Graduate Engineer

Southampton

MFD Communication Infrastructure Limited (MFD CI) provide an independent, specialist consultancy service for communication and related infrastructure. That is everything from climbing surveys and structural investigations, to structural analysis and the development of fully engineered solutions.

We are currently recruiting for a permanent, full-time Graduate Engineer. The role will entail working on an interesting portfolio of projects, within a variety of environments such as ports and airports as well as for a variety of government and private sectors Clients in both the UK and Overseas.

Our Expectations

- A Graduate Engineer, with a relevant degree in Civil or Structural Engineering (BEng, BSc, MSc, or MEng);
- Willingness to gain experience in a range of relevant analytical software packages and 3D modelling;
- Ability to become conversant in proprietary software e.g. MSTower and Autodesk Robot;
- Work to Eurocodes;
- Commitment to continuous professional development;
- Working towards Chartership of the Institution of Civil Engineers; and
- Hold a full UK driving Licence.

What We Are Looking For

We encourage our employees to have vision, problem-solving capabilities, ambition, enthusiasm, and drive.

We recognise that people are the key to our success. We ensure that we provide them with a varied workload and encourage them to extend themselves in order to reach their full potential. As such we also expect them to have:

- A questioning / challenging approach;
- Excellent interpersonal, oral and written English communication skills;
- Strong attention to detail and ability to make correct judgements;
- The ability to work and communicate effectively;
- Good analytical and organisational skills;
- High level of computer proficiency; and
- Ability to work effectively under pressure.

Applicants should ideally have a 2:1 or above Civil / Structural Engineering Degree, a 'B' or above Maths A-Level, and a 'C' or above in your remaining A-Levels. Post-graduate qualifications are not a requirement but will be of interest where they are in a relevant subject.

Working For MFDCI

MFDCI are able to offer the successful candidate a wide variety of project work, and an interesting workload, significant opportunities within a growing company, a competitive salary and high-quality mentoring from experienced colleagues.

Working for MFDCI offers you the opportunity to think as an engineer, to be innovative and creative, and to develop your skills technically and commercially. We endeavour to inspire and motivate every member of our internal team.

Training

MFDCI are working with the Institution of Civil Engineers to develop an Approved Training Scheme and can provide structured training to candidates seeking Chartership.

MFDCI offers competitive salaries, holiday and other entitlements. We are committed to the training and personal development of our staff.

All job offers are subject to being able to work at height and obtaining security clearance.

To apply, please forward your CV to Ally Briffett
