Automated Cow Monitoring Systems:

The What's, Why's, and How's

Sponsored by: Select Sires, CowManager

Date: **February 24th, 2021** Time: **12:00 p.m. PST**

We will explore what's out there for cow monitoring systems, why you may find them useful on your dairy, and how they work. We'll have examples of the systems in use on other dairy operations. We'll take a few minutes to show specifically how the **CowManager** system can provide cow data on a dairy. The webinar will wrap up with a Question & Answer period with our presenter. A big thank you goes out to **Select Sires** for presenting this information and their sponsorship.

Please share this event with others!

RENEW YOUR ASSOCIATE MEMBERSHIP TODAY

We will continue our work in 2021 to help ensure the sustainability of our dairies, making the need for WODPA's independent voice more necessary than ever. WODPA is the ONLY organic dairy association

focused on dairies in the Western United States. Our voice is being heard on a national level because of Associate Members and sponsors like yourself. It is critically important to have WODPA fighting for organic stakeholders, while working dairy families work hard at home to keep their dairies sustainable. Together as organic stakeholders, we have the power to educate others and vocalize our struggles in this challenging dairy environment.

With your help, WODPA can do even more. Your financial support is a vote for the work we do.
