UPF 50 FABRIC

A UPF rating of 50 is the highest rating obtainable (*thank-you-very-much*)!

This means that only 2% of available ultraviolet radiation is able to penetrate a Tzu Tzu garment.

BONUS: this kind of protection doesn't wash out, thanks to the special weaves of the fabric.

Or as we like to put it, "If we're stranded on a deserted island...we hope we have our Tzu Tzu with us!" (*as if we wouldn't*)
