

Re-imagining the
dynamics of
Building Construction

About Us

R B Sukhramani is the flagship firm of the group undertaking Turnkey Contracts for Construction of buildings from Foundation to Finishing. We are the One Point Contact for our clients for all aspects of the Civil, Electrical, Interior & various other departments involved in construction of a building.

We have successfully executed contracts for various government departments like MIDC, NMMC, MHADA among others. With the changing dynamics of Building Construction, the Group envisaged specialized business units for different segments of construction activity. Currently, the group has formed such business units for Façade Works, Surface Coating, Shower Enclosures and are constantly adding more such verticals.

Our current resources comprise of 25,000 sq ft production facility in Navi Mumbai with in house powder coating unit which enables us to control & monitor quality of the end product. We have experienced & qualified teams for design, fabrication & installation. We also have in house logistics with vehicles & equipped manpower for stacking, loading & unloading. We have an additional facility in Bhiwandi which is used for fabrication purposes.

TURNKEY WORKS

For over three decades, RBS has been guided by core values of Integrity, discipline & a zeal to go the extra mile in providing quality in its service to the customers in form of both timely delivery as well as above expected final result.

RBS has been involved as a contractor with various government departments undertaking civil & infrastructure projects. Our experience encompasses infrastructure projects like Construction of Fire Station Complex with corresponding landscaping in Murbad, Construction of 1500 CuM sump for effluent treatment plant with laying of feeder HDPE pipelines in Dombivali, Construction of Rehabilitation residential building for MHADA among others.

In recent times we have also undertaken complete project work from foundation of a building to completing the final interiors and handing over project with lock & key for MIDC's regional office in Ambarnath & NMMC's School Building in Koparkhairne.

Facade Works

Unitized Curtain Wall Glazing

Our unitized framing system is a cost-effective solution that reduces the time to fabricate, assemble, glaze and install.

Semi Unitized Curtain Wall System

Our Semi-unitized curtain wall system is a type of curtain wall which has the combined features of stick curtain wall and unitized curtain wall.

Conventional Capped Curtain Wall System

Our Conventional Capped Curtain Wall (Stick-Built) systems are optimally used where the required volume is relatively low and there are many complicated conditions.

Spider Glazing System

Our Structural Glass Assemblies also known as Suspended Assemblies or Spider Glazing Systems have high impact visually.

Doors & Windows

Our product portfolio includes, design and fabrication of aluminium windows and doors. We offer versatility in design and function and our windows and doors can be uniquely configured into large combinations for maximizing views and enhancing lifestyles.

Facade Works

Glass Skylights & Canopies

Our unique, custom designed, glass skylights and canopies and other structures add distinction, exceptional beauty, and expansive visibility to a construction project.

Railing Systems

Our Railing System is precisely engineered to meet specified design criteria ensuring that the project specifications and architect's design vision are realized without compromise.

Cladding

External cladding is used in spandrel areas and on columns. It provides thermal insulation and reduces the temperature variation inside the building and improves the acoustic.

Louvers

The louvers can be designed in varying depths and a wide array of blade configurations and can be finished in standard or custom colors. Our Louvers have exceptional air performance characteristics and offer the best protection under severe weather conditions.

Shower Enclosures

Shower Enclosures are an excellent feature to lift the aesthetic value of the Bathrooms along with adding the functionality of separating Dry/Wet Area of the Bathroom. Our Shower enclosures are custom designed to suit the technical needs on the bathroom.

Surface Coating

Powder coating has emerged as the preferred choice of method used for Surface Coating of metals as it ticks all the right boxes – protection or decorative, architectural or aesthetic, durable, cost effective & environment friendly. We provide wide range of colours with variety of finishes like gloss, matte, textures & metallic.

- Production facility: 12,000/- Sq Ft
- Production Capacity: 3,000 Sq ft per shift
- Facility to Coat profiles upto 5 Mtr Length
- Crane System for Pre-Treatment of Aluminium Profiles for Minimum Human Interference.
- Conveyorized Manual Coating with StatField Guns
- Sophisticated Laboratory as per industry standards of reputed color brands.
- Batch Type Oven of Size 5200 mm X 2400 mm X 2600 mm (L X W X H)
- Sufficient Storage Space for 100 Ton Material.
- Express Delivery Option Available (Within 24 hours)

Clientele

RBS Group

- M/s R B Sukhramani - Flagship firm undertaking turnkey projects
- Ajit India (Calcutta) Pvt Ltd - Company undertaking structural aluminium & façade projects
- M/s EssBee Ventures (REKLUZ) - Brand for Custom Designed Shower Enclosures
- M/s Souk Ventures (SOUK) - Brand for Luxury Windows at affordable price for Retail Customers
