

# Introducing: The Bedet

WHERE DIGNITY MEETS  
COMFORT, INVENTED BY  
A NURSE

## CLEAN COMFORT. EVERY TIME.

### PROBLEM

Traditional bedpans are uncomfortable and difficult to use. Existing solutions are either limited in scope or invasive, creating a need for a more comprehensive, hygienic solution.

### SOLUTION

A patent-pending soft-touch bedpan with water and air bidet features, The Bedet is an innovative product designed to revolutionize personal hygiene for individuals with limited mobility. It offers:

- Thorough, autonomous cleaning and hygienic design
- Comfort and increased independence

### MARKET

- 58 million Americans currently 65 and up, expected to grow to 72 million by 2030
- 12 million Americans receiving home health care.
- 1.6 million Americans in skilled care facilities

### BENEFITS

For Patients:

- Enhanced Comfort & Dignity
- Improved Hygiene
- Ease of Use

For Organizations (Skilled Care Facilities, Hospitals)

- Improved Operational Efficiencies
- Increased Productivity
- Compliance with Hygiene & Safety Standards

The Bedet by Selah Innovations is set to revolutionize personal hygiene by providing a comprehensive, non-invasive and user-friendly alternative to traditional methods.

Join us in eliminating user discomfort and caregiver burden. Together, let's partner to elevate the standard of care in your facility.
