PRX-PLUS®

THE FUTURE OF SKIN REJUVENATION IS HERE. GLOW INSTANTLY. REJUVENATE DEEPLY. NO NEEDLES. NO DOWNTIME.

NON-INVASIVE BIOSTIMULATION
TREATMENT FOR REVITALISED,
BRIGHTENED AND HEALTHIER-
LOOKING SKIN.

A precision-driven, non-invasive Topical Biostimulator & Brightening Treatment for the Face and Body that revitalises the skin by brightening uneven pigmentation and reduces the appearance of deep wrinkles. 20+ years of rigorous safety and efficacy testing. Made in Italy. Dermatologist tested. Globally patented. Fragrance-free.

A series of three to five PRX-PLUS treatments offer immediate and enduring result, all without needles, discomfort, or downtime.

What is PRX PLUS?

A Revolutionary Biostimulation Treatment

/ No downtime

/ No injections

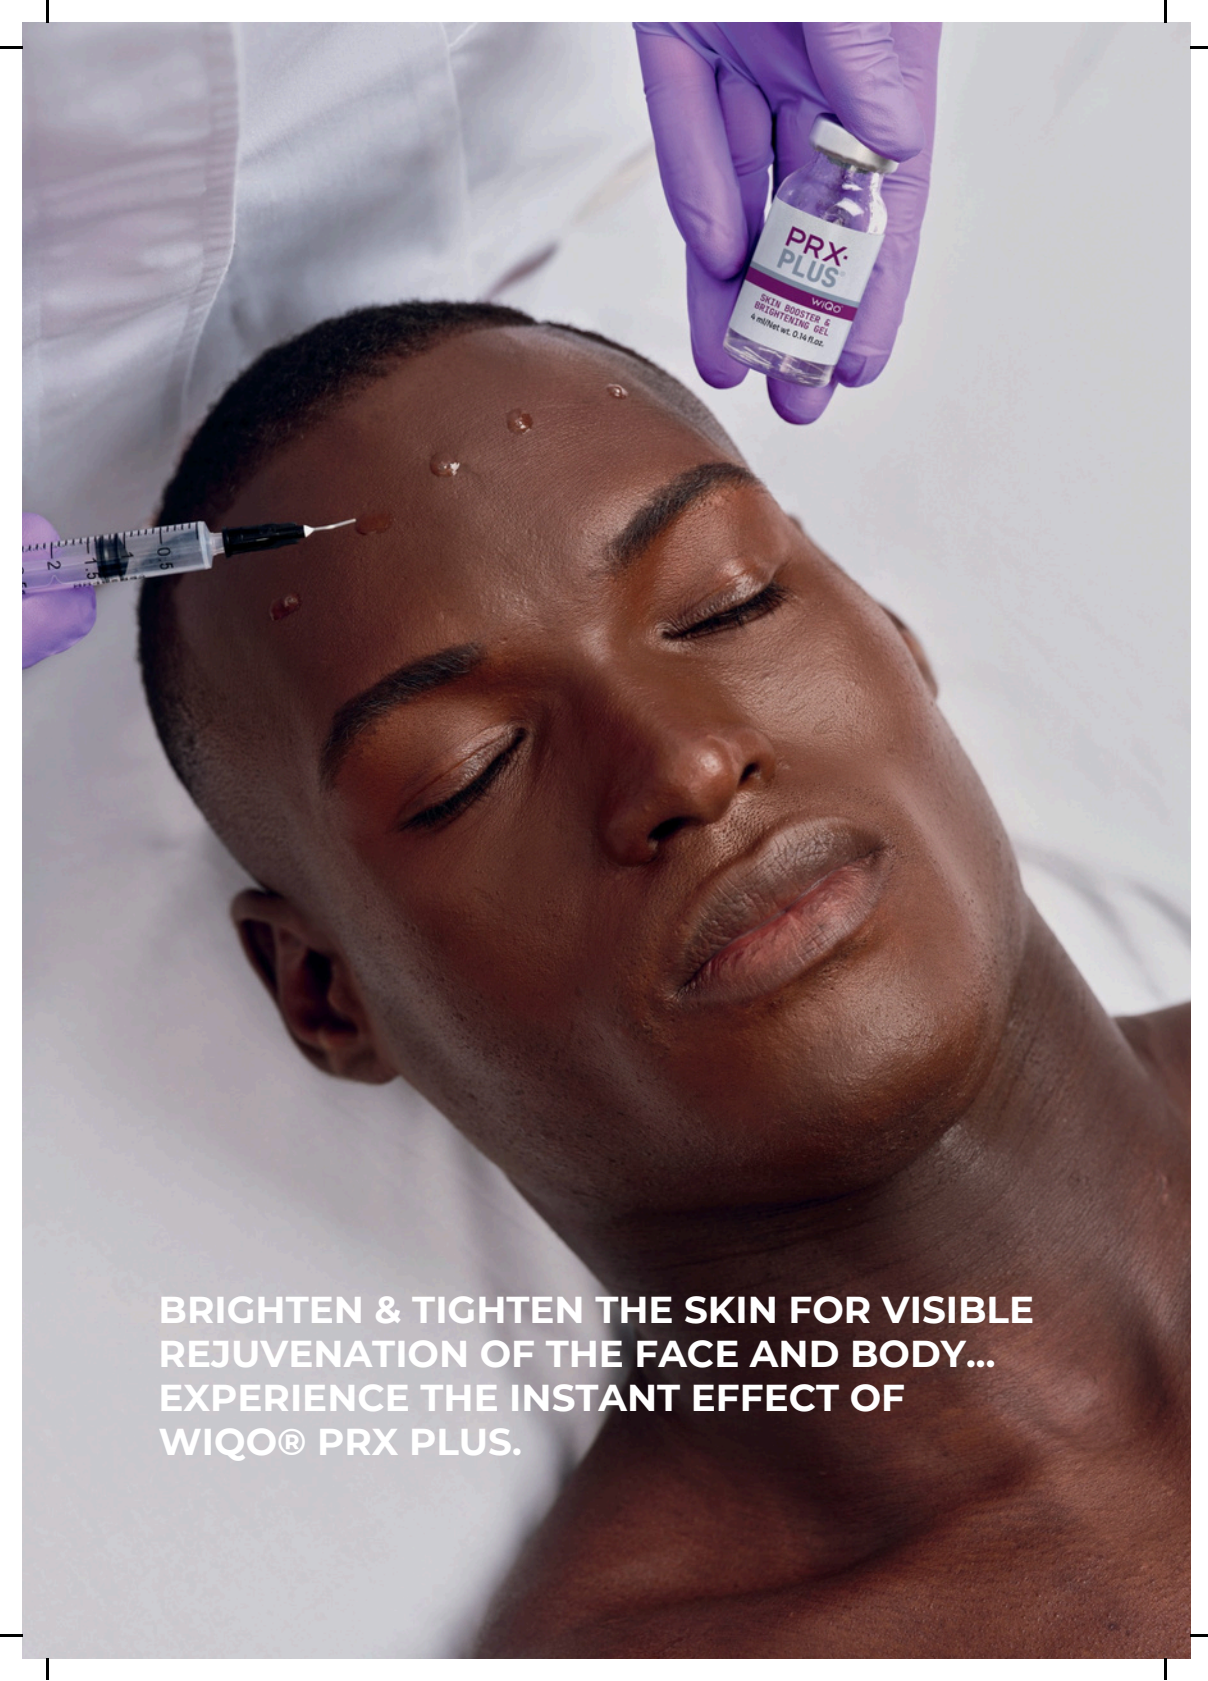

/ Instant glow with long-term benefits

PRX-PLUS is a professional treatment made by the WiQo® collection. It is a Topical Biostimulator and not a chemical peel. PRX-PLUS is the first globally patented topical product that uses 33% Ammonium Trichloroacetate and Homocysteic Acid. This treatment helps patients even their skin tone and brighten their complexion. It is gentle and has no downtime. Your practitioner can use this treatment on all skin types or tones.

This unique formulation penetrates deep into the skin to improve texture, firmness, and overall radiance, making it a perfect alternative to peels, lasers, and microneedling.

What can PRX Plus do?

A Revolutionary Biostimulation Treatment

PRX Plus is a cutting-edge, non-invasive skin treatment that stimulates collagen production and deeply hydrates your skin—without needles or peeling.

- / Fine lines & wrinkles**
- / Loss of skin firmness & elasticity**
- / Dull, dehydrated skin**
- / Enlarged pores & uneven texture**
- / Acne scars & sun damage**

Treatments can be done year-round, with visible results from the first session and cumulative improvements with multiple sessions.

START

THE PROCESS

BIOSTIMULATE AND BRIGHTEN YOUR SKIN, WITHOUT NEEDLES WITH PRX-THERAPY

After a clinical evaluation, the Doctor or Nurse will develop a **tailor-made** protocol.

The identified protocol always begins in the clinic, where PRX PLUS is applied to your skin by professional hands. This activates an immediate regenerative process, resulting in a healthier-looking and more even complexion visible from the very first session.

IN CLINIC

STIMULATE REGENERATION

Your Doctor or Nurse will gently and effectively stimulate the natural regenerative process of your skin with PRX PLUS.

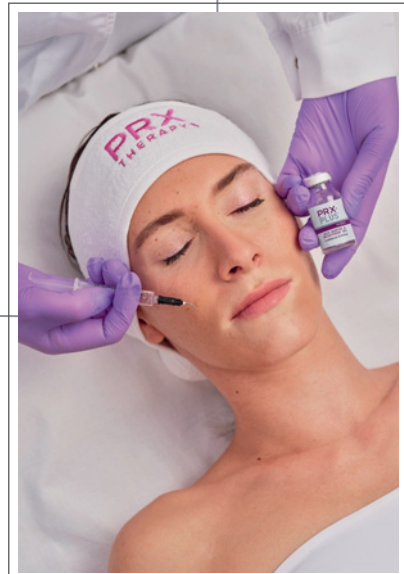

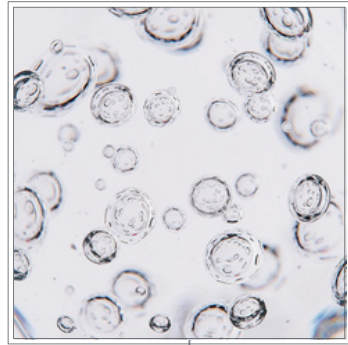

A session lasts 15-20 minutes, is painless and is performed without needles.

After just one, your skin may appear brighter and tighter.

AT HOME

NOURISH & PROTECT

After the treatment, incorporate the **WiQo NOURISHING AND MOISTURISING CREAM FOR DRY SKIN** into your daily beauty routine for a hydrating and protective action to reinforce the results of PRX PLUS.

Keep supporting your skin's elasticity and smoothness with the synergistic action of these active ingredients: shea butter, echinacea extract, jojoba oil, wheat germ oil and grape seed oil.

FAQS

FREQUENTLY ASKED QUESTIONS

How long does it take for PRX PLUS?

A single PRX-PLUS treatment can be performed in 15-20 minutes, depending on the size of the treatment area. It is a quick treatment that does not involve needles, downtime, or peeling. Patients can also notice immediate results, with their full results appearing over time.

Is There Any Downtime or Recovery For PRX-PLUS?

No, PRX-PLUS helps even skin tone and brighten complexion without any downtime. As soon as treatment is completed, patients can immediately return to their regular routines.

How many PRX-PLUS treatments do you need?

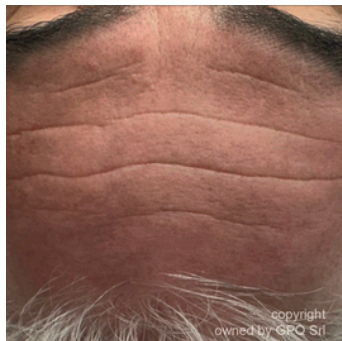

Your PRX Provider will recommend a treatment plan based on your specific goals. A series of 3 to 5 treatments are recommended.

How does PRX-PLUS compare to other skin treatments?

PRX-PLUS is a unique treatment because it is a Topical Biostimulator. Other aesthetic treatments that help with collagen production include lasers, microneedling, and chemical peels. PRX-PLUS is notable because it has no downtime, can be done year-round, and is safe for all skin types. That said, PRX Professional™ products are frequently combined with other skin treatments based on a patient's unique skincare goals and a provider's expertise.
