- Food Zones, Fun zone, Medical Facilities, Hotels, Hospitality and recreational facilities to support the life of EDUCATION CITY.
- Ascential support development like Fire station, Police Station, supply of Electricity and Water, Waste management, Traffic control and others.

The Development plan of EDUCATION CITY

EDUCATION CITY is full of modern development and supporting implementation of National Education Policy to participate in VIKSIT BHARAT 2047.

The entire development is divided in part of three:

1. Development Authority (Government) is plan to lead the development in associational model of Public Private Partnership (PPP) and execute the development of public utility like Roads, Electricity, Water, Drain, parks and more with full of development control to millstones, timelines, frameworks, policies, and business modelling of the stockholders.
2. A master developer or consortium for master development to uplift the execution of EDUCATION CITY in association with government authorities, investors, supporting partners with end-to-end compliances, recommendations and quality standards of the development of EDUCATION CITY.
3. Inviting Individual and Institutional Investors for real development for Schools, Institutions, University, Residentials, Commercials, Hotels, Hospitals, markets and other

amenities of the EDUCATION CITY. They receive their plot from the authority to develop an institution to support the configuration of EDUCATION CITY.

The Financial Plan of EDUCATION CITY

EDUCATION CITY is a mega size of development to require the financial planning to manage the funds flow and investment management to boost the positivity.

1. Development authority and master developer of the EDUCATION CITY to create the pool of large size investors, shareholders and bankers together for master development with return on investment ROI, exit mode, assets and this is possible to create a new business incorporation with stockholders to play the professional and transparent operations.
2. A pool of CSR & Institutional funds, Philanthropist support and community donations is a tool for Impact development and planning a Public Impact Bond with registration to Social Stock Exchange of India. This is a futuristic way to source the funds for social development and public infrastructure of EDUCATION CITY.
3. The confidence of Investors with understanding of development, vision and execution is the key to flow the investment of nation and international with supporting practices of authorities, master developer and compliance to achieve the target of required funds of EDUCATION CITY.

The capacity building of EDUCATION CITY

The FOEII FOUNDATION is an organization to create the capacity to become configurator to inviting the stakeholders to achieve the objective with full of capacity to demonstrate and explain to government authorities, fulfilment of compliances, network buildings and supporting to create the documents of policies, frameworks, operations, management and technological implementation of the educational development.

The FOEII FOUNDATION is a newest and baby organization with support and stack holding of Domains expertise and this is a Federation of educators, professionals and Investors to impact the development as collaborative forces of the execution.

The FOEII FOUNDATION is framed and incorporated with recommendations of National Education Policy 2020 in regulation and in force to implement for educational development.

The conclusion of EDUCATION CITY

The development of EDUCATION CITY in India is the future of educational development to support the society with the impact of public development and supporting to achieve the goals of government objectives.
