

Certificate of Installation – Co-owner

Thank you for purchasing the Nowa water leak detection and shutoff system.

Protection includes a water leak detector for each appliance that is equipped with a water supply and present in the condo at the time of installation:

- under the kitchen sink
- on the sink's front toe kick to detect any overflow
- under the dishwasher
- behind any fridge with a water supply (if present at the time of installation)
- under any steam oven with a water supply (if present at the time of installation)
- under any coffee machine with a water supply (if present at the time of installation)
- behind each toilet
- on the floor of each bathroom to detect any spill from a washbasin, bathtub or shower
- behind the washing machine
- near the water heater
- under the air-conditioning unit (if present at the time of installation)

Additional components :

- 1 motorized valve installed directly after the condo's water inlet main manual shutoff valve
- 1 control panel installed near the motorized valve

We hereby certify that the Nowa system has been installed in accordance with the manufacturer's instructions and industry standards, and that all components were in good operating condition at the time of installation. We are not responsible for any changes made following this installation that may result in water damage (e.g., addition of any water-supplied appliance not present at the time of installation). We must be notified in writing of any such changes, and we must confirm the compliance of any new installation.
