

BRAVECTO[®]
QUANTUM

(fluralaner for extended-release
injectable suspension)

CONGRATULATIONS ON YOUR BRAVECTO[®] QUANTUM leap

Your dog has 12 months* of flea and tick protection

Today your dog received a **BRAVECTO QUANTUM** injection.
Here are a few things you may want to know about this coverage.

What to expect from BRAVECTO QUANTUM

Continuous protection:

- Veterinary experts recommend year-round protection, since fleas and ticks are a year-round threat¹
- A yearly injection helps prevent infestations and the health risks parasites pose to both your dog and you
- **BRAVECTO QUANTUM** protects against the common tick species that can spread disease^{1,2}

Trusted safety:

- **BRAVECTO QUANTUM** contains a proven active ingredient² found in all **BRAVECTO[®]** products and has already been used safely and effectively outside the US
- Numerous studies have shown **BRAVECTO QUANTUM** to be a safe, effective way to protect dogs year round

Benefits over monthly treatments

Convenience:

- One injection eliminates the need for monthly oral or topical treatments²
- **BRAVECTO QUANTUM** is administered by your trusted veterinarian, in the clinic, to ensure year-round protection for your dog

Less risk:

- Avoids the worry of missed doses and eliminates gaps in protection ensuring your dog is protected nonstop, year round*
- Ideal for dogs that struggle with oral or topical applications

***BRAVECTO QUANTUM** protects against
Amblyomma americanum for 8 months.

1 quick injection.
1 FULL YEAR OF PROTECTION.*
Zero missed doses.

BRAVECTO[®]
QUANTUM

(fluralaner for extended-release
injectable suspension)

You've made the right choice for flea and tick protection

Fleas and ticks threaten both pets and humans with disease and discomfort, year round.

Adult fleas begin feeding almost immediately, once finding your dog.³

Flea bites can cause allergic dermatitis, which leads to itchy sores or bumps on a dog's skin.

Ticks remain active even in winter whenever temperatures are above freezing.⁴

BRAVECTO QUANTUM protects your dog from fleas and ticks through all 4 seasons.

IMPORTANT SAFETY INFORMATION:

BRAVECTO QUANTUM (fluralaner for extended-release injectable suspension) for Dogs:

The most commonly reported adverse reactions in a US field study included lethargy, decreased appetite, vomiting, diarrhea, elevated liver enzymes and pruritus. **BRAVECTO QUANTUM** is not effective against lone star ticks beyond 8 months of dosing. Fluralaner is a member of the isoxazoline class. This class has been associated with neurologic adverse reactions including tremors, ataxia, and seizures. Seizures have been reported in dogs receiving isoxazoline class drugs, even in dogs without a history of seizures. Use with caution in dogs with a history of seizures or neurologic disorders. The safety of **BRAVECTO QUANTUM** has not been evaluated in breeding, pregnant and lactating dogs. In some cases, adverse events have been reported following use of **BRAVECTO (fluralaner) Chews** in breeding females. For use in dogs and puppies 6 months of age and older.
