CLIMATE EMERGENCY DECLARED in 2019

ACCELERATED : NET ZERO CARBON (CO₂) REDUCTION TARGETS

- RAPID - PHASE OUT FOSSIL FUELS
- RAPID - MIGRATION TO ELECTRIC VEHICLES
- EXPENSIVE - BUILDING CONVERSION
- IMPRACTICAL - RENEWABLE ENERGY PLANS

INDEPENDENT EXPERTS & SCIENTISTS

There is **NO** climate emergency : **Letters to UN signed by Scientists & Experts = 500 in 2019 = 1150 in 2022**

CANCELLED, MARGINALISED, NOT FUNDED

Strongly refute climate emergency & sternly warn against the catastrophic economic & social harms of pursuing **incoherent CO₂ policies**.

- BIASED ADVISORY
- VERY BAD SCIENCE & STRATEGY

?

- By 2030
- Consumption of meat reduced by 50%
 - 3 New items of clothes / person / year
 - Production of diesel & petrol cars end
 - 25% farmland rewilded
 - 3 UK airports remain
 - All home appliances are electric

**CARBON TAX,
FINES, PENALTIES
& ALLOWANCES**

**Is this the
FUTURE you want ?**

Why are 1500 + experts and scientists strongly refuting a climate emergency and warning against net zero policy ?

Britain contributes to 1% of global CO₂ emissions and China alone is increasing its 27% of global CO₂ emissions each year. What possible benefits are there to subjecting the people, the economy and society to the severe hardships and poverty of zero-carbon ?

WE ARE ASKING FOR PROPER IMPACT, COST AND BENEFIT ASSESSMENTS INFORMED BY SCIENTIFIC IMPARTIALITY.

INDEPENDENT EXPERTS & SCIENTISTS

"What historians will definitely wonder about in future centuries is how deeply flawed logic, obscured by shrewd and unrelenting propaganda, actually enabled a coalition of powerful special interests to convince nearly everyone in the world that CO2 from human industry was a dangerous, planet-destroying toxin. It will be remembered as the greatest mass delusion in the history of the world - that CO2, the life of plants, was considered for a time to be a deadly poison"

**Former IPCC Lead Author
Dr Richard Lindzen**

Bjorn Lomborg

"False Alarm is a comprehensive analysis of the issues in climate change that represents a reasoned balance between the shrill voices demanding immediate change (without being aware of the practical issues involved) and those who see no problems at all with our current environmental situation." - New York Journal of Books

<https://www.lomborg.com>

"The bottom line is that the science says that most extreme weather events show no long-term trends that can be attributed to human influences on the climate."

"Projections of future climate and weather events rely on models demonstrably unfit for the purpose."

Dr Judith Curry

"I am broadly concerned about the slow death of free speech, but particularly in universities and also with regards to the climate change debate"

"The manufactured consensus of the IPCC has had the unintended consequences of distorting the science, elevating the voices of scientists that dispute the consensus, and motivating actions by the consensus scientists and their supporters that have diminished the public's trust in the IPCC"
