

Free the Tataz

Free the Tataz is a nonprofit organization focused on the advancement of women's holistic breast health. Our mission is to support the natural healing and prevention of women's breast cancer and breast implant illness. By educating and empowering the public, medical professionals, and our institutions we begin to build a healthier and happier world.

Goals & Objectives

- Make systematic change and advancements in the prevention, care and treatment of breast cancer and overall breast health by working in conjunction with regulatory bodies and legacy institutions.
- Support research investigating holistic, natural, or alternative treatments and therapies for breast health.
- Generate awareness for better health solutions through wellness events, community building, innovative marketing strategies and corporate, philanthropic and institutional collaboration.

Our Team

Amanda Porta

Los Angeles, California
IG: @theholisticbeautycoach

Holistic beauty coach, Amanda Porta, blends her love of aesthetics and natural health to help her clients achieve optimal results. She has worked in all areas of the beauty industry for 20 years and has trained under some of the best practitioners in the country. Early on, to get the best results for herself and others, Amanda realized the importance of incorporating holistic health into all her treatment plans.

Her love of innovation inspired her to introduce the concept of wellness to the plastic surgery industry in 2012. She created a non-toxic skincare line and strategized

business relationships with wellness and beauty brands for a prominent Beverly Hills plastic surgeon. She is passionate about educating and inspiring people to become their personal best.

Ms. Porta has found a niche as a patient advocate in Beverly Hills for women going thru Breast Implant Illness. Having gone through the illness herself, she has explanted, detoxed, healed, and can guide women through their own explant journeys. She has advised thousands of women around the world from celebrities to athletes to prominent businesswomen that have trusted her expertise to support them through this health crisis. Amanda has received her certification as a wellness coach through Trinity School of Wellness. Amanda has appeared on KIRO TV, KTLA Channel 5 and multiple podcasts including What Say You with Gavin McLeod- Valentine and Be You with Jill Herman.

Barbara Adler

Malibu, California

IG: @missbarbaraadler

Podcast host, retired supermodel, patriot, wife and mother; her passions include raising her son in Southern California, real estate, red-pilling Americans and fighting for freedom. Barbara has committed her life's work to seek knowledge and truth and advocate for keen discernment in all areas of life. Through her social media, podcasts, interviews, and everyday life she shares deep insights on areas of study such as Eastern and Western medicine, nutrition, detoxification, biodynamic agriculture, and philosophy, to wake people up to their highest potential.

Mark Otto

Hauula, Hawaii

Mark is a fintech consultant and blockchain developer. Living in Hawaii, Mark spends his time cultivating and sharing the Aloha spirit while enjoying surfing, hiking and meditating on the island of Oahu. Mark is a life-long advocate for holistic healthcare and incorporating indigenous wisdom into modern society. In the past, Mark has volunteered with and supported local art-based charities, sea turtle rescue initiatives and under-funded Hawaiian language schools.

Thomas Eissler

Salt Lake City, Utah

Thomas grew up in Paraguay and enjoys an adventure-filled “digital nomad” lifestyle. A crypto marketing executive and serial entrepreneur, Thomas strives to push the boundaries of the traditional corporate models bringing legacy systems up to date with the 21st century. Thomas lives in Salt Lake City, Utah where he spends his days exploring the mountains with his German Shepard pup, Vienna. His passion in life is creating and developing impactful, sustainable philanthropic systems that will leave the world a better place for future generations long after we're gone.

What were up against...

Breast Implant Illness

“Breast Implant Illness” is the term frequently used by women whose breast implants have caused a pattern of debilitating symptoms, such as joint pain, “brain fog,” fatigue, and other flu-like symptoms that don’t go away. Many but not all these health issues seem to be related to autoimmune disorders or connective tissue diseases. Breast implant illness is not a medical diagnosis and most plastic surgeons reject the term. However, many women with this pattern of health problems report that they recovered dramatically (sometimes completely) after their breast implants were removed. breastimplantinfo.org by the National Center for Health Research.

Breast Implant Associated-Anaplastic Large Cell Lymphoma (BIA-ALCL)

BIA-ALCL is a rare form of cancer of the immune system. Experts now agree that women with breast implants are more likely to develop ALCL. Since it will develop in the breast area, it is called Breast Implant Associated-ALCL (BIA-ALCL). breastimplantinfo.org by the National Center for Health Research.

Symptoms

Fatigue	Pancreatitis	Difficulty Swallowing
Brain fog, memory loss	Fevers/Night Sweats	Vertigo
Muscle/joint pain	Yeast Infections	Gastrointestinal Issues
Hair loss, Dry Skin and Hair	Skin Rashes	Cold and Discolored Limbs

Hypo/Hyper Adrenal Symptoms	Sore and Aching Joints	Symptoms of Lyme Disease
Hormone Imbalance	Swollen and Tender Lymph Nodes	Symptoms of Lupus
Low Libido	Numbness/Tingling Sensation	Auto Immune Disease
Leaky Gut, IBS and SIBO	Slow Healing, Easy Bruising	

Digital Innovation for a new age: NFTs & Crypto Tokens

As society transitions to a **new digital age** we intend to leverage the power of blockchain technology as a new way to support our philanthropic goals. Learn more about the new ways we are empowering our charity with crypto and NFTs.

Accepting Crypto Donations

By accommodating cryptocurrencies as a method of donation, we expand our ability to connect with donors by allowing them to make cheaper, faster and direct payments to our organization in their currency of choice.

NFT stands for "non-fungible token." At a basic level, an NFT is a digital asset that links ownership to unique physical or digital items, such as works of art, real estate, music, or videos. NFTs can be considered modern-day collectibles. They're bought and sold online and represent a digital proof of ownership of any given item. NFTs are securely recorded on a blockchain — the same technology behind cryptocurrencies — which ensures the asset is one-of-a-kind. The technology can also make it difficult to alter or counterfeit NFTs.

Revolutionizing the nonprofit fundraising model...

As one of our first fundraising campaigns, we created digital collectible trading cards that were minted on the blockchain and sold as NFTs. Through the sale of NFTs we can offer our supporters the opportunity to own a unique, tradable digital collectible and support our charitable endeavors at the same time. Our limited edition collectible trading card series, called the "Starseed Baddies" was created by community artists' as an effort to raise money for our organization.

The Starseed Baddies have joined forces to spark the ascension of mankind and secure the Golden Timeline. With their powers combined they fight to destroy the evil Cabal and dismantle the 3D matrix slave system. The Baddies heeded our call and have come to free humanity and tune the frequency of our world to that of unconditional love, peace and harmony. Join the Starseed Baddies and help the collective usher in a new era of Heaven on Earth!

~~Donate to~~
Invest in
Charity.

In conjunction with a team **XRPL blockchain** developers, we created a crypto token to raise funds and generate awareness for our organization. Our token is a comedic “meme coin” to attract mainstream, pop-culture crypto investors.

Our meme coin, “HUGETITS” is a crypto token similar to Doge Coin or SHIBA whereas the marketing and advertisements are generated by the community by posting and sharing memes about the token. We at Free the Tatz own 33% of all HUGETITS tokens. The more people buy, the more value the token holds; the more value the token holds, the more support we have to accomplish our mission of advancing holistic breast health. **Now, you can have HUGETITS, without the pain and suffering of surgery and toxic implants.**
