## What to think about when planning your event

To plan on what size tent you need here's a helpful tip. For the average wedding or party, plan on 10 square feet per person. This means for a 20' by 30' tent, you have 600 square feet under roof. Which will comfortably accommodate 64 people. That means you need 64 chairs, and 8 tables. Our tables are either 8 ft rectangle or 5 ft round, which both will accommodate 8 people per table.

Allow for extra room when providing a buffet style meal. Or, simply add another tent for the buffet.

Is your event going to last until after sunset? Don't forget the lights. We have lights available for rent, or use your own. Either way, we can make the set up simple for you.

We set up tents every weekend from May thru September. We've seen it all.

**40' x 60' Wedding Tent \$2,500**
