Award-winning reusable containment for ANY challenge

Fast Installation

Installs faster than drywall and other competitors' products.

Superior Durability

Built to last, our systems are the most durable in their market segment.

Reusable & Waste Reducing

Reused and reconfigured on hundreds of jobs for years, reducing waste.

Great Looking

Our attractive systems blend into the existing environment.

RealWall™

The premier solution in sound blocking temporary containment.

With the appearance and stability of a real wall, our original, award-winning containment solution is renowned for its unmatched durability and ability to reduce renovation noise by up to 50%. The great looking, high-gloss painted aluminum panels are easy to disinfect and exceed ICRA Class IV and V requirements. Need a containment solution to stand up to your most demanding projects? RealWall is the premier choice.

**LESS NOISE.
MORE STABLE.**

LiteBarrier™

*The premier solution in
lightweight temporary containment.*

**STARC's LiteBarrier is the most durable, best
looking, and easiest-to-install lightweight containment
solution available.**

**LIGHTER WEIGHT.
EXTRA DURABLE.**

FireblockWall™

Stops fire. Saves time.

FireblockWall is the first of its kind reusable one hour fire-rated temporary containment system. It installs four times faster than drywall, saving time and money. It meets four industry fire codes, including the critical certification for a one-hour fire barrier – and it satisfies ICRA Class IV and V guidelines. As the only safe and sustainable solution that can be used over and over, FireblockWall delivers unmatched performance and durability.

**Meets ASTM E119,
ASTM E84, NFPA 241,
and IBC requirements.**
