## The [ECO60] Program

### **Objective:**

An add-on and optional program for ETC members to participate while they have films or movies to be posted on ETC's YouTube (YT) channel or play list.

### **The Scheme:**

According to YT program any film of **8 minutes plus** could be inserted with foreign advertisements and in such case, YT will allot 60% of the revenue to ETC's a/c, and in return ETC will allot 60% of the funds received to be used for environmental protection or social welfare as determined by the relative film creators.

A regional Prime Minister (PM) would be elected to assist in handling or monitoring the funding.

### **Requirement of films:**

Members intend to join ECO60 must make sure their films to be 8 minutes plus without background music (our editors will add on appropriate music and logo which are free from copyright infringement). We will keep our members updated or enquire their opinions whenever necessary.
