**SOLUTIONS FOR
HASSLE-FREE
MEAT PURCHASING
FROM
AUSTRALIA**

QUALITY MEAT, GLOBAL REACH.

ANYMEAT Pty Ltd | Your Global Meat Trading Partner | Australian Accredited Meat Exporter (NPE) Based in Melbourne

ANYMEAT is dedicated to implementing innovation and technology into global meat trading in order to increase transparency and satisfaction for both the buyer and the seller in meat transactions. A considerable percentage of meat transactions end up in claims, losses, and years of legal procedures, mainly because either the buyer or the seller, or both, do not follow the correct steps. Our team of experts is aiming to enhance your experience in the lucrative world of meat trading.

Tailor-Made Services:

OEM production: Subject to minimum order quantity requirements, ANYMEAT can pack your orders in boxes of your own design and branding.

DDP/DAP Services: For customers who prefer to receive the shipments at their door, ANYMEAT can offer such deliveries with duty paid or unpaid.

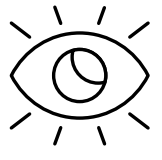

After-Sales Support (Market preparation): Some products, like vacuum-packed chilled meat, cannot enter a market for the first time without proper education and training for the people who handle them. One of our professional team members can be there to train the customers' team members on how to receive and market such products.

Our 3 Levels of Support:

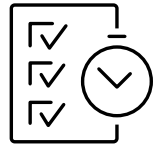

Choose the level of support that best suits your requirements and let us handle the rest!

Basic Support	Full Support (SMB)	Full Support (CORP)
Recommended for: Those who have already been buying meat from Australia.	Recommended for: Professional meat traders and beginners.	Recommended for: Corporations, Supermarket chains and Government agencies.

More about Our Services:

Control on Documentation and Procedures: Every country has certain documentation and legalisation requirements for meat importation that must be adhered to. Missing documents or discrepancies might lead to the stoppage of the shipment at the port or even loss of the shipment in the case of chilled meat. ANYMEAT will make sure it does not happen for you!

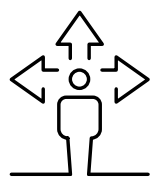

Preparation of Customized Checklist: Having a checklist is the KEY part of any meat order, which is often ignored or missed. Starting a meat order without a checklist can result in errors and undesirable consequences. ANYMEAT has accredited professionals to ensure your meat order has a proper checklist to execute.

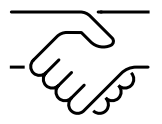

Comprehensive Quality Control as per SPEC agreed: Your shipments undergo rigorous inspection, guaranteeing adherence to your exact specifications for weight, cut, packaging, temperature, and all other agreed-upon criteria. This meticulous process minimizes the risk of rejections and ensures your customers receive exactly what they expect.

Dedicated Account Manager: Benefit from personalized guidance throughout your order fulfilment with a dedicated account manager. This experienced professional acts as your single point of contact, handling inquiries, coordinating logistics, and ensuring a smooth and stress-free experience. We also have a support team member based in your region to cover the time difference with Australia.

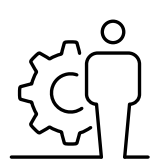

Assistance with Sourcing and Procurement: Finding the right abattoir to process the meat according to your desired specifications is a very sensitive part of the procedure in which ANYMEAT can assist. We leverage our extensive network of trusted Australian meat processors to identify and secure the right product for you, and we will handle all supplier communications and negotiations on your behalf.

Price Negotiating with the Abattoirs to Get the Best Deal: Securing the most favourable prices requires expertise and strong relationships. We use economies of scale, leveraging the volume of our orders to negotiate with abattoirs to secure the best prices for you.

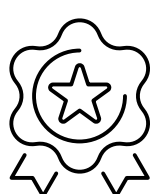

Assistance with Risk Management Strategies: International trade involves inherent risks. We help you identify potential challenges and implement effective mitigation strategies to protect your investment and ensure smooth transactions, from price fluctuations to logistical hurdles.

End-to-End Project Management: Focus on your main business while we manage every aspect of your order, from initial sourcing of livestock to final delivery (either CFR or DDP), ensuring a seamless and efficient process.

Credit Payment Facilities (*Subject to Approval*): Qualified buyers can access flexible payment options, including credit facilities, to streamline transactions and facilitate larger orders than their cash flow allows. This is subject to the approval of the customer's financials by the credit insurer.

Premium Insurance Coverage for Any Losses: Gain peace of mind with comprehensive insurance coverage that protects your investment against unforeseen events. From shipment damage and spoilage to loss in transit, our premium insurance minimizes financial risks associated with international trade.
