ABOUT US

New Wave Innovation's goal is to make your car wash more efficient in operation by producing equipment and products that are cost effective and practical. The high cost of maintenance and equipment for the industry demands a sensible approach. Our products reduce operational cost, allowing you to maximize your profits.

We have found that chemical use in car washes has run rampant with excess waste. It is our goal to reduce this problem, increase your profits and reduce the impact on the environment at the same time.

APPLICATORS	4
EASY CLEAN GENERATOR	10
ELEPHANT EAR FOAMERS	14

Cyclone

Rope ribbon applicator. Creates rope like droplets onto the vehicle. Creates a great show with up to 6 colors coming from the applicators. Our unique mounting system allows you to add additional applicators or lights right with the Cyclone in one easy system.

Cyclone 1-3 color rain with mount
Product Code: CYC-1MK

Cyclone 1-6 color rain with mount
Product code: CYP-1MK

Cyclone Rain Bar with mount, no generators
Product code: CYR-1MK

Cyclone/Evolution Standard Mount
Product Code: CYC/EVO-MK

^
< 1-3 color rain with mount
Product Code: CYC-1MK

Evolution

Sheet foam applicator. The wall of Foam! Can be used as a single color, tri-color or 6 color applicator. Using our unique mount you can add lights, a pre or follow up applicator. Great use for hot wax as you can use a secondary chemical right behind it.

1-3 Color Sheet with Mount
Product Code: EVO-1MK

Evolution Plus up to 6 color sheet with mount
Product code: EVP-1MK

Evolution Sheet Waterfall with mount
Product Code: EVR-1MK

1-3 Color Sheet with Mount
Product Code: EVO-1MK >

Cyclone/Evolution Standard Mount
Product Code: CYC/EVO-MK

Cyclone/Evolution Extended mounts

Extended mount
to be able to attach a light and/or an applicator to the mount.
Product Code: CYC-LMK

Extended mount
to be able to attach a light and/or 2 applicators to the mount.
Product Code: CYC-ELMK

Rinse Bar with Proportioning Valves

92" long. Micro machined holes are distributed every 1/2". Feed by proportioning valves on either side of the applicator.

Rinse Bar with Proportioning Valves and mount

Product Code: RSB-1MK

Three Hole Rinse Bar with Proportioning Valves and mount

Product Code: RSB-3MK

Rinse Bar with Proportioning Valves and mount

Product Code: RSB-1MK

Foaming Rain Bar

Mega-Top Stick Uses a 1-inch pipe to help balance out flow of chemical. Uses 1 inch spaced machined holes. At 92" it can cover the largest of vehicles. Uses 2 gens, one on each side to create great foam across the whole length.

Foaming Rain Bar with mounts

Product Code: FRB-1MK

Total Body Applicator

Is a unique applicator for putting on sealants and wax-es. Doesn't apply excessive amount but an evenly applied amount. Uses a top stick built with two wings that are adjustable so that you can control where your side chemicals are placed.

Total Body Applicator with mounts

Product Code: TBA-1MK

Top Sealer Arch

Top applicator with curved wings so that it can put on a chemical application that will flow down the side easily for friction wash. Best applications are extreme waxes, 2nd finish products after detergents.

Top Sealer Arch with Generators & Mount

Product Code: TSA-1MK

Top Sealer Arch Mounting Kit Only

Product code: TSA-MK

Top Sealer Arch with Generators & Mount
Product Code: TSA-1MK

Mirror Rinse Wands

2 styles: Diaphragm check valves on valve bodies with nozzles. These can be interchanged with any style of nozzle you would like or machined holes using micro bits to minimize the amount of pressure needed. Includes set of two with custom mount that allows full rotation of the wands so that you can aim them where you need.

Mirror Rinse Wands diaphragm check valves with nozzles style includes set of two with mounts

Product Code: MRD-2MK

Mirror Rinse Wands machined holes style set of two with mounts

Product Code: MRT-2MK

Bumper Bug Applicator

Mini generator with a floor mount. Applies bug juice automatically to the bumper without the need to use a wand in the prep area.

Bumper Bug Applicator with mount

Product code: MSN-1MK

Bumper Bug Applicator with mounts set of two

Product code: MSN-2MK

Bumper Bug Applicator with mounts set of two
Product code: MSN-2MK

Mirror Rinse Wands diaphragm check valves with nozzles style includes set of two with mounts

Product Code: MRD-2MK

Mirror Rinse Wands machined holes style set of two with mounts

Product Code: MRT-2MK

Turbo Rinse Blaster Side Set

Unique applicator where the nozzles are saddled banded w/check valves. The location of the nozzles are spiraled machined down the applicator at 5 degree rotations. This allows the top nozzle to apply, then the next nozzle sprays a few inches further down the tunnel amplifying the rinse down, and so on. These work best on short tunnels, or where drip space is limited and maximum rinse is needed in the shortest time.

Turbo Rinse Blaster Side Set with Mounts Driver Side

Product Code: TRB-2MKD

Turbo Rinse Blaster Side Set with Mounts Passenger Side

Product Code: TRB-2MKP

Turbo Rinse Blaster Set- Two Side and One Top Rinse Blaster Driver with Mounts

Product Code: TRB-3MKD

Turbo Rinse Blaster Set - Two Side and One Top Rinse Blaster Passenger with Mounts

Product Code: TRB-3MKP

PreSoak Set

The PreSoak Set includes 2 Foam Sticks and a Top Stick with mounts for maximum coverage.

PreSoak Set includes two Foam Sticks and one Top Stick with generators and mounts

Product code: PSS-3MK

See pages 18 & 19 for pictures

Halo Arch Set

Round radius that replaces the stainless steel rain bars and gives you a centered generator for easy cleaning. Can be combined together to create applications such as tri-color.

Halo Arch Set with Generators

Product Code: HALO-2

Halo Arch Set with Generators and Mounting Kit

Product Code: HALO-2MK

Halo Arch Mounting Kit only

Product Code: HALO-MK

Top Turbo Rinse Blaster

3 nozzles on each side from center point. Each uses a rotation of 5 degrees from the previous nozzle. This allows a cascading flow of water to amplify the flow of water, maximising the removal of excess chemicals and soap.

Top Turbo Rinse Blaster with mount

Product Code: TTRB-1MK

Rinse Aid Manifold Set

Top manifold with our 5 side manifold set. A complete total application of your non-foaming chemicals in one applicator.

Two Side Manifolds with check valves and Top Manifold with Mounts

Product Code: RAS-3MK

Triple Halo Arch Set

Triple coat set version of the Halo Arch Set

Triple Coat Set of the Halo Arch Set

Product Code: HTA-3MK

Half Moon Arch Set

2 piece complete applicator set up for a square frame. Provides easy generator location for cleaning and maximum vehicle coverage with one applicator.

Half Moon Arch Set

Product Code: HMA-2

Half Moon Arch Set with mounts

Product Code: HMA-2MK

Half Moon Arch Mounts only

Product Code: HMA-MK

Triple Color Total Body Applicator

Uses 3 Easy Clean Generators and it will apply a triple coat, one color per side and one on top. They have a variety of positions and are adjustable so that you can fit them into almost any brand of arch.

Triple Color Total Body Applicator with mount

Product Code: TBT-1MK

Top Manifold

Rinse applicator that is mostly used for a drying agent, cold wax, sealing agent. Usually paired with side manifolds. Uses a center pivot point, saddle nozzle mounts so that you can customize the applicator to your needs.

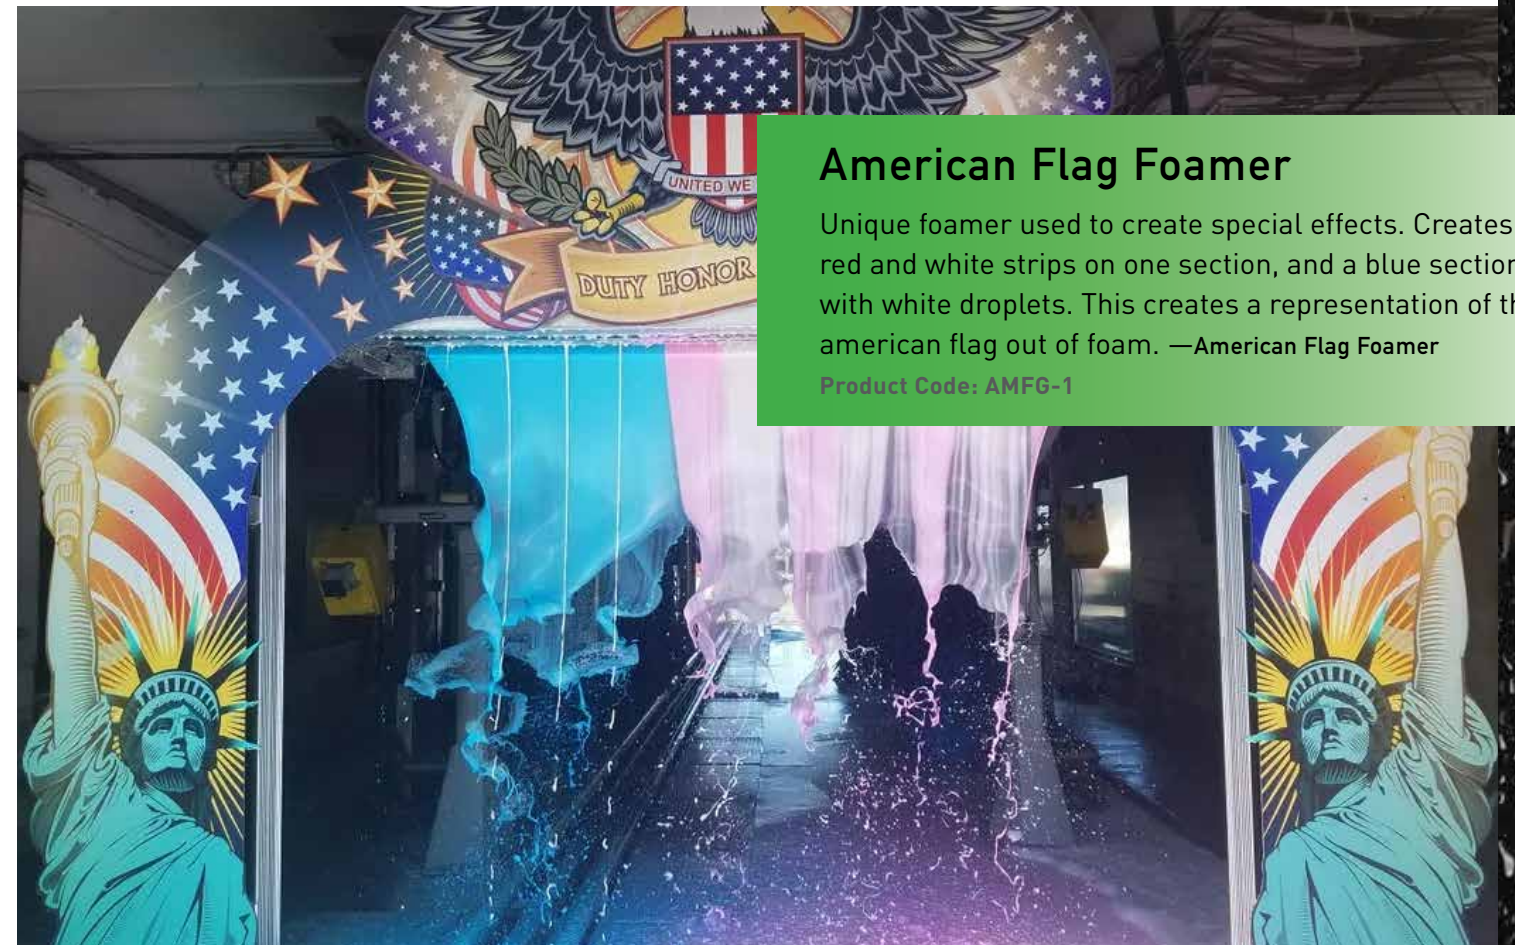

Top Manifold

Product Code: MT6-1MK

American Flag Foamer

Unique foamer used to create special effects. Creates red and white strips on one section, and a blue section with white droplets. This creates a representation of the American flag out of foam. —American Flag Foamer

Product Code: AMFG-1

EASY CLEAN
GENERATOR

Easy Clean Generator

The original revolutionary foam generator that takes the trouble out of cleaning all your chemical application foam generators. The unique features of the Easy Clean Generator will allow you to clean and service your foam generators in seconds, no tools needed. To make the installation a snap each unit comes with direct fit air and chemical fittings and various outlet sizes to fit your applicators.

ELEPHANT EAR FOAMERS

Elephant Ear Foamer

The Elephant Ear Foamer is a versatile chemical applicator that can be used for pre-soak, tunnel foam, protectants, sealants, and any other foam applications. The EEF tube is designed with a unique curve and diffuser to create even consistent foam. Combined with precision machined holes specifically aimed to apply chemical evenly across any vehicle type for maximum clean.

Single Twin Ear
Foamer with
mount

Product Code:
TWF-1MK

Twin Ear Foamer

The Twin Ear Foamer is the most versatile adjustable ear foamer yet. The two ears allow you to control both a front and back application pattern, distance and height as well as forward and rear direction of chemical application. It can be mounted in a variety of positions to allow easy installation to any equipment.

V-jet set of
Elephant Ear
Foamers and
mounts

Product Code:
EVF-2MK

V-jet set of Elephant Ear Foamer

Uses 4 V-jet nozzles with saddle connectors to ensure durability and quality of product. The V-jets create a paint sprayer style coverage, which while producing less foam, provides a controlled and maintained coverage. Amazing as rinse-aid, pre-soak or even triple coat. Nozzles are fully customizable.

V-jet set of Elephant Ear Foamers and mounts

Product Code: EVF-2MK

set with Mount
**Product Code:
QEF-1MK**

Double Coat Set

Hybrid application designed for midsection of tunnel with triple coat & soap set on either side. Is a combination of an elephant ear set and a triple coat set together. Allows you to have a triple coat for high end packages and a basic soap application for low-mid packages mounted in the same area with just one hybrid application system.

Set of 2 Double Elephant Ear Foamers and one Top Ear Foamer With Mounts

Product Code: DCS-3MK

Set of 2 Double
Elephant Ear
Foamers

Top Ear Foamer
With Mounts

Top Stick

Unique design of foam sticks provides exceptional coverage across the top and upper sides of the vehicle. This allows it to meet the expectation of the customer while still providing a lighter spray on the lower sides to result in perfect carry down of chemical and to minimize waste. Centered machined holes are designed to criss-cross their sprays so that maximum chemical is applied to the vehicle regardless if it is a large or small vehicle, reducing waste of chemicals.
