What does this Program Offer?

- Implements inductive Bible study methods and teaches students to investigate the Bible in depth as well as looking at practical ethical foundations.
- Includes a large core of prescribed courses with an emphasis on High School preparation in the belief that all students should be literate in and conversant with the humanities, the sciences, and the arts.
- Teaches that history is really “His” story. Students see the historical development of theology, art, ethics, economics, and literature while studying the rich heritage of western civilization and American history with the Biblical integration of God’s principles of life.
