

WATERS LANDING ASSOCIATION, INC.
Qualification Statement for Board of Directors Candidate

Name: Marc A. King

Address: Spinning Wheel Drive, Germantown, Maryland 20874 / Laurel Wood Community – Waters Landing

Have you ever been involved in a Homeowners Association or similar community service organization? If so, describe including positions held & length of service.

I have not been involved with a Homeowners Association in the past beyond the interactions that have occurred over a 30 year period of living in the Laurel Wood Community of Waters Landing. However, during my military career I was from time to time, because of rank and position, required to participate and act in response to the military community that existed in support of the military unit on that installation. The requirements, needs, actions and responses that were required by that community were very similar in nature to the requirements of the Waters Landing community. I believe that this experience coupled with my understanding of the community in which I have now lived for 30 years more than qualifies me for the Director positions.

What background or experience do you have which would qualify you for a Director position (education, Organizations, occupation, attending Waters Landing meetings, etc.)?

I hold a bachelor's degree in History from the University of Nebraska - Omaha and a master's degree in Public Administration with a Major in Urban Development from Western Kentucky University. My organizational experience can be summarized in 23 years of military service in the United States Army with Command and Staff positions from Platoon Leader to Congressional Liaison Officer for the Secretary of the Army. My post military career can be summarized by recognizing over 30 years in the Corporate "E Suite" culminating in the position of President, Ceradyne Armor Systems. In this position I executed over \$2B in armor business with the United States Government as well as a whole host of international customers around the globe. I am a skilled negotiator, organizational expert and public speaker. Additionally, I have been in the unique position of having a broad understanding of both our County and State governments ... how they work and don't work and how they are impacting the lives of those who live in our community.

What are your reasons for seeking nomination to the Board of Directors (goals, ideas, etc.)?

As a member of the community, I am becoming increasingly concerned about issues such as THRIVE MONTGOMERY 2050 and the impact that it can have on our community and our quality of life. I am also concerned about the Counties on going efforts to change the zoning laws that will allow the installation of above ground utilities in our community as a requirement for the installation of 5G telecommunications. There are profound health issues that are just now beginning to be understand associated with the operation of 5G antenna arrays that are installed to close to homes, schools and apartment/ townhome dwellings that have not been addressed by homeowner associations such as ours across Montgomery County.
