RMA Authorizes Emergency Procedures to Help
Drought-Impacted Producers

WASHINGTON, July 13, 2021 – The United States Department of Agriculture (USDA) is authorizing emergency procedures to help agricultural producers impacted by extreme drought conditions. USDA's Risk Management Agency

(RMA) is working with crop insurance companies to streamline and accelerate the adjustment of losses and issuance of indemnity payments to crop insurance policyholders in impacted areas.

DROUGHT SERVICES WEBINAR FOR CA PRODUCERS

To support dairy farmers through this drought emergency, [Western United Dairies](#), [California Cattle Council](#), and our partners have collaborated to host a webinar series focused on maximizing available resources through different drought funding and assistance opportunities, available now and in the coming months.

Join us virtually this **Thursday, 7/15 at 2:30p** (English) and next Thursday 7/22 at 9:00a (Spanish) for an overview of services offered by USDA's NRCS, FSA & RMA. Presentations and producer Q&A will be offered.

This Webinar series is open to all dairy and cattle producers in CA.

ORGANIC DAIRY MARKET NEWS

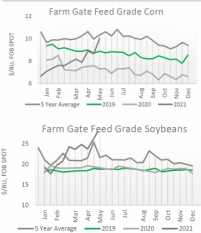

Organic Dairy Market News reports are released bi-weekly. They provide market condition information and analysis. The reports include unbiased data

ORGANIC DAIRY FLUID OVERVIEW

Dutch Organic Milk Price: In the Netherlands, a large processor of organic milk announced the June 2021 pay price for organic milk, unchanged from May 2021, is €8.75 EUR/10kg (currently \$29.43 USD). The organic milk producer supplies an average of 550,000 kilograms of milk, containing a fat content of 4.42 percent, protein content of 3.57 percent and a lactose content of 4.53 percent, on an annual basis.

Organic Milk Retail Prices for Selected U.S. Cities: The May 2021 in-store surveys of selected supermarkets in dairy U.S. cities reveal that the retail prices of organic whole milk, in half-gallon containers, range from \$3.14 in Houston, TX, to \$5.54 in Pittsburgh, PA. The U.S. simple average price, \$4.11, is up two pennies from April 2021. Twenty-five of the selected cities' organic whole milk, in half-gallon containers, showed prices did not change compared to April 2021 retail prices. The largest price increase, over the previous month, for organic whole milk in half-gallon containers occurred in New York, NY, up 27 cents.

Operation of a U.S. economy that suffered major damages from a fire earlier this spring continue to work through challenges. The dairy operations previously took in 500,000 pounds of milk a day from most by farms. The operators are working with regional processors. Reports indicate that most of the organic milk is being processed at other plants via conventional handling methods, as some operations do not have the operating capacity to handle the organic milk while still taking in milk from their own conventional producers.

For more additional information, access the links: <https://www.ams.usda.gov/amsorganicfeed.pdf>

concerning market prices and volumes for organic milk and organic dairy products. This information comes from the USDA.
