Season 3

Season 4

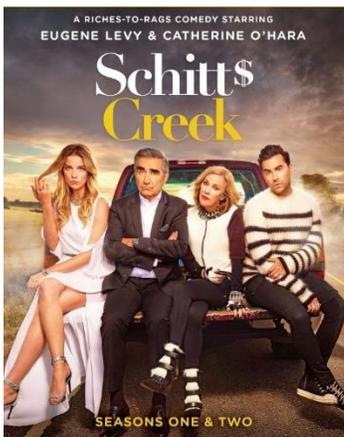

Season 5

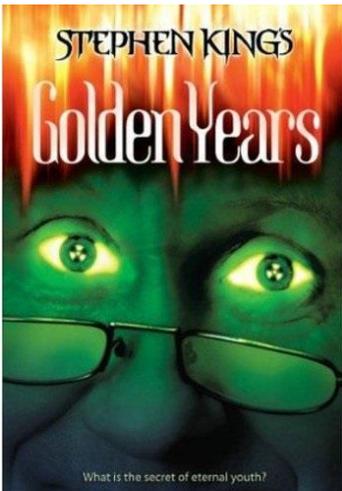

Season 6 & final

The series is based on the Walt Longmire Mysteries series of novels by Craig Johnson. It centers on Walt Longmire, a sheriff in fictional Absaroka County, Wyoming. He is assisted by staff, friends, and his daughter in investigating major crimes within his jurisdiction.

Walt Longmire (Robert Taylor) is the sheriff of fictional Absaroka County. Sheriff Longmire's longtime friend Henry Standing Bear (Lou Diamond Phillips), a Cheyenne man, provides insight to and sometimes aids in dealing with tribal police. (The Indian reservation has its own police force, which has authority within the reservation boundaries, except for capital crimes.) As the series progresses, the friends deal with issues of gambling at a casino on the reservation, issues of competing jurisdictional authority for protecting people and prosecuting crimes, and other issues of contemporary Native American life.

The wealthy Rose family—video store magnate Johnny (Eugene Levy), his wife and former soap opera actress Moira (Catherine O'Hara), and their spoiled adult children David and Alexis (Dan Levy and Annie Murphy)—lose their fortune after being defrauded by their business manager. They are forced to rebuild their lives with their sole remaining asset: a small town named Schitt's Creek, which Johnny had bought for David as a joke birthday gift in 1991. The Roses relocate to Schitt's Creek, moving into two adjacent rooms in a run-down motel. As the family adjusts to their new lives, their well-to-do attitudes come into conflict with the more provincial residents of Schitt's Creek, including mayor Roland Schitt (Chris Elliott), his wife Jocelyn (Jenn Robertson), and the motel's manager Stevie Budd (Emily Hampshire).

*Golden Years* (also referred to as Stephen King's Golden Years) is a science fiction thriller limited series that aired in seven parts.

Harlan Williams, an elderly janitor who was caught up in an explosion at a secret army lab run by "The Shop", starts to grow younger. A ruthless operative is sent to cover it up, so the janitor and his wife go on the run with the help of a sympathetic female agent.

*Stranger Things* is set in the fictional rural town of Hawkins, Indiana, during the early 1980s. The nearby Hawkins National Laboratory ostensibly performs scientific research for the United States Department of Energy, but secretly does experiments into the paranormal and supernatural, including those that involve human test subjects. Inadvertently, they have created a portal to an alternate dimension, "the Upside Down". The influence of the Upside Down starts to affect the unknowing residents of Hawkins in calamitous ways.

The sixth and final season consists of a double order of twenty episodes, split into two parts of ten episodes. The season mainly focuses on King Bjorn's reign over Kattegat, Ivar's adventures in Rus', and Ubbe's expedition to Iceland.
