Road-Aware

Helping Your Drivers be Safe

Hazardous Geometries

Every curve and slope on the highway presents a unique challenge for commercial vehicle drivers.

Meet **Road-Aware,** the revolutionary application that changes how drivers manage their rigs on America's complex roadways.

Helping Drivers be Safe

Difficult Curvatures in Red
Difficult Slopes in Purple

Red Spot id: 173011
segment: 32807198
type: Slope
slope: 0.046862
rss [mph]: 12.80
(engine brakes only, bp=128, load=80000lbs)

Road-Aware harnesses our proprietary database of highway geometries—a comprehensive collection of road slopes and curves —to provide real-time help tailored specifically for commercial vehicles.

Road-Aware

Actual Speed — 47 mph
Curve Ahead RSS — 35 mph

Imagine receiving advance alerts about challenging road sections, with vehicle-specific safe speeds that account for load weight, vehicle dimensions, and road geometry. This isn't just a driver aid; it's intelligent risk management.

The results speak for themselves: fleets using *Road-Aware* experience fewer crashes and significantly improved driver confidence. That means more drivers making it home safely and substantial savings.
