

LEAVING A  
UNIQUE MARK ON  
CONSTRUCTIONS

## About Us

---

RBS was started in 1984 as a proprietary concern engaging in government civil contracts. Over the period of years, we have transformed from a generic contracting company into a professional firm catering to end-to-end façade needs of our customers on a turnkey basis. We provide solutions to niche façade requirements across sectors like Hotels, Residential, Commercial and Industrial. Our perseverance to provide innovative solutions, on time, with sincere professionalism has been recognized by our channel partners like Hafele & Schueco Systems which are hallmark of German engineering.

---

### Our Infrastructure

Our factory is based in Navi Mumbai with a production area of 25000 sq ft with all necessary machinery for fabrication for execution of high-end façade and windows projects. With in-house Powder Coating, we have a self-sufficient production facility to enable us to reduce lead times and uncertainty in delivery. The tangible facilities are complimented by the intangibles of well trained, motivated engineers and professionals resulting in high quality production.

---

### Our Experience Center

In addition to the production facility, we also have a 1000 sq ft experience center where our end users can visit to for a live demo of a variety of samples, mockups sections, types of glass, colors etc. to get a perfect blend of aesthetics with functionality.
