

HOLY CROSS HIGH SCHOOL COURSE OF STUDIES

Revised: **April 2021**

DIOCESE OF SCRANTON

“They devoted themselves to the teaching of the apostles and to the communal life, to the breaking of the bread and to the prayers. Awe came upon everyone, and many wonders and signs were done through the apostles. All who believed were together and had all things in common; they would sell their property and possessions and divide them among all according to each one’s need. Every day they devoted themselves to meeting together in the temple area and to breaking bread in their homes. They ate their meals with exultation and sincerity of heart, praising God and enjoying favor with all the people. And every day the Lord added to their number those who were being saved.”

Acts 2:42-47

DIOCESAN MISSION STATEMENT

“We, the Catholic faithful of the Diocese of Scranton, in union with our Holy Father, the Pope, are called through Baptism to share the mission, which Jesus Christ has entrusted to the One, Holy, Catholic and Apostolic Church. Priests, deacons, religious, and laity, under the leadership of our Bishop, cooperate to proclaim the Gospel in accordance with the teaching of the Church, to celebrate the sacraments, especially the Eucharist, for the salvation of all, and to witness by Grace to the Kingdom of God so as to promote a culture of life, justice and peace.”

CATHOLIC SCHOOLS’ MISSION STATEMENT

“We, the Catholic Schools of the Diocese of Scranton, are committed to educate students and their families in the Catholic faith. We provide a Catholic education that is spiritually sound and academically excellent. We strive to prepare our students to be faith-filled leaders and life-long learners dedicated to serving the church and society.”

Holy Cross High School Mission Statement

Holy Cross High School, an institution of excellence, is committed to the development of the whole person, offering comprehensive academic, social and athletic programs which are rooted in the Gospel and teaching of the Catholic Church. A Roman Catholic High School in the Diocese of Scranton, Holy Cross challenges its students to appreciate life-long learning and to develop character, leadership and integrity in a caring environment in order to promote a culture of peace, justice and service.

Holy Cross High School Belief Statements

We Believe:

- That the Gospel teachings of Jesus serve as the core of all Religious, academic and extracurricular activities at Holy Cross High School.
- That through our Baptism we are called to share in the mission of Jesus Christ, proclaiming the Gospel, fully and actively celebrating the sacraments, and promoting a culture of life, justice and peace rooted in Christian service.
- That our Catholic faith fosters a welcoming family, faith-based environment for all people, regardless of race, creed or culture.
- That a respect for the dignity and value of self and others is essential for all growth, and that the whole person – mind, body and spirit – must be nurtured.
- That a challenging curricular program in the arts, sciences and humanities seeks to instill an appreciation for life-long learning and fosters the development of Christian leadership, character and integrity in all students.
- That our students' diverse physical and athletic abilities be developed to their full potential.
- That family participation, along with quality education, is important for our students to achieve their full potential.

GENERAL INFORMATION

ACCREDITATION

Holy Cross High School is accredited by the Commonwealth of Pennsylvania and the Middle States Association of Colleges and Secondary Schools.

GENERAL

Holy Cross High School is a comprehensive high school. Students are encouraged to select courses based on individual abilities, achievement, and goals within the limits of the specialized graduation requirements. Choice in sequence is based on standardized testing, teacher recommendations, and counseling assistance. Advanced Placement (AP) courses are available in AP English Literature and Composition; AP English Language and Composition; AP United States History; AP United States Government and Politics; AP Biology; AP Chemistry; AP Calculus; AP Art History; and AP Studio Art.

Career Technology courses are offered to sophomores, juniors and seniors at the Lackawanna County Career Technology Center on half-day sessions.

COURSE SELECTION GUIDELINES

GUIDELINES FOR SCHEDULE PLANNING

In selecting your courses, please keep in mind the following:

1. A minimum of seven and one half (7.5) credit courses, to include Theology, English, Science, Social Studies, Math and Physical Education, in each of grades 9 through 12 is required.
2. Study the description of subjects and pay special attention to the pre-requisites for certain courses.
3. Discuss choices with your current teachers. They are excellent guides to the next level of courses in their departments.
4. Learn the requirements for entrance into the college or school that you plan to attend after graduation or for entrance into the kind of work that you intend to pursue. These requirements form minimum guidelines. Do not be too quick to limit your opportunities.
5. Discuss the course selections that you have chosen with your parents.
6. Carefully select your courses since no schedule changes will be made without the permission of the Principal. The school will address schedule changes on an individual basis.

Immaculate Heart of Mary Honors Program Holy Cross High School

Philosophy

The Immaculate Heart of Mary Honors Program is a program that allows exceptional students to participate in a curriculum that offers courses which are broader in scope and are more demanding than the college preparatory curriculum. Students will be able to practice critical thinking and analytical skills that will aid them in developing their potential. The Immaculate Heart of Mary Honors Program will challenge outstanding students with a demanding education that stresses independent work and intense engagement with the faculty and other Honors students both in and out of the classroom.

Students completing the program will be awarded a diploma “with distinction.” Students graduating with a cumulative grade point average of 3.30 to 3.59 will be awarded a distinction of “Cum Laude,” students graduating with a cumulative grade point average of 3.60 to 3.79 will be awarded a distinction of Magna Cum Laude, while students graduating with a cumulative grade point average of 3.80 and higher will be awarded a distinction of “Summa Cum Laude.”

Admission

Recommendation of students into the Immaculate Heart of Mary Honors Program will occur upon completion of the third quarter of the sophomore year. Criteria for selection include:

- a. Placement in the top **10%** of the class
- b. A cumulative grade point average of **3.50** or above
- c. Intellectual aptitude
- d. Overall school performance (past and current), including attendance and discipline records.

Characteristics of candidates include:

- a. High academic achievement and intellectual ability
- b. Self-motivation
- c. Self-discipline
- d. Good organizational skills
- e. Excellent written expression
- f. Avid interest in reading
- g. Good oral communication skills
- h. Ability to work independently and collaboratively
- i. Good citizenship and attendance

Course: **Introduction to Philosophy (PHIL 113)**

Relative Value: I.H.M. Level II

Credit: Marywood University 3 credits; Holy Cross High School 1 credit

Pre-Requisite: ENGL 160, ENGL 180, HIST 100

Location: Marywood University

An introduction to the broad range of thinkers and issues that constitute philosophy. Students will examine critically the accumulated wisdom about God, nature, and humanity in order to evaluate their own positions and choices and to make ethical decisions in an interdependent world.

FRESHMAN SEQUENCE

Course: **Freshman Seminar** Relative Value: Pass/Fail
Credit: 0.25
Pre-Requisite: None

The instructional goals of this class are to help all freshmen achieve academic success in all content area classes; develop and reinforce study and organizational skills; develop critical thinking skills and to promote student responsibility and personal life skills. The course will cover topics such as organization for high school, goal setting, personal learning styles, use of a textbook, development and use of memory, test taking strategies, note taking, writing and editing skills. The students will also be introduced to a seminar style classroom discussing topics such as building confidence; family; honesty and integrity; use of imagination and challenges in life.

Course: **Introduction to Computers** Relative Value: Pass/Fail
Credit: 0.25
Pre-Requisite: None

Introduction to Computers is a one-quarter course for students in Grade 9. Students will learn how to use the school's network including logging on, saving files, and creating an organized file system. Students will learn how to effectively use the Internet for research and internet safety will be discussed. Students will use the Microsoft Office Suite including Word, Excel, and PowerPoint. How to use MLA formatting in MS Word will also be covered.

Course: **Introduction to Art** Relative Value: Pass/Fail
Credit: 0.25
Pre-Requisite: None

Introduction to Art is designed to acquaint the students with the Elements and Principles of Art/Design. Students explore new ways of observing and thinking about art and their environment. Emphasis is placed on the individual's original interpretation and the development of creativity in a variety of media, which include: paper, paint, pencil, and drawing materials as they relate to two and three dimensional design and life drawing. Opportunities for aesthetic growth, expression, and self-reflection will be offered. An historic overview of the progression of art styles is also covered. Assessment will include projects, rubrics, sketchbook work and quizzes.

Course: **Introduction to Music** Relative Value: Pass/Fail
Credit: 0.25
Pre-Requisite: None

This is a course required of all freshmen. The student will become familiar with the major elements of musical style as well as an understanding of basic notation. An understanding of fundamental music vocabulary is stressed, with emphasis on intelligent and critical listening. Students will also learn to perform popular chords and songs through the study of the ukulele.

COMPUTER DEPARTMENT

Course: **Computer Applications** Relative Value: Table II
Credit: 1.0
Pre-Requisite: None

The students will learn essential computer applications and internet skills for personal, academic, and professional success. They will use Microsoft Word/Google Docs/Google Drawings to create different types of documents such as infographics, posters, and MLA formatted papers. They will use Microsoft Excel/Google Sheets to create spreadsheets for both business and science applications and generate graphs to interpret spreadsheet data. Microsoft PowerPoint/Google Slides will be used to create and execute an artistic and professional presentation which includes text formatting, graphics, animation, and public speaking. Adobe Photoshop (or similar application) will be used to create high quality images and layouts using the basics of layers, adjustments, tools, masking, filters, and gradients.

Course: **Advanced Computer Topics** Relative Value: Table II
Credit: 1.0
Pre-Requisites: Algebra 1 (80 or higher) and Department Approval

Advanced Computer Topics will cover a variety of more advanced high school level computer related topics. Topics will include an introduction to object oriented programming (Python), 3-D design & 3-D printing, and physical computing. Careers in information technology and computer science will also be explored. Assessments will include daily classwork, projects, and quizzes

Course: **Computer Concepts** Relative Value: Pass/Fail
Credit: 1.0
Co-Requisites: Modified College Prep Courses

This course covers similar material to Computer Applications but at a slower pace and with a smaller class size allowing for more individual assistance. The students will learn essential computer applications and internet skills for personal, academic, and professional success. They will use Microsoft Word/Google Docs/Google Drawings to create different types of documents such as infographics, posters, and MLA formatted papers. They will use Microsoft Excel/Google Sheets to create spreadsheets for both business and science applications and generate graphs to interpret spreadsheet data. Microsoft PowerPoint/Google Slides will be used to create and execute an artistic and professional presentation which includes text formatting, graphics, animation, and public speaking.

Course: **Web Design** Relative Value: Table II
Credit: 1.0
Pre-Requisites: Grade 10-Department Approval; Grades 11 and 12-No approval needed

This course introduces students to basic web design using HTML and CSS This course includes: planning and designing effective web pages, implementing web pages by writing HTML and CSS code, and enhancing web pages with the use of page layout techniques, text formatting, graphics, images, and multimedia. Students will also be introduced to Java scripting and open-source website creation platforms (example: WordPress). Students will produce a functional, multi-page website as the culminating project.

Course: **A.P. Computer Science Principles** Relative Value: Table IV
Credit: 1.0
Pre-Requisites: Advanced Computer Topics and Teacher Approval

The AP Computer Science Principles course is designed to be equivalent to a first-semester introductory college computing course. This course introduces students to the fundamental concepts of computer science and explores the impact computers and technology have on our society. It will emphasize the use of problem solving and algorithm development in coding.

Course: **English 2** Relative Value: Table II
Credit: 1.0
Pre-Requisite: English 1

English 2 consists of the study of the short story, the novel, drama, poetry, and non-fiction works. A genre approach is used with respect to the study of literature. The students read a minimum of three novels and two plays, one of which is a Shakespearean play. Students are required to recite a passage from William Shakespeare's play. Students continue to develop their writing skills through the Collins Writing Program. Grammar and usage are reviewed through this writing program. Sophomores study verbal usage as well as clauses to help them develop writing skills. Vocabulary is also incorporated into the curriculum as students prepare for the PSAT and SAT tests. By the end of their sophomore year, students complete a research paper utilizing MLA formatting and deliver a short formal speech corresponding to their research paper.

Course: **English 2 Concepts** Relative Value: Table I
Credit: 1.0
Pre-Requisite: English 1 or English 1 Concepts

This course will place a greater emphasis on basic writing and reading skills, accommodating the individual student. Included in the curriculum are novels, plays and a collection of short stories, poems and non-fiction works. Vocabulary and writing skills are emphasized at this level. Grammar and usage are incorporated into the Collins Writing Program. At least two novels and one play are studied.

Course: **Honors English 2** Relative Value: Table III
Credit: 1.0
Pre-Requisite: Department Recommendation

Honors English 2 consists of a more advanced study of the short story, the novel, drama, poetry and non-fiction works. A genre approach is used with respect to the study of literature. The honor students read a minimum of four novels and four plays, two of which are Greek dramas and one Shakespearean play. Students are expected to read independently. Students are also required to recite a passage from a Shakespearean play. The sophomore honor students continue to develop their writing skills through the Collins Writing Program introduced to them freshman year. Grammar and usage are incorporated into this writing program. A study of vocabulary continues throughout the school year as students prepare for the PSAT and SAT tests. By the end of their sophomore year, students complete a research paper utilizing MLA formatting and deliver a short formal speech corresponding to their research paper.

Course: **English 3** Relative Value: Table II
Credit: 1.0
Pre-Requisite: English 2

The English 3 course is a comprehensive chronological study of American literature, from the European settlement of America to the 21st century, within the genres of poetry, drama, the short story, the novella, and the novel. Non-fiction works, including sermons, speeches, letters, journals, and essays, will also be introduced. Students will begin to engage in a greater questioning of literature and will study literary elements including figurative language, mood, imagery, symbolism, and tone. Composition, including a research paper, is also a major component of the course and the Collins Writing program will be implemented.

Course: **Honors English 4** Relative Value: Table III
Credit: 1.0
Pre-Requisite: Department Recommendation

The Honors English 4 course is a comprehensive chronological study of British literature, from the Anglo-Saxon period to the Modern era, within the genres of poetry, drama, and the novel. Informational texts will also be introduced. Students will begin to engage in a greater questioning of literature and will study literary elements including figurative language, mood, imagery, symbolism, and tone. Composition, of various lengths and time frames, including a research paper, is also a major component of the course.

Course: **Advanced Placement English Literature and Composition** Relative Value: Table IV
Credit: 1.0
Pre-Requisite: Department Recommendation

The Advanced Placement English Literature and Composition course engages students in the careful reading and critical analysis of literature. Through the close reading of selected works students will deepen their understanding of the ways writers use language to provide both meaning and pleasure for their readers. As they read, students will consider a work's structure, style, and themes as well as other elements including figurative language, imagery, symbolism, and tone. This course follows the nine units prescribed by the College Board, which includes studies of short fiction, long fiction (including novels and play), and poetry. Compositions include monthly writings on literary topical genres typical of the expectations of college freshmen as well as essays that mimic what students will experience on the AP English Literature and Composition exam in May.

Course: **Advanced Placement English Language and Composition** Relative Value: Table IV

Credit: 1.0

Pre-Requisite: Departmental Approval

This AP English Language and Composition course aligns to an introductory college-level rhetoric and writing curriculum, which requires students to develop evidence-based analytical and argumentative essays that proceed through several stages or drafts. Students will also evaluate, synthesize, and cite research to support their arguments in a variety of speeches. Throughout the course, students develop a personal style by making appropriate grammatical choices. Additionally, students read and analyze the rhetorical elements and their effects in non-fiction texts, including graphic images as forms of text, from many disciplines and historical periods.

Course: **Creative Writing** Relative Value: Table II
Credit: 0.5
Pre-Requisite: None

Subject writing based on investigating and reporting whereas Creative Writing has solid roots in a writer's real-world experiences and memories. Both writing styles are fundamental in journalism. Students participating in this elective will develop their writing skills through weekly journal assignments and classroom editing. Students can expect project-based assignments. They will create their own poetry, short stories, children's book, and essays throughout the year.

Course: **Literature to Film** Relative Value: Table II
Credit: 1.0
Pre-Requisite: None

The Literature to Film course offers a look at various works of literature (including novels, novellas, short stories, and children's literature) and the relationship between those works and the films that they have inspired. Students will have a chance to view black and white films, color films, and animated works (including traditional animation and stop-motion animation). Literature to Film is an English elective that meets three days out of the six-day cycle.

Course: **Introduction to Film** Relative Value: Table II
Credit: 1.0
Pre-Requisite: Department Recommendation

The Introduction to Film course is designed to draw awareness to the genre of film as a form of modern day literature. Careful consideration has been taken to ensure that the works studied are important works of film. Additionally, students will study a variety of scripts, storyboards, and screenplays for writing technique and analysis. Students will observe, analyze and evaluate a variety of pivotal movies over the course of the year. A sample syllabus may contain *Life is Beautiful* (Elie Weisel's *Night*), *Casablanca*, *Citizen Kane*, *On the Waterfront*, *The Philadelphia Story*, *Toy Story*, *Beauty and the Beast*, *Star Wars*, *The Maltese Falcon*, *Rear Window*, *The Wizard of Oz*, *High Noon*, *Stagecoach*, *Oklahoma!*, *Chicago*, *Meet Me in St. Louis*, *The Pride of the Yankees*, *We Are Marshall*, *Remember the Titans*, *Adam's Rib*, *Fantasia*, *Shrek*, *Cinderella*, *It Happened One Night*, *Singin' in the Rain*, *Vertigo*, *Mr. Smith Goes to Washington*, *Raiders of the Lost Ark*, *The Last Crusade*, and *The Sixth Sense*.

Course: **Critical Reading** Relative Value: Pass/Fail
Credit: 0.5
Pre-Requisite: None

Students will be introduced to the idea of reading as a process with different strategies used before, during, and after reading. Students will learn how to critically read many different kinds of text, including short stories, poems, plays, and nonfiction. Textbook selections from other subject areas will be studied as well. An emphasis will also be placed on reading in the everyday world by using current articles from newspapers and magazines. A study of prefixes, suffixes, and word roots will be ongoing.

Course: **The Write Way: Grammar and Usage** Relative Value: Table II
Credit: 0.5
Pre-Requisite: None

This elective is intended for college-bound students who are interested in honing their composition and oral skills by learning the requisites of the English language. Students will gain a practical understanding of grammar governing syntax, sentence structure and mechanics. Students will be expected to write a variety of short assignments.

Course: **Latin 1**
Credit: 1.0
Pre-Requisite: None

Relative Value: Table II

The first course in Latin involves basic grammar, vocabulary, derivatives, translation, and culture. The declensions, conjugations, and rules of grammar are drilled thoroughly so that students may recognize basic grammatical constructions in Latin, as well as in English and in foreign languages. Vocabulary building is stressed both for reading selections in Latin and for increasing word power in English through derivatives. The story of Aeneas and other miscellaneous selections, written in simple Latin, are translated into English throughout the year. Latin abbreviations and expressions using in English are presented to help students recognize and appreciate interesting and useful proverbs, mottos, and sayings used in the modern world. Elements of day-to-day Roman culture (e.g., parts of the house, gods and goddesses, Roman numerals) are also studied. Students will take the National Latin Exam during this course.

Course: **Latin 2**
Credit: 1.0
Pre-Requisites: Latin 1 and Department Approval

Relative Value: Table II

The second year student translates a choice of readings, which are graduated in difficulty. These include selections from the following: The Timeline Labors of Hercules, Julius Caesar's Commentaries and Ovid's *Metamorphoses*. In addition to a systematic review of first year grammar, more involved grammatical constructions are represented and drilled to facilitate the reading of the Latin authors. Drill in vocabulary and English derivatives is continued in order to build word power. Latin expressions used in English are presented to help the modern reader appreciate and cope with interesting and useful maxims, proverbs and terms used in law. In addition, medical and pharmacological abbreviations are included to provide students with advantage in competitive medical studies. Students will take the National Latin Exam during this course.

Course: **Honors Latin 3**
Credit: 1.0
Pre-Requisites: Latin 2 Teacher Recommendation and Department Approval.

Relative Value: Table III

Third year Latin is designed to take the student beyond the elementary level of reading and understanding Latin literature. Latin 3 focuses on Cicero's orations and letters with special attention to Cicero's rhetorical devices, the importance of the study of rhetoric in ancient times, and a typical outline of a classical oration. There is complete review of Latin forms, syntax and vocabulary needed for mastery during first, second and third years of high school Latin. Latin 3 also presents a rich variety of further Latin readings. Selections from Pliny, Ovid and post-classical Latin round out the content of third year Latin. Latin expressions used in English are presented to help the modern reader appreciate and cope with interesting and useful maxims, proverbs and terms used in law. In addition, medical and pharmacological abbreviations are included to provide students with advantage in competitive medical studies. Students will take the National Latin Exam during this course.

Course: **Honors Latin 4** Relative Value: Table III
Credit: 1.0
Pre-Requisites: Latin 3 Teacher Recommendation and Department Approval.

Fourth year Latin is designed for a course in the reading of Latin poetry. Latin 4 focuses on Vergil's *Aeneid* with special attention to Latin verse, rules of scansion, figures of speech, grammatical constructions common in Latin poetry and vocabulary needed for understanding poetry. Selections from Ovid, Catullus, Horace and Martial illustrate the range in subject, mood, meter and diction to be found in the Late Republic and Early Empire. Latin expressions used in English are presented to help the modern reader appreciate and cope with interesting and useful maxims, proverbs and terms used in law. In addition, medical and pharmacological abbreviations are included to provide students with advantage in competitive medical studies. Students will take the National Latin Exam during this course.

Course: **Spanish 1** Relative Value: Table II
Credit: 1.0
Pre-Requisite: None

Students develop the ability to communicate about themselves and their immediate environment using simple sentences containing basic language structures. The students will communicate in all four language skills – listening, speaking, reading and writing. Emphasis will be placed on the ability to communicate orally and in writing.

Students will demonstrate an understanding of traditions, customs, beliefs, and cultural contributions and how these relate to the native language. Students will connect information about the language with concepts studied in other subjects. Through the study of language and culture, students will develop insight into their own language and culture. Students may participate in the National Spanish Exam to compete against their peers from all parts of the country. Students will take the National Spanish Exam during this course.

Course: **Spanish 2** Relative Value: Table II
Credit: 1.0
Pre-Requisite: Spanish1

Students will continue to develop proficiency in all language skills – listening, reading, speaking and writing. Emphasis will be placed on the ability to communicate both orally and in writing. More complex sentence and language structures will be utilized. The students will read short stories and produce writing samples.

Students will demonstrate an understanding of traditions, customs, beliefs, and cultural contributions in relation to the native language. Students will connect information about the language with concepts used in other subjects. Through the study of language and culture, students will recognize, compare, and contrast language concepts, and participate in a global community using their language skills to communicate with native speakers. Students may participate in the National Spanish Exam to compete against their peers from all parts of the country. Students will take the National Spanish Exam during this course.

Course: **Honors Spanish 3** Relative Value: Table III
Credit: 1.0
Pre-Requisites: Spanish 2, Teacher Recommendation, and Department Approval.

Students continue to develop and refine proficiency in all four language skills in all four areas: listening, speaking, reading and writing with an emphasis on the ability to interact orally and in writing. They communicate using more complex language structures on a variety of topics. At this level, students comprehend the main ideas of the authentic materials that they read and hear and are able to identify many details when the topics are familiar. Students gain a deeper understanding of the world around them while studying rights and responsibilities, future plans, choices, environment, technology and humanities. Students will take the National Spanish Exam during this course.

The course's primary goals are to:

- Communicate in Spanish;
- Demonstrate an understanding of traditions, customs, beliefs and cultural contributions and how these elements relate to language;
- Be able to acquire information and connect with other disciplines;
- Learn to function in a variety of practical settings using listening, speaking, reading and writing skills as well as knowledge of the target culture;
- Develop insight into English and their own culture;
- Be able to participate in national testing to compete against their peers from all parts of the country;
- Be introduced to vocabulary imbedded in authentic reading materials with a constant review of grammar introduced at all levels and integrated into readings.

Course: **Honors Spanish 4** Relative Value: Table III
Credit: 1.0
Pre-Requisites: Spanish 3, Teacher Recommendation, and Department Approval.

Students develop more sophisticated communication skills in all four areas: listening, speaking, reading and writing with an emphasis on the ability to interact orally and in writing. Authentic reading selections are emphasized at this level. Students communicate using more complex language structures and begin to express abstract ideas.

Students demonstrate an understanding of traditions, customs, beliefs and cultural contributions and how these elements relate to language. They are able to acquire information and connect with other disciplines and learn to function in a variety of practical settings using listening, speaking, reading and writing skills as well as knowledge of the target culture. Students will develop insight into English and their own culture and they will be able to participate in national testing to compete against their peers from all parts of the country. Students will be introduced to vocabulary imbedded in authentic reading materials. A constant review of grammar is introduced at all levels and integrated into readings. Students will take the National Spanish Exam during this course.

Course: **Spanish Language Culture 1** Relative Value: Table I
Credit: 1.0
Pre-Requisite: None

This course introduces and cultivates the Spanish language. Basic everyday vocabulary is introduced through the spoken word while responses to questions are given in Spanish. Composition is also a part of this course.

Course: **Spanish Language Culture 2** Relative Value: Table I
Credit: 1.0
Pre-Requisite: Spanish Language Culture 1

Through the study of language and culture, students will develop insight into their own language and culture. Basic language and grammar is introduced through written and spoken word. Videos, songs, and stories help the students learn of the Hispanic Culture.

Course: **Honors Geometry** Relative Value: Table III
Credit: 1.0
Pre-Requisites: Algebra 1 and Diocesan End-of-Year Algebra Assessment.

This accelerated course is the study of advanced geometric theory and its logical extension to coordinate and transformational geometry. The focus of instruction is development of problem solving strategies and facility in creation of original proofs. All geometric concepts dealing with parallel lines, triangles, quadrilaterals, regular polygons, and circles are studied. Additionally, three-dimensional and coordinate geometry are integrated throughout. An introduction to trigonometry is also included.

Course: **Honors Algebra 2** Relative Value: Table III
Credit: 1.0
Pre-Requisites: Algebra 1 and Department Approval

This course is an in-depth study of algebraic theory. Topics include advanced techniques of factorization, quadratic, polynomial, exponential, logarithmic, rational functions and their graphs. Additionally, emphasis is placed upon inverse and composite functions; the complex number system; the rational root theorem and all applications of synthetic division; sequences, series, sigma notation and applications; fundamental counting principles; permutations and combinations.

Course: **Algebra 2** Relative Value: Table II
Credit: 1.0
Pre-Requisite: Algebra 1

This course is a study of algebraic theory. Topics include the complex number system, linear, quadratic, polynomial, radical, rational functions, systems of equations and inequalities, and continued development of analytical skills through practical applications.

Course: **Honors Pre-Calculus with Trigonometry** Relative Value: Table III
Credit: 1.0
Pre-Requisites: Honors Algebra 2 and Department Approval

Pre-Calculus is an intense, demanding course focused on functions and their graphs. Topics include analytic geometry with emphasis on the theory of equations. Additionally, emphasis is placed upon systems of equations and inequalities, trigonometry and its extensions/applications, and the fundamental notion of a mathematical limit.

Course: **Pre-Calculus with Trigonometry** Relative Value: Table II
Credit: 1.0
Pre-Requisite: Algebra 2

This course focuses on functions and their graphs. Topics include analytical geometry, systems of equations/inequalities, vectors, and the polar coordinate system. Additionally, this course introduces the student to the trigonometric/circular functions, their inverses, and graphs. Directed proofs of trigonometric identities and practical applications of trigonometric theory are integral to this course.

Course: **Honors Finite Mathematics with Statistics** Relative Value: Table III
Credit: 1.0
Pre-Requisites: Honors Pre-Calculus with Trigonometry and Department Approval.

This course is the traditional post-secondary math requirement for first year college students majoring in business or the social, behavioral, biological sciences. Fundamental themes include linear systems, linear programming, operations with/applications of matrices, mathematics of finance, number theory and counting techniques, probability and statistics, and logic. Practical applications are a primary focus.

Course: **Consumer Math Concepts** Relative Value: Table I
Credit: 1.0
Pre-Requisites: Concept Level Mathematics Courses

This course is designed for seniors and includes a review of basic computations; estimations; and operations of real numbers. Topics include essential consumer topics related to housing and personal finance.

Course: **Critical Math** Relative Value: Pass/Fail
Credit: 0.5
Co-Requisites: Critical Reading and Algebra 1A Concepts

This course reviews and reinforces the math skills needed for solving various types of problems. Opportunities are provided for regular drill in fundamental arithmetic operations.

Course: **Biology**
Credit: 1.0
Pre-Requisite: Physical Science

Relative Value: Table II

Biology is the study of living things. Its primary purpose is to relate to and develop an appreciation of and respect for all living things. All levels of biological organization are discussed from the molecule through cells, tissues, organs, individuals, populations, species, communities and the world biome. Major topics include: scientific method, cell structure and function, genetics, evolution, classification, and the diversity of life. Laboratory work is an essential component of the curriculum. This Biology course is recommended for college-bound students and is required for a career in science, nursing, medicine and related fields.

Course: **Honors Biology**
Credit: 1.0
Pre-Requisites: Recommendation of Physical Science teacher and Department Approval.

Relative Value: Table III

Biology is the study of living things. Included in this course is a study of life systems and the dissection of various representative classes of animals. All levels of biological organization are discussed from the molecule through cells, tissues, organs, individuals, populations, species, communities and the world biome. In addition, a variety of research projects as well as scientific articles are assigned to encourage students to read and to further challenge the more gifted student. Placement in this course is based on teacher recommendation and performance in the freshman year. Laboratory work is an essential component of the curriculum. A research project will be required.

Course: **Honors Biology 2**
Credit: 1.0
Pre-Requisites: Honors Biology and/or Honors Chemistry and Department Approval

Relative Value: Table III

Honors Biology 2, an advanced science elective, introduces new topics that are a continuation of Honors Biology. Because this class emphasizes depth of understanding, a limited number of topics are selected for study. Examples of course material include, but are not limited to, biochemistry, animal behavior, evolutionary biology, genetics, and structure and function of organisms. Scientific articles from a variety of sources and special projects are used to enrich the course. Laboratory work is an essential component of the curriculum. This class is recommended for students who are interested in a major in the life sciences or have an interest in specific biological concepts. Students are required to work at an accelerated pace, utilize higher level thinking skills, and submit high quality work.

Course: **Advanced Placement Biology** Relative Value: Table IV
Credit: 1.0
Pre-Requisites: Honors Biology or Biology. Concurrent enrollment in Honors Chemistry or Honors Physics and Department Approval.

Advanced Placement Biology is designed to meet rigorous national academic standards aimed at teaching high school biology at a collegiate level, while improving the students' critical thinking and analytical problem solving skills. It places emphasis on organic chemistry, molecular biology, cytology, genetics, biotechnology, population genetics, phylogeny, gene regulation, embryology, immunology, and neurology.

The course is fast-paced and requires students to be extremely self-motivated, so it is necessary for students to complete work outside the standard class time. This includes preparatory work over the summer. A test will be given during the first week of school on the independent summer coursework. All students who enroll in this course are required to take the Advanced Placement exam in May which at some institutions may be used for college credit. The course is geared for college-bound students planning to pursue a science career, such as one in medicine, biotechnology or research.

Course: **Chemistry Concepts** Relative Value: Table I
Credit: 1.0
Pre-Requisite: Biology or Biology Concepts

Chemistry Concepts introduces the student to the concepts and laws of chemistry and their application to real life experiences. The fundamentals of matter, its composition, and reactions are explored. Laboratory work is an essential component of the curriculum.

Course: **Chemistry** Relative Value: Table II
Credit: 1.0
Pre-Requisites: Algebra 2 or concurrent enrollment in Algebra 2 and Department Approval.

Chemistry is a physical science dealing chiefly with the microstructure of matter and all aspects and implications of the structure. Chemistry introduces the student to the mathematical analysis and the verification of the concepts and laws of chemistry. The principle of atomic structure is used to explain the differences occurring in the various types of matter and the changes in composition that matter can undergo. Some course topics included are: the gas laws, nuclear chemistry, the mole concept, carbon chemistry, the modern theories of acids and bases and different types of chemical reactions. Laboratory work is an essential component of the curriculum. Chemistry is necessary for anyone planning careers in science, medicine, nursing, engineering and related fields. A calculator is required.

Course: **Honors Chemistry** Relative Value: Table III
Credit: 1.0
Pre-Requisites: Recommendation of Honors Biology teacher and Department Approval, Honors Algebra 2 or concurrent enrollment in Honors Algebra 2

Chemistry is a physical science dealing chiefly with the microstructure of matter and all aspects and implications of the structure. The principle of atomic structure is used to explain the differences occurring in the various types of matter and the changes in composition that matter can undergo. Some course topics included are: the gas laws, nuclear chemistry, the mole concept, carbon chemistry, the modern theories of acids and bases and different types of chemical reactions. Laboratory work is an essential component of the curriculum. A research project will be required. Students are required to work at an accelerated pace, utilize higher level thinking skills, and submit high quality work. A calculator is required.

Course: **Honors Chemistry 2** Relative Value: Table III
Credit: 1.0
Pre-Requisites: Honors Chemistry, Concurrent Enrollment in Honors Physics and Department Approval.

This advanced course is a comprehensive study of the laws, theories and principles of chemistry, emphasizing problem-solving techniques. The major topics covered in this course are molecular structure, thermochemistry, reaction spontaneity, equilibrium, chemical kinetics, oxidation-reduction reactions and solubility prediction. This course uses a college level textbook and requires independent student work. Students are required to work at an accelerated pace, utilize higher level thinking skills, and submit high quality work. A calculator is required.

Course: **Physics Concepts** Relative Value: Table I
Credit: 1.0
Pre-Requisites: Chemistry or Chemistry Concepts

Physics Concepts is a course that places primary emphasis on the study of matter-energy relationships through words rather than mathematical relationships. This course will help students to appreciate the world around them through the study of fundamental physical laws. The topics covered include linear motion, sound, light, two-dimensional motion, Newton's Laws of Motion, impulse and momentum, energy, wave motion and electricity. Laboratory work is an essential component of the curriculum.

Course: **Physics** Relative Value: Table II
Credit: 1.0
Pre-Requisites: Chemistry and Department Approval
Pre-/Co-Requisite: Pre-Calculus and Trigonometry

Physics is a study of the physical world as seen through matter-energy relationships. This classical approach to the study of physics acquaints students with the fundamental physical laws and enables development of logical thought processes. This course is designed to help students think and analyze problems in the real world. This physics course will cover measurement, linear motion, two-dimensional motion, sound, light, Newton's Laws of Motion, impulse and momentum, energy, wave motion, and electricity. Vectors are used in certain subject areas. Laboratory work is an essential component of the curriculum. A calculator is required.

Course: **Honors Physics** Relative Value: Table III
Credit: 1.0
Pre-Requisites: Honors Chemistry and Department Approval.
Co-Requisites: Pre-Calculus and Trigonometry, Honors Calculus, A.P. Calculus or Honors Finite Mathematics with Statistics

Physics is a study of the physical world as seen through matter-energy relationships. This classical approach to the study of physics acquaints students with the fundamental physical laws and enables development of logical thought processes. This course is designed to help students think and analyze problems in the real world. This physics course will cover measurement, linear motion, two-dimensional motion, sound, light, Newton's Laws of Motion, impulse and momentum, energy, wave motion, and electricity. The use of vectors is extensive. Laboratory work is an essential component of the curriculum. A calculator is required. The Honors students will be required to design projects pertinent to the concepts presented in this class. A research project will be required. Students are required to work at an accelerated pace, utilize higher level thinking skills, and submit high quality work.

Course: **Honors Anatomy and Physiology** Relative Value: Table III
Credit: 1.0
Co-Requisites: Concurrent Enrollment in Honors Chemistry, Chemistry, Honors Physics or Physics and Department Approval.

Honors Anatomy and Physiology is designed for students who are interested in a career that involves study of the structure and function of the human body. The focus of this course is on the relationship between structures and their functions as each system is presented. Laboratory work is an essential component of the curriculum. Students will dissect a variety of preserved specimens, conduct physiology experiments, and examine objects under the microscope. Scientific articles are utilized to discuss current research information as well as historical information. Students are required to work at an accelerated pace, utilize higher level thinking skills, and submit high quality work. Special projects may be assigned. This course is highly recommended for college-bound students contemplating a career as a biologist, physician, physical therapist, pharmacist, or a myriad of other professions requiring extensive knowledge of the human body.

Course: **Human Anatomy** Relative Value: Table II
Credit: 1.0
Pre-Requisite: Biology

Human Anatomy is designed for students who are interested in a career that involves the structure and function of the human body. The emphasis for this course is the anatomy of the human body. Some attention will be given to human physiology. Laboratory work is an important component of the curriculum. Students will examine a variety of preserved specimens and examine objects under the microscope. Scientific articles are utilized to discuss current research information as well as historical information. Special projects may be assigned. This course is recommended for students contemplating a career in the sciences, especially a medically-related field.

Course: **Environmental Science** Relative Value: Table II
Credit: 1.0
Pre-Requisites: Biology and Concurrent enrollment in Chemistry or Physics

This interdisciplinary class is of special interest to the student who is interested in environmental issues. The history of environmental science, major concepts in environmental science, and current topics are the focus of the course. Scientific articles from a variety of sources are used to enrich the curriculum. Laboratory work and special projects enhance the curriculum. This course is recommended for college-bound students who anticipate a career in the sciences as well as those with a specific interest in environmental science. Local environmental issues will be examined.

Course: **Forensic Science** Relative Value: Table II
Credit: 0.5
Pre-Requisites: Biology and Concurrent enrollment in Chemistry or Physics

Forensic science is a quickly growing and competitive field. Forensic science will focus on the crime scene, trace evidence (e.g., DNA fingerprinting), document analysis, entomology, forensic anthropology, and portrayal in the media. Laboratory work is an essential component of the curriculum. This course is intended for college bound students who anticipate a career in science as well as those with a special interest in forensic science.

Course: **World History 2** Relative Value: Table II
Credit: 1.0
Grade Level: Juniors

World History 2 will focus on the rapid economic, political, and social changes in the world. It will cover the period from the Renaissance to the present. This course will emphasize the world's involvement and participation in global conflicts and limited wars. Additionally, the students will be responsible for analyzing current events, evaluating the changes that occurred in the 20th century and how they affect our world today, and assessing their impact on current and future societies.

Course: **Honors World History 2** Relative Value: Table III
Credit: 1.0
Pre-Requisite: Department Approval.

Honors World History 2 offers a comprehensive study of World History from the Renaissance to the present. This course will focus on selected topics, such as the cultural contributions of specific groups in history (i.e. religious, social, fundamentalist, etc.). Additionally, the students will be responsible for analyzing current events, evaluating the changes that occurred in the 20th century and how they affect our world today, and assessing their impact on current and future societies. Acceptance into this course is based on academic achievement, high level of interest, and teacher recommendation.

Course: **American Government** Relative Value: Table II
Credit: 1.0
Pre-Requisite: US History 2

American Government will mainly focus on the workings of our government and the concepts of our democracy as established in the U.S. Constitution from its foundation to its ever-changing present. Students in this course will study about the activities and composition of the three levels of government as well as the branches of government. Other issues, such as voting, non-voting, the formation and roles of political parties and the issues and candidates concerning local, state, and national elections, will also be studied. Additionally, international events and issues as they relate to U.S. policy will be examined and discussed as these events unfold.

Course: **Honors American Government** Relative Value: Table III
Credit: 1.0
Pre-Requisites: US History 2 and Department Recommendation

Honors American Government will mainly focus on the workings of our government and the concepts of our democracy as established in the US Constitution from its foundation to its ever-changing present. Students in this course will study about the activities and composition of the three levels of government as well as the branches of government. Students will learn the rights and responsibilities of citizenship. Other issues, such as voting, non-voting, the formation and roles of political parties and the issues and candidates concerning local, state, and national elections, will also be studied. Additionally, international events and issues as they relate to US policy will be examined and discussed as these events unfold. Other skills that will be enhanced, include (but are not limited to) data interpretation and analysis of primary documents.

Course: **A.P. United States History** Relative Value: Table IV
Credit: 1.0
Pre-Requisites: Honors World. History 2 and Department Approval.

Advanced Placement U.S. History is offered to select students in the senior Social Studies program. Students will engage in an outlined course of study emphasizing the nineteenth and twentieth centuries through considerable classroom time spent mastering techniques of essay writing and analyzing historical documents. The students will describe the major political, economic, social, literary, and cultural history of the United States by the following frames:

- Period 1: 1491 – 1607
- Period 2: 1607 – 1754
- Period 3: 1754 – 1800
- Period 4: 1800 – 1848
- Period 5: 1844 – 1877
- Period 6: 1865 – 1898
- Period 7: 1890 – 1945
- Period 8: 1945 – 1980
- Period 9: 1980 - Present

An examination using the standard test from the Advanced Placement Program will be given in May. Participating students must take the A.P. Examination upon completion of the course. This evaluation score can qualify the student for undergraduate college credit.

Course: **A.P. U.S. Government and Politics** Relative Value: Table IV
Credit: 1.0
Pre-Requisites: Department Approval

AP United States Government and Politics is an elective that will give students an analytical perspective on government and politics in the United States. This course includes both the study of general concepts used to interpret U.S. government and politics and the analysis of specific examples. It also requires familiarity with the various institutions, groups, beliefs, and ideas that constitute U.S. government and politics. Students will be expected to become acquainted with the variety of theoretical perspectives and explanations for various behaviors and outcomes.

Course: **Modern American History** Relative Value: Table II
Credit: 1.0
Pre-Requisites: US History 2, American Government, and World History
Senior requirement for non A.P. students.

The purpose of this course is to expand on US History 2. The course will examine 20th and 21st century US History. Great emphasis will be placed on the presidencies of the era, as well as major events and current affairs. Areas of study include: The Cold War; The Korean Conflict; The UN; Vietnam; Civil Rights Movements; The Middle East; America and the World.

Course: Honors **Modern American History** Relative Value: Table III
Credit: 1.0
Pre-Requisites: US History 2, American Government, Honors World History, and Department Recommendation

The purpose of this course is to expand on US History 2. The course will examine 20th and 21st century US History. Great emphasis will be placed on the presidencies of the era, as well as major events and current affairs. Areas of study include: The Cold War; The Korean Conflict; The UN; Vietnam; Civil Rights Movements; The Middle East; America and the World. The Honors class will include a more in-depth look at the topics using document analysis and a variety of research and writing skills.

Course: **Criminal Law** Relative Value: Table II
Credit: 0.5
Pre-Requisite: None

This course is designed to assist students with identification of criminal behaviors and activities. The course defines crime and helps students to classify the different categories of crimes. Students will also examine the philosophies of criminals and identify causes and effects of crime on individuals and society. This course will also identify the individual rights of the accused and the constitutionality of crime and criminals.

Course: **Psychology** Relative Value: Table II
Credit: 0.5
Pre-Requisite: None

Psychology is an elective course that surveys the science of psychology, its theoretical foundations, and practical applications. The areas surveyed include motivation, emotion, learning, sensation and perception, personality, social behavior and techniques of measurement and developmental psychology. It includes both individual and group activities.

Course: **Sociology** Relative Value: Table II
Credit: 0.5
Pre-Requisite: None

Sociology emphasizes learning through inquiry requiring a high level of student participation. Students study the elements of sociological theory and the elements of social research while investigating the various societies, their customs, cultures, institutional roles, and social problems such as: poverty, racism, drugs, delinquency, alcoholism, child abuse, and teenage suicide. Role-playing is encouraged.

Course: **World Geography and International Relations** Relative Value: Table II
Credit: 1.0
Pre-Requisite: None

Through this course, students gain a greater awareness of the world community in which they live. The content focuses on the physical, cultural and economic geography of various nations in Europe, Asia, South America, North America and Africa, as well as emphasizing map skills and general geographic concepts and themes. This course will also examine political and economic systems throughout the world. This course will examine world relations, focusing on areas of conflict and turmoil.

THEOLOGY DEPARTMENT

Overview

The secondary Religious Education Program seeks to form the whole Christian person in an integrated faith life within the Church community by interweaving the four components of catechesis: word, worship, community, and service. First, young people develop their understanding of the **Catholic tradition** through the study of content of the Church's faith.

Second, the Secondary Religious Education Program acknowledges the tremendous need for the accompanying spiritual development of the teen. Students integrate the knowledge gained about the Church's faith with their own lived religious experience. They are invited to participate in various forms of prayer and worship that are essential to the life of a believer. Young people encounter the Scriptures not simply as a textual object for study but as the living word.

Third, the young person's commitment to God in faith finds expression in a corresponding commitment to the **community of the church**. In the Church's ministry to young people in the Religious Education Program, the students may recognize their own vital place within the community of disciples. They are welcomed, valued, supported, and guided.

Finally, young people are initiated into the gospel mandate of **service to others**. Teachers present love of neighbor not so much as a command, but as a way of life. The communion with God overflows into action in the service of others, particularly those most in need. Secondary students engage in service hours as a necessary component of their progress in the program.

Christian Service

Relative Value: Pass/Fail

To be a student at Holy Cross High School is to make a positive commitment to serve others. This is the gift and responsibility of every Christian. Holy Cross High School recognizes this call to serve as a vital element in the student's growth in faith.

All students are required to participate in the service program sponsored by Holy Cross High School. This program reaches out to 1) the school community; 2) the parish community; 3) the local civic community; and 4) the global community. Underclassmen are required to complete twenty (20) hours of service during each year as part of this structured service program. Seniors are required to complete forty (40) hours of service.

REQUIREMENTS:

A designated Bible must be purchased through the 9th Grade Theology class. The Bible will be used for four (4) years of study.

Course: **Theology 1**
Credit: 1.0
Pre-Requisite: None

Relative Value: Table III

Theology 1 is divided into two parts: The Revelation of Jesus Christ in Scripture and Who is Jesus Christ?

The Revelation of Jesus Christ in Scripture

The purpose of this course is to give students a general knowledge and appreciation of the Sacred Scriptures. Through their study they will come to encounter the living Word of God, Jesus Christ. In the course they will learn about the Bible, authored by God through Inspiration, and its value to people throughout the world. They will learn how to read the Bible and will become familiar with the major sections of the Bible and the books included in its section. The student will pay particular attention to the Gospels where they may grow to know and love Jesus Christ more personally.

Who is Jesus Christ?

The purpose of this course is to introduce students to the Mystery of Jesus Christ, the Living Word of God, the second Person of the Blessed Trinity. In the course the student will understand that Jesus Christ is the ultimate revelation to us from God. In learning about who He is, the student will also learn what He calls them to be.

Course: **Theology 2**
Credit: 1.0
Pre-Requisite: None

Relative Value: Table III

Theology 2 is divided into two parts: The Mission of Jesus Christ (The Paschal Mystery) and Jesus Christ's Mission Continues in the Church.

The Mission of Jesus Christ (The Paschal Mystery)

The purpose of this course is to help students understand all that God had done for us through His Son, Jesus Christ. Through this course of study, students will learn that for all eternity, God has planned for us to share eternal happiness with Him which is accomplished through the Redemption Christ won for us. Students will learn that they share in this Redemption only in and through Jesus Christ. They will be introduced to what it means to be a disciple of Christ and what life as a disciple entails.

Jesus Christ's Mission Continues in the Church

The purpose of this course is to help the student understand that in and through the Church they encounter the Living Jesus Christ. They will understand the fact that the Church was founded by Christ through the Apostles and is sustained by Him through the Holy Spirit. The students will come to know that the Church is the living Body of Christ today. This Body had both divine and human elements. In this course, students will learn not so much about events in the life of the Church but about the sacred nature of the Church.

Course: **Theology 3**
Credit: 1.0
Pre-Requisite: None

Relative Value: Table III

Theology 3 is divided into two parts: Sacraments as Privileged Encounters with Jesus Christ and Life in Jesus Christ.

Sacraments as Privileged Encounters with Jesus Christ

The purpose of this course is to help students understand that they can encounter Christ today in a full and real way in and through the Sacraments, and especially through the Eucharist. Students will examine each of the sacraments in detail so as to learn how they may encounter Christ throughout life.

Life in Jesus Christ

The purpose of this course is to help students understand that it is only through Christ that they can fully live out God's plans for their lives. Students are to learn the moral concepts and precepts that govern the lives of Christ's disciples.

Course: **Theology 4**
Credit: 1.0
Pre-Requisite: None

Relative Value: Table III

Theology 4 is divided into two parts: Sacred Scripture and The History of the Church

Sacred Scripture

The purpose of this course is to give an overview of Sacred Scripture with an introduction to the basic principles for understanding and interpreting the Bible. Because of the extent of the scriptural material, this outline will not try to cover the vast content but rather offer comments about Scripture's purpose and religious significance. Given the limits of a semester of study, it will not be possible to introduce all the books of the Bible. But every effort is made to project a sense of the unity of the narrative for the divine plan of salvation, the presence of God's action in this record of his Revelation, and his desire to share his merciful love with us.

History of the Church

This course presents a catechesis of the Church and the Body of Christ in history: its nature and meaning, images, marks, life and ministry, guide to moral life, and the role of prayer. The purpose of the course is to supply the students with a general knowledge of the Church's history from apostolic times to the present. They will be introduced to the fact that the Church was founded by Christ through the Apostles and is sustained by him throughout history through the Holy Spirit. The students will come to know that the Church is the living Body of Christ today and, as such, has both divine and human elements. In this course, the students will learn about the Church's 2,000 years of history and about how the Church is led and governed by the successors of the Apostles.

Course: **St. Paul: A Man of Letters** Relative Value: Pass/Fail
Credit: 0.5
Pre-Requisite: None

This elective course will give the students a thorough knowledge of the life and letters of St. Paul. Particular focus will be placed on Romans I and II, Corinthians and Galatians. Students will receive a detailed understanding of issues such as authorship and inspiration. Topics such as salvation, suffering and other major theological issues will also be covered in detail.

Course: **Awaken to Prayer** Relative Value: Pass/Fail
Credit: 0.5
Pre-Requisite: Department Approval

In this elective course, students will “experience” the meaning of prayer. What is prayer? How can I pray? The course will include an overview of the classic texts of Catholic spirituality and prayer, the prayer of the saints, the use of scripture for prayer, meditation, and contemplation. The elective will explore the Mass, Liturgy of the Hours, *Lectio Divina* the *Our Father*, litanies, conscious breathing and mindfulness, and centering prayer. No text is required other than the students’ copies of *The New American Bible*.
