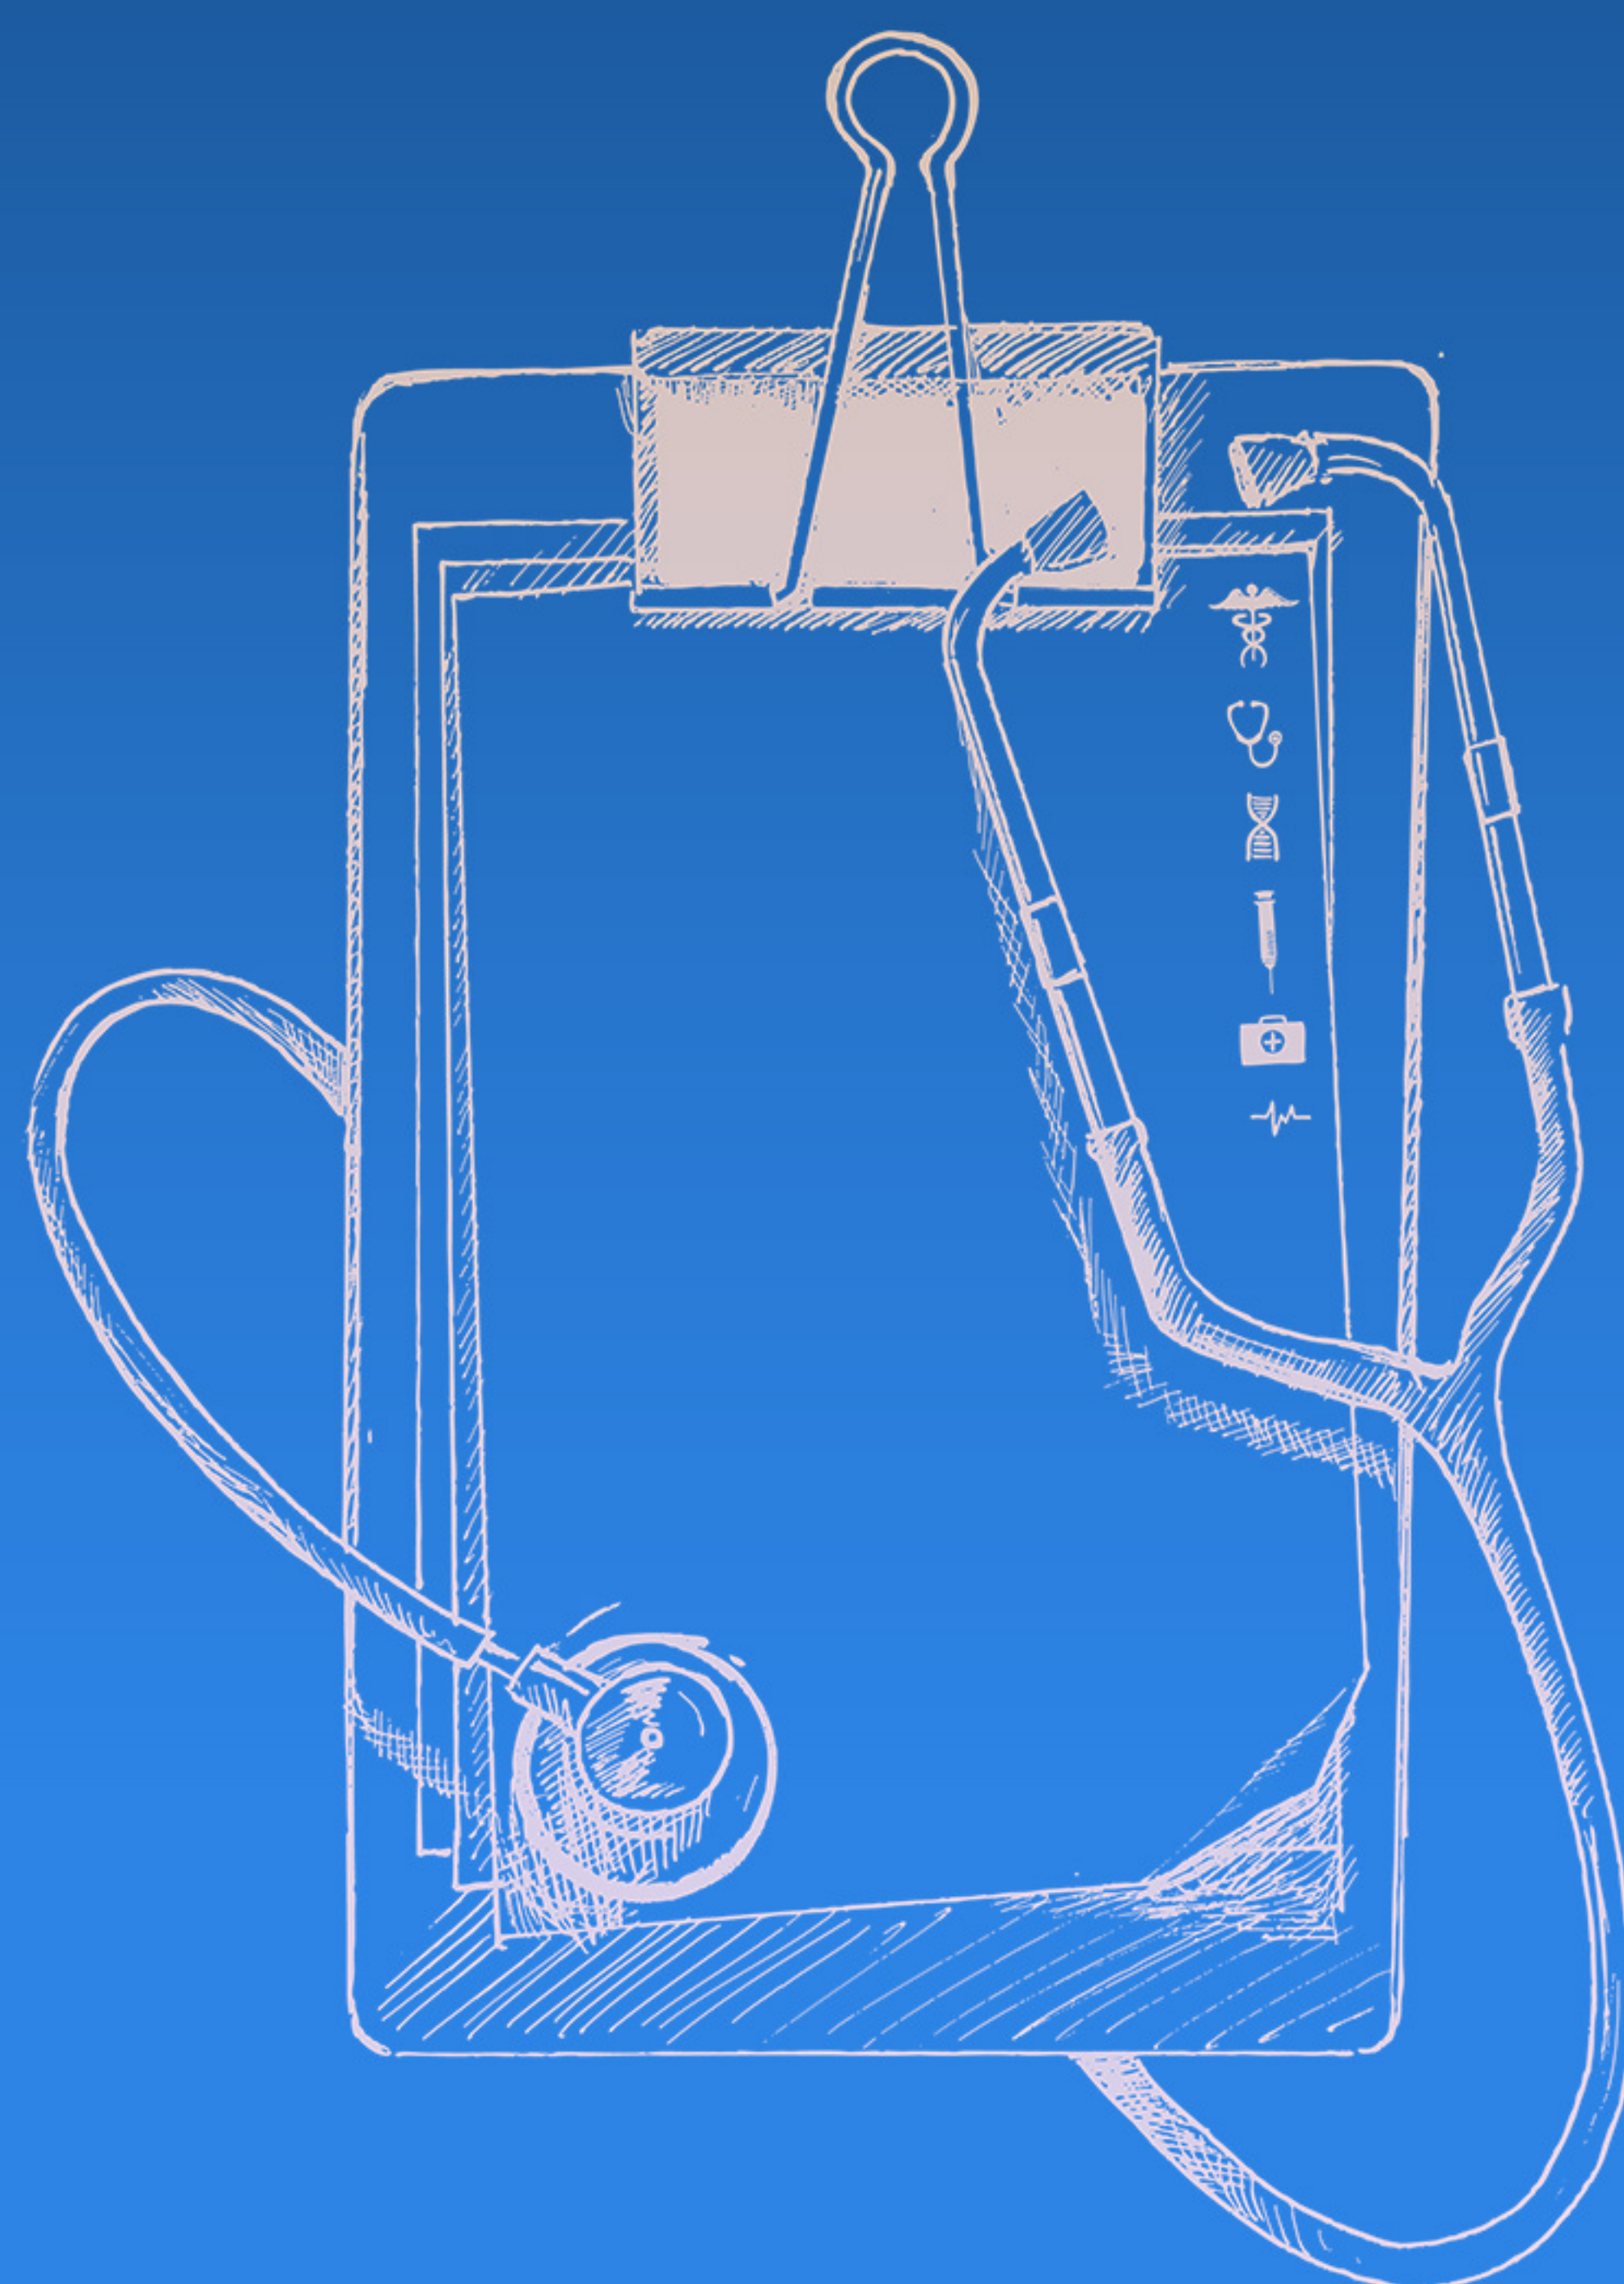

- *Medical terminology understanding*
- *Clinical language and healthcare communication*
- *Documentation writing skills*
- *Medical record interpretation*
- *EMR/EHR documentation handling*
- *Clinical research documentation understanding*
- *Medical scribing techniques*
- *Healthcare compliance awareness*
- *AI-assisted documentation skills*
- *Professional report writing*
- *Data handling and organizational skills*
- *Quality and audit documentation practices*
- *Scientific and medical writing basics*
- *Attention to detail and documentation accuracy*
- *Professional communication and teamwork*

## Common Job Roles

**After completion of the program, participants may work in roles such as:**

- *Medical Documentation Specialist*
- *Clinical Documentation Executive*
- *Medical Scribe*
- *Medical Writer*
- *Clinical Research Documentation Associate*
- *Pharmacovigilance Associate*
- *Medical Records Executive*
- *Healthcare Documentation Analyst*
- *Regulatory Documentation Associate*
- *EMR/EHR Documentation Executive*
- *Clinical Data Documentation Coordinator*
- *Hospital Documentation Officer*

# Work Settings

## Medical Documentation Specialists are employed in:

- *Hospitals & Multispecialty Healthcare Centers*
- *Pharmaceutical Companies*
- *Clinical Research Organizations (CROs)*
- *Medical Writing Companies*
- *HealthTech & AI Healthcare Companies*
- *Insurance & Healthcare Consulting Firms*
- *Telemedicine Platforms*
- *Public Health Organizations*
- *Academic & Research Institutions*
- *Digital Healthcare Startups*

## Career Growth Path

### Entry-Level

- *Documentation Trainee*
- *Junior Medical Scribe*
- *Documentation Executive*

### Mid-Level

- *Senior Documentation Associate*
- *Medical Writer*
- *Clinical Documentation Specialist*
- *Pharmacovigilance Associate*

### Advanced-Level

- *Documentation Team Lead*
- *Quality Documentation Manager*
- *Clinical Documentation Consultant*
- *Regulatory Documentation Manager*

### Leadership Roles

- *Healthcare Documentation Head*
- *Medical Affairs Documentation Lead*
- *Healthcare Compliance Manager*
- *Director – Clinical Documentation Services*

## Average Salary in India

| Experience Level        | Average Salary |
|-------------------------|----------------|
| Fresher                 | ₹2.5 – ₹5 LPA  |
| 1–3 Years Experience    | ₹5 – ₹8 LPA    |
| Mid-Level Professionals | ₹8 – ₹15 LPA   |
| Senior/Managerial Roles | ₹15 – ₹25+ LPA |

*Freelancing & international remote opportunities can further increase earning potential.*

# Future Scope

The future of Medical Documentation Sciences is highly promising due to:

- *Expansion of digital healthcare systems*
- *Increased adoption of AI in healthcare*
- *Growth of telemedicine platforms*
- *Rising clinical research and pharmacovigilance demand*
- *Increased healthcare compliance requirements*
- *Expansion of Electronic Medical Records (EMR/EHR)*
- *Global outsourcing of healthcare documentation*
- *Increasing medico-legal documentation importance*
- *Demand for healthcare data standardization*

This field offers stable, flexible, and rapidly growing non-clinical healthcare career opportunities for healthcare and life science professionals.

## Section 2: The course that makes you ready

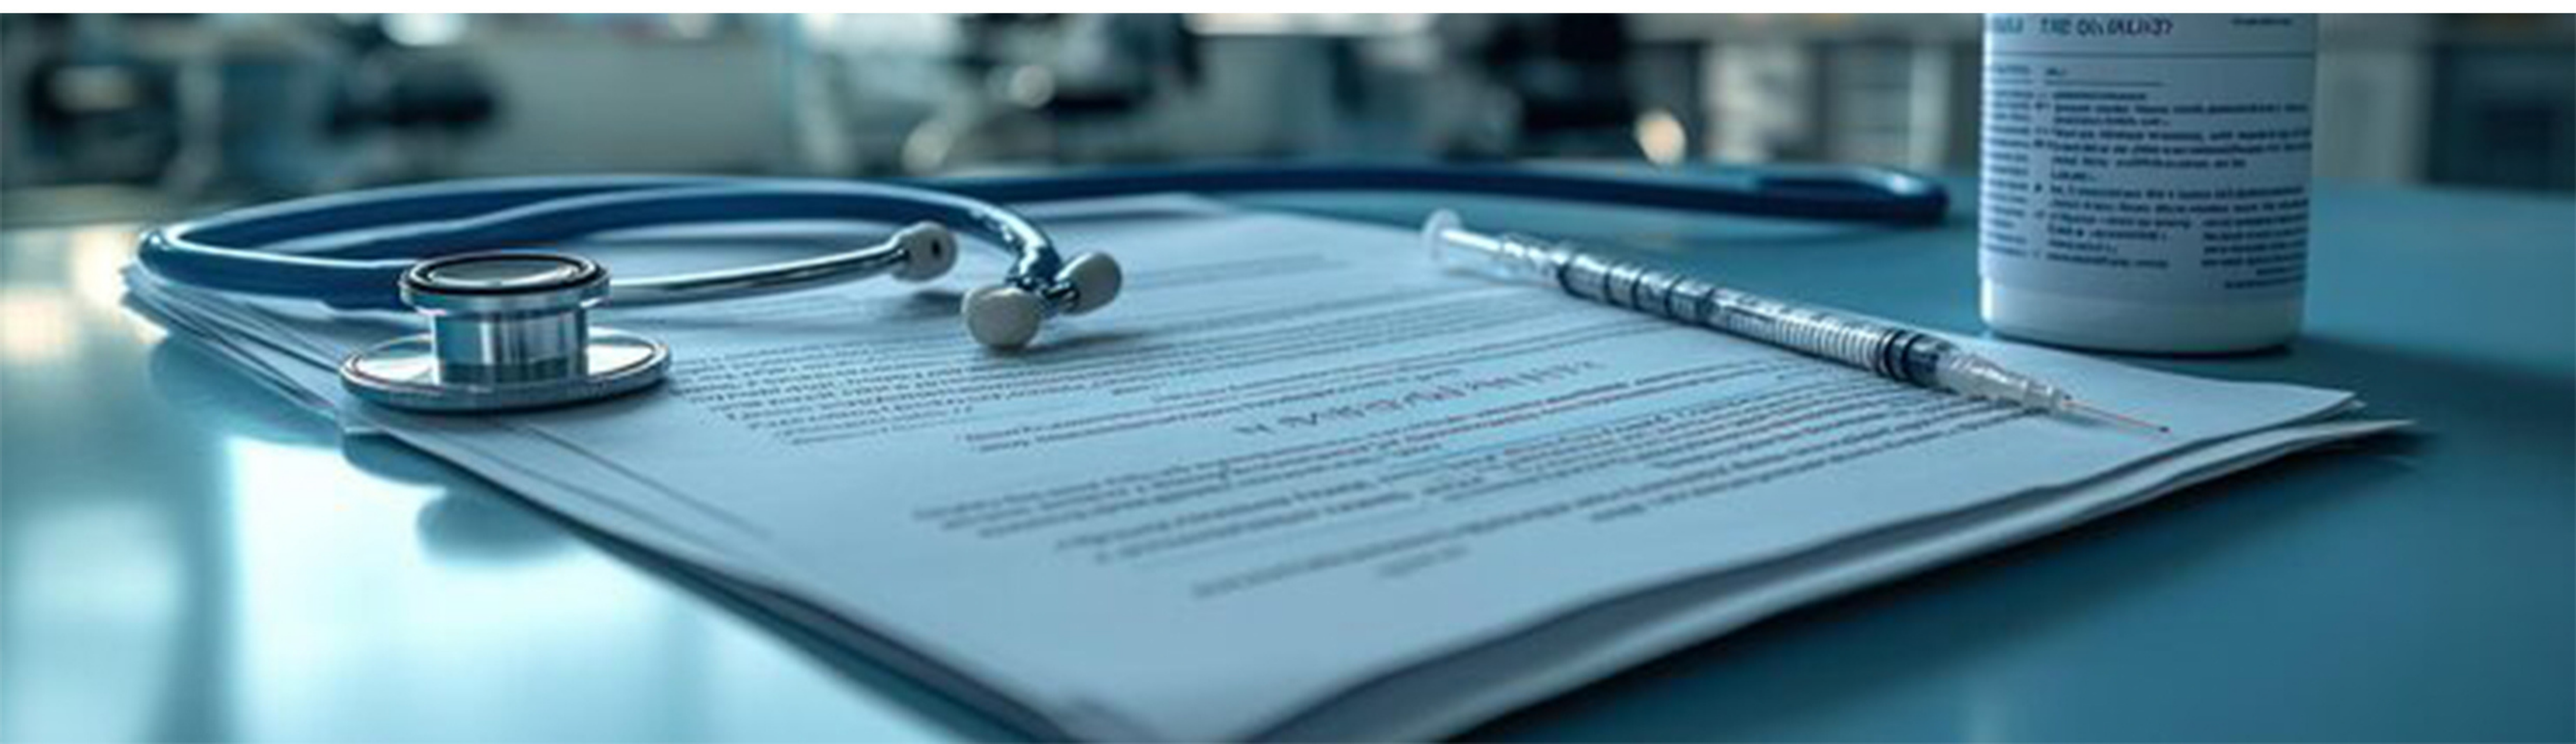

### About the Course

The Executive Diploma in Medical Documentation & Healthcare Documentation Sciences is a 7-month industry-oriented professional diploma designed to prepare participants for real-world careers in healthcare documentation, medical scribing, clinical research documentation, medical writing, healthcare compliance, and AI-enabled healthcare documentation systems.

The course combines:

- *4 Months of structured live theoretical training*
- *3 Months of online practical industrial internship*

Participants will gain practical understanding, documentation skills, healthcare workflow exposure, and industry readiness through live classes, assignments, practical case discussions, and internship-based learning.

# Program Highlights

- ✓ *7-Month Professional Diploma Program*
- ✓ *4 Months Theory + 3 Months Online Industrial Internship*
- ✓ *16 Live Interactive Sunday Modules*
- ✓ *Industry-Oriented Curriculum*
- ✓ *AI in Healthcare Documentation Training*
- ✓ *Real-Time Documentation Exposure*
- ✓ *Practical Assignments & Case Discussions*
- ✓ *Project-Based Internship*
- ✓ *Assignment-Based Practical Learning*
- ✓ *Exposure to Multiple Documentation Domains*
- ✓ *Live Mentorship by Industry Experts*
- ✓ *Career Guidance & Placement Support*
- ✓ *Study Materials & Session Recordings*
- ✓ *Dual Certification (Diploma + Internship)*

## Who Can Attend?

### This course is ideal for:

- *PharmD Students & Graduates*
- *BPharm / MPharm Students*
- *Nursing Students & Professionals*
- *MBBS/BDS/BAMS/BHMS Graduates*
- *Allied Health Sciences Students*
- *Life Science Graduates*
- *Clinical Research Aspirants*
- *Medical Writing Aspirants*
- *Healthcare Professionals seeking non-clinical career opportunities*

## Objectives of the Course

### The course aims to:

- *Develop healthcare documentation expertise*
- *Train participants in clinical and healthcare documentation systems*
- *Build practical medical scribing and documentation skills*
- *Provide understanding of clinical research and pharmacovigilance documentation*
- *Introduce AI-assisted healthcare documentation practices*
- *Enhance healthcare communication and professional writing skills*
- *Prepare participants for healthcare industry roles*
- *Develop industry-ready documentation professionals*

# Syllabus Covered (16 Modules)

## Module 1: Foundations of Medical Documentation

- 1. Introduction to Healthcare Documentation Systems*
- 2. Medical Terminology, Abbreviations & Clinical Language*
- 3. Human Anatomy, Physiology & Disease Understanding for Documentation*
- 4. Hospital Documentation Workflow & Patient Medical Records*

## Module 2: Clinical Documentation & Scribing

- 1. Clinical Documentation Standards & SOAP Notes*
- 2. Medical Scribing Fundamentals & Virtual Scribing*
- 3. Electronic Medical Records (EMR/EHR) Documentation*
- 4. Documentation in General Medicine & Clinical Specialties*

## Module 3: Advanced Documentation Domains

- 1. Clinical Research Documentation & Trial Documentation*
- 2. Pharmacovigilance Documentation & Safety Narratives*
- 3. Medical Writing & Scientific Documentation*
- 4. Medical Coding, Billing & Insurance Documentation Basics*

## Module 4: Industry & AI Applications

- 1. Regulatory Documentation & Healthcare Compliance*
- 2. Quality Assurance, NABH/JCI Documentation & Audit Readiness*
- 3. AI Tools in Medical Documentation & Digital Healthcare*
- 4. Career Preparation, Portfolio Building & Industry Readiness*

## Career Opportunities

Participants may explore careers in:

- *Medical Documentation*
- *Medical Scribing*
- *Clinical Research*
- *Pharmacovigilance*
- *Medical Writing*
- *Regulatory Documentation*
- *Healthcare Quality & Compliance*
- *HealthTech Documentation*
- *AI Healthcare Documentation*
- *Healthcare Data Documentation*

# Section 3: Online Industrial & Hospital Internship

A dedicated 3-Month Online Industrial & Hospital Internship is included as an integral component of the diploma program to provide participants with practical exposure to real-world healthcare documentation workflows and industry oriented learning experiences.

The internship is designed to bridge the gap between theoretical understanding and practical implementation through structured assignments, guided projects, documentation exercises, and supervised learning activities conducted completely in online mode.

## Nature of Internship

|                                                |                                            |
|------------------------------------------------|--------------------------------------------|
| <i>100% Online Internship</i>                  | <i>Project-Based Internship</i>            |
| <i>Assignment-Based Practical Training</i>     | <i>Industry-Oriented Learning Exposure</i> |
| <i>Hands-On Documentation Practice</i>         | <i>Portfolio Development Activities</i>    |
| <i>Guided Mentorship &amp; Review Sessions</i> |                                            |

## Outcomes of the Internship

By the end of the internship, participants will be able to:

- *Prepare professional healthcare documentation*
- *Understand real-world documentation workflows*
- *Apply documentation standards in practical scenarios*
- *Handle documentation with accuracy and compliance*
- *Develop industry-ready documentation skills*
- *Build confidence for healthcare industry roles*
- *Create a professional portfolio showcasing their practical work*

# Assessment & Certification

Participants will be assessed through:

- Attendance
- Assignments
- Documentation Exercises
- Case-Based Activities
- Internship Performance
- Final Assessment/Viva

Successful participants will receive:

- 🎓 Executive Diploma Certificate
- 🌟 Online Industrial Internship Completion Certificate

Registration Link (First Instalment)

## Registration Details:

- 📅 Course Starts: September 20, 2026
- 📅 Last Date to Register: September 20, 2026
- 💰 Full Course Fee: ₹6,999/- ~~₹30,000/-~~

### Instalment Structure

- 1st Instalment: ₹4,000/- at the time of registration
- 2nd Instalment: ₹2,999/- after completion of 3 months of theory training

This introductory fee structure is provided under a limited-period professional skill development initiative to make industry-oriented healthcare documentation training accessible to students and healthcare professionals.

## Program Convener

### Dr. Ajit Singh

Founder & Director  
(Operations & Academic Affairs), IHEPR  
Founder & CEO,  
CliMed & Curio, India

### Dr. V Ashwin Karuppan

Founder & Director  
Tambaram Medical Center &  
Research Institute (TMCRI), Chennai

## Coordinators:

### Dr. Hariharan Sukumaran

Head of Clinical Research,  
Tambaram Medical Center,  
Chennai

### Dr. Neha Suratiya

Director Research,  
CliMed Research Solutions,  
India
