ZENRELIA INDICATIONS

Zenrelia is a prescription medication used to control itching and inflammation associated with skin allergies for dogs over 12 months of age.

ZENRELIA IMPORTANT SAFETY INFORMATION

See package insert including the Boxed Warning. For full prescribing information speak with your veterinarian, call 1-888-545-5973 or visit www.elancolabels.com/us/zenrelia.

WARNING: VACCINE-INDUCED DISEASE AND INADEQUATE IMMUNE RESPONSE TO VACCINES. Based on results of the vaccine response study, dogs receiving Zenrelia are at risk of fatal vaccine-induced disease and inadequate immune response to vaccines. Dogs should not take Zenrelia for a time period before and after vaccination. Discuss your dog's vaccine schedule with your veterinarian. Dogs should be up to date on vaccinations prior to starting Zenrelia. Do not use in dogs less than 12 months old or dogs with a serious infection. Dogs should be monitored for the development of infections because Zenrelia may increase the chances of developing an infection. Neoplastic conditions (benign and malignant) were observed during clinical studies. The most common side effects were vomiting, diarrhea and tiredness. Zenrelia has not been tested in dogs used for breeding, pregnant, or lactating dogs and has not been evaluated in combination with glucocorticoids, cyclosporine, or other immune suppressive drugs.
