

TESTIMONIALS FROM THOSE WHO HAVE USED ESSI PLUS TEA

I have had cancer cells in my body for over the last 20 years, most of them benign, til I developed breast cancer in '99. My body also has made lipomas for years. In March '07, I went for my regular oncology visit and saw the ad in Tidbits for Essi Plus Tea, and now I no longer make lipoma cysts. The ones I had are gone. I'm also no longer considered diabetic (my doctor says) and I no longer suffer from depression. I'm no longer on any form of chemical drug for pain. I've lost 65 lbs. My hair is turning darker, my skin tone is greatly improved and I am no longer on oxygen daytime – only at night – my doctor took it away from me. I feel great. My husband also takes Essi Plus Tea and he's feeling great too. I also give the tea to my little 9 year old dog who now thinks she is a puppy. She gets 3 eyedroppers full of tea every morning when we take our tea. G.V., Cody Wy.

For a year my hands were numb when I slept and drove the car. Within 2 days of taking Essi Plus Tea the numbness was gone. If I take Essi Plus Tea every day, my hands are never numb. D.B. Roundup, MT

I noticed, from about seven days after taking Essi Plus Tea, the floater in my eyes had cleared up. I was no longer developing cold sores and my psoriasis faded. My husband's skin cleared up; not as blotchy and scaly. His eyesight improved tremendously and his digestion was better. In the past, he had trouble swallowing and that also cleared up. All in all, both of our feelings of wellbeing greatly improved. We were calmer with a feeling of tranquility. R.C. Miles City MT

I was diagnosed with polycythemia in fall of 2004. The bone marrow becomes erratic, producing too many red and white blood cells and platelets. This can lead to strokes, heart attacks, death, if untreated. Treatment is a phlebotomy as needed to control blood counts. In 2005, I had no other treatment. My ears hurt and were dizzy feeling, I had bouts of dizziness when turning in bed at night, strange unwell feeling, very itchy scalp that felt unattached to me, shaky legs, brain not functioning well, writing very scribbled like no brain and hand coordination, strange body part itches – one toe, back of one leg, one fingertip, black eye circles. February 2006 I started on a chemotherapy prescription drug. The strange feeling was worse, also loss of taste and smell, and no hunger. I had bad heart thumps at night, hair began to fall out, flu-like sicknesses every few weeks. The only think actually helped was that terrible tiredness. In later part of July, I quit taking the drug. I saw the ad for Essi Plus at a coffee shop, took it home and set it away. When I realized I needed to do something for my blood condition again, I decided "OK, this is worth a shot". In September 2006, I started on the tea, working up to 6 oz. per day. I've kept a diary each day since. On my fourth day of the tea, my daughter told me how much better my color was, not so gray looking. Also, my head was not itching or feeling strange. By day 15, my ears were getting better. By about the 40th day, that strange unwell feeling was gone and my ears were good – not dizzy. By the end of October, I could push up my shirt sleeves and stand pressure on my arms and cross my legs without them hurting. Another great thing, my skin texture improved 100%. The first part of November I noticed that I had ridges of new growth on my thumbnails and big toenails. Time will tell if I am cured, but my disease is definitely being controlled without drugs. I work, my brain is functioning, for the most part I feel OK, taking into account my environment (working conditions). I plan on taking Essi Plus for as long as needed. I still take 6 oz. daily. The first week in March, 2007, I had a phlebotomy – first one since April 2006. R.R., Billings, MT

I am on the second brew of Essi Plus Tea. I must admit that the results started to appear after about 1 month. I have no official diagnosis, except bulging discs and migraines. My symptoms of generalized pain, tremendous fatigue, and many more got me referred to many specialists. I was told I could have M.S., fibromyalgia, chronic fatigue syndrome and more, but none of the tests were conclusive – and I have been through a lot of tests. I see my primary doctor, a pain specialist, a physical therapist. I get massages. I've tried acupuncture, chiropractors, crying and praying. With Essi Plus Tea, I can say that I now feel more energized. The pain is minimal, the fatigue has improved tremendously, and I rarely get migraines. I rarely take any pain medication. I feel like a new person and there has not been any other changes in my diet, lifestyle, work or routine – so I am convinced that it is the tea that has made such positive change. My aunt, cousin, and friend drink your tea and saw results much sooner so I was a little discouraged at first. Thank you for sharing this tea. God Bless. F.V.

I want to share a few of the things that the Essi Plus Tea has done for me. I ran into the article that runs in the Tidbits and felt drawn to it. I called Elaine and felt that I had to meet her instead of just mailing for the tea. That was a fun and enlightening experience. I feel that the atmosphere that the tea is made in is very positive and advances the healing ability. I have suffered many skin ailments over many years and have tried many things to clear them up. The tea helped me get them under control, my husband and I have used the tea over a period of one and a half years, taking a break as advised to let the body rest. We have also found the tea useful with our little dog. She runs in the yard and gets stung by bees and we put a cotton ball soaked in the tea on her bite spots and in no time the swelling goes away and she is fine again. Several times she has got excessive matter in her eyes and we have taken the cotton soaked in tea and cleaned the eye and surrounding area and that has cleared up as well. I cut my leg on a cardboard box at work and it wasn't healing as fast as I had hoped, so I soaked gauze in the tea, put it directly over the cut and wrapped it in plastic film to hold it in place and keep everything dry, and in a day or so the cut was healed. Legs can be slow to heal I have learned and so I was grateful to find a way to speed up the process. Nine months ago we found out that a very good friend has prostate cancer, the numbers were so high that they doctor didn't feel there was any real hope of seeing him alive again, but scheduled an appointment for 8 months later. I suggested the tea and they got in touch with Elaine and started it. Just recently, they had the 8 month check up and the numbers were amazing, under 1. The doctor was amazed to even see his patient alive. This was an amazing recovery. A co-worker had a skin condition on her leg and then added to the problem when she cut it on a cardboard box. It didn't heal, and didn't heal, then it got bigger and inflamed and was extremely painful. I suggested the tea to her. She started on it and also down the road put it directly on the wound. The cut eventually cleared up, but the other benefit that resulted was the surrounding area that had been discolored, faded and the tea seemed to be drawing out the inflammation out of the entire leg. N.P. Billings, MT

I was diagnosed with prostate cancer the spring of 2012. Blood analysis results documented a high cancer cell antibody activity level. My naturopath doctor recommended a nutritional program to combat the disease. The key treatment is Essi Plus Tea which performs as a blood cleanser. Within 6 months my cancer cell antibody activity level had reduced significantly to what was described as a normal level based on the ability of the body's immune system to remove cancer from the body along with other diseases. My body healed using Essi Plus Tea to cleanse my blood of cancer cells in combination with a healthy diet. Essi Plus Tea functioned as a wellness remedy for the cancer and other diseases. I've had only one cold since starting my treatment of Essi Plus Tea and my arthritis diminished considerably in both knees. My overall wellness has improved considerably and I lost 35 pounds because of my dietary change with Essi Plus Tea being the key ingredient. The bottom line is the Essi Plus Tea strengthened my body's ability to combat all diseases including cancer. After 5 years plus of using Essi Plus Tea, and being 78 years old, I feel much better than I have for several years and have the confidence that I will continue to enjoy a relatively disease-free life. I am now off all prescription medications. L.B. Stevensville, MT

<i>I have a large dog, about 90 lbs. She is 10 years old. She was having trouble going up and down the stairs. I started giving her Essi Plus Tea and in about 1 month she can go up and down the stairs without any problem. C.H. Indiana</i>	I had several non-cancerous bumps on my face under my eye. They were completely gone in less than 1 week after I started taking only 2 oz. of Essi Plus Tea. When I went off the tea my arthritis felt much worse. Since I resumed taking the tea, it almost has disappeared. My mother-in-law had a large lump on her ear that went away after taking 2 oz. of Essi Plus Tea for only 1 week. The most amazing healing was on my 19 year old horse Travis. He had a large 7x5 inch tumor on his thyroid gland. I put the tea on his grain and within 2 weeks the tumor was half the size. It went down to 1/3 of the original size within 3 weeks. B.A. Lavina, MT	Back in 2013 I thought I had a spider bite on my neck. Three months goes by and it wouldn't heal. I went to my doctors and they ran tests. Found out I had lymphoma. After several cat scans and pet scans my doctor wanted me to go to Philly to have a bone marrow transplant, chemo, and radiation. A friend's father takes Essi Plus Tea for years. He had me drink the tea. Four months later no traces of cancer. Last cat scan was clean. Thank you Essi Plus Tea. J.L. Williamsburg, VA
We are believers. Sonny started taking the tea end of March '08 when Dr. suspected lung cancer. In April, he had 5 biopsies and they could not find a cancer cell on any of the spots that the pet scan said was cancer. He was severe COPD from anydrous poisoning in 1944. When he started taking the tea he was on oxygen day and night. He has not taken oxygen since August and feels and looks great. Many people have commented. T.	I read about Essi Plus Tea in an article. I had a few health concerns so I thought I would give it a try. I had a fatty deposit on the back of my neck that was clearly visible. After taking Essi Plus Tea for three months, the lump was almost gone. I also had 2 calcium deposits on my scalp. One was quite large and was showing through my hair. After 6 months it is almost gone. The second one was just forming on my forehead. It is gone completely. I am also off my Type 2 diabetes meds and my blood pressure is good. I give credit for these changes to my consumption of Essi Plus Tea. So glad I tried it. M.A.G. Columbus, MT	<i>For the last seven years my health went steadily downhill. Due to problems with cholesterol, blood sugar, fatigue, arthritis, carpal tunnel, and fungal infection, I was bed ridden, seriously depressed, and rarely went outside my home. During the last three years, through medical doctors, I was prescribed and took steroids, antibiotics and cortisone which led only to horrid side effects and no improvement. I started taking Essi Plus Tea. Gradually my head started to clear, pain started leaving. I could resume walking and be outside again. This all happened within the first month. I have the use of my hands again. At the end of the 3 month detoxification, I am walking 5 miles a day, breathing so much better and am happily interaction with my family again. I know that my finding and taking Essi Plus Tea saved my life. S.K. Roundup, MT</i>
I assisted in the care of an 84 year old woman who was dying. I am a licensed RN for 30 years. I have worked with many bed ridden people at the end of their lives. This woman had been taking Essi Plus Tea for several months before her final few weeks bed ridden. Never in all those months and weeks was there even any hint of the skin break down. This is highly unusual! Normal skin will immediately break down when the person is in bed and unable to take proper nourishment such as at the end of life. L.P. Billings, MT	<i>In July 2008 I was diagnosed with colorectal cancer which was discovered through a colonoscopy with was unable to be completed because of the size of the tumor. I underwent surgery in August. The doctor recommended chemotherapy, but admitted it had only a 30% chance of success. I refused chemotherapy and opted for natural healing remedies. I started the Essi Plus Herbal Tea regimen the first part of September, 2008. On February 10th of 2009 I had my second colonoscopy. This time they were able to inspect the entire colon and it was completely clear of any tumors and polyps. Needless to say, the doctor was amazed. I am a firm believer in the healing properties of Essi Plus and highly recommend it to anyone suffering from cancer who does not believe in the invasive and destructive use of chemotherapy or radiation. R.N.</i>	Please send me more of your tea. Your tea, Essi Plus, has helped me with many things. First and foremost, it has helped me cut back on my Synthroid medication. My thyroid is functioning better so I was able to cut back on the medication that I have been on for 25 years by 1/3. Also, the arthritis in my hands is much better. I no longer have constant pain. Also, I noticed the squiggly lines I see in my eyes no longer exist, while they used to be very prevalent. One other thing I noticed is that I no longer have hardly any B.O. (not that I ever had much, but it is almost completely non-existent). J.R. Chattaroy, WA
<i>I had a chronic infection in my jaw which with surgery and 2 years of antibiotics, was not going away. I decided to try Essi Plus, and within the first week the swelling in my neck started to subside. Upon completing the 3 month dosage, the infection was gone. You will not regret using Essi Plus. T.J. Billings, MT</i>	After I came back from my vacation I noticed Cleo, my 8 year old kitty, stopped eating. She was diagnosed with a fatty liver. Sometimes some animals get upset when you leave, and stop eating. When they stop eating the body thinks it is starving... which caused fat to accumulate around the liver, a body's survival reaction. After several thousand dollars in medical expenses, I was getting nowhere. Animals often don't start eating again at that point; the next step was a pouch outside her body for the rest of her life. At that point I was force feeding her with a syringe and then it dawned on me, I should feed her "the tea", Essi Plus, the same way. Within a week she started eating again on her own! She is a very healthy, happy, full of life kitty again. Thank you Essi Plus Tea. L. Spokane, WA	I have been taking Essi Plus Tea off and on for a few years. It cured my arthritis. I wanted to tell you about the sensation I had when I was first taking it. I took it in the middle of the night when I get up to go to the bathroom – then I go back to bed. When I laid down, I had the feeling I was being caressed by a warm breeze but this feeling was on the inside of my body. It was pretty wonderful and I've been a believer since. P.C. Idaho

This Essi Plus Tea has been the best thing; detoxifying both my blood and my liver. It has given me more energy and I have a cleaner outlook. I wouldn't be without it. M.K. R. Columbus, MT	For three years I had upper body itch and lower body eczema. I went to six dermatologists. They told me to live with it. After taking Essi Plus Tea I had relief from both in six weeks. D.D.G Dutton, MT	<i>I started taking Essi Plus around December 12, 2008. I ended the detox period March 28, 2009. During that period, my arthritis pains have subsided considerably. Previous to Essi Plus, I could not read a newspaper without my glasses. My eyesight, especially my right eye, has improved to the point that I can read the paper without glasses. It is still a little blurry, but I can read it. Before, the words were just a total blur. The vision seems to be getting better all the time & I hardly wear my glasses at all anymore. T.H. Lewistown, MT</i>
I'm writing to order some more tea. I'd like to order four bags. I'm hoping you can get it right out; I kept waiting because a friend and a friend of hers were both interested in ordering, but in the end backed out. So, now I'm down to my last quart. I also wanted to share with you some encouraging things since I started on the tea. Within the first month, the moles I had on my scalp dried up and fell off. I started my dog on the tea in efforts to help her heal from a digestive issue where she could not keep food down. I suspect it had something to do with large amounts of grasshoppers she had eaten at the end of the summer. The vet didn't find anything treatable. By, my dog was really down in weight and had been vomiting for weeks. About a week and a half after starting the tea, she was keeping food down and within another week all symptoms were gone. Coincidence? The greatest surprise for me was an issue with my foot. Now, understand that I started the tea as a cancer preventative and boost my immune system. I wasn't expecting anything else. So, the moles sloughing off was unexpected. But, what has happened with my foot has made me a real believer in this tea. Back in high school I broke my big toe. Doctor couldn't splint it and it took forever to heal. Fast forward a few decades and I started having soreness undoubtedly from arthritis in that joint. Over the last five or six years the pain progressed to where I was lame all the time. I love to hike and the pain really was preventing me from enjoying walking. It was pretty well impossible to find shoes that I could wear due to pain and inability to bend my big toe to get into the shoe. It got to the point where both joints in my big toe appeared totally fused. They were large and it felt like bone growth had locked up the joints. My toe was essentially paralyzed. I couldn't move it even by taking my hands and trying to move it. Again, I did not take this tea thinking it would help with this situation. I figured I was destined for the joint damage to continue. About two months into taking the tea I was watching TV and looked down at my feet and realized I could move the end of my big toe. Doesn't sound like much, but it was a big deal to me! It has been about a month since then and I now have movement in both joints of the toe. The swelling has gone down and my two feet are identical in size. What appeared to be bone growth has receded to what seems like a cyst between the two joints and that is decreasing in size. I have been able to wear shoes I haven't been able to get on in a couple of years. And, best of all, I can walk without severe pain or limping. There is still slight discomfort, but it is minimal. I use a CDB topical product on it instead of any kind of any analgesics and I have hopes that the improvement will continue. So, that's my little miracle story. I have a friend my age back in Wisconsin that will likely be contacting you shortly as she wants to start taking the tea. So, don't be surprised getting something from someone out East. I think her home address is actually Michigan as she lives across the border from where I did. Now that I'm ready to switch to maintenance, it's time to start thinking diet. Thanks for your recommendation of a book to start out with. I'm glad I have had a chance to talk with you and hope one day to meet you in person. C.C.
