

Our Health Mission

Hope for Health was created with families in mind.

Our primary goal is to make your dental health as convenient and easy as possible. Hope for Health comes to you! Your whole family can get their teeth cleaned right outside your door. Relax in the comfort of your own home while your whole family takes turns getting their teeth cleaned in our state-of-the-art Mercedes Sprinter van, fully equipped for all your preventive dental needs.

If you are an individual interested in our services, appointments are available at our location on a limited basis.

Experience and Professionalism

Our Founder, Janet Madrid RDH, has been in the field of Dentistry for over 40 years. Her passion for health education and service to her patients and community prompted her to develop a state-of-the-art MOBILE Preventive Oral Health model to help Colorado citizens stay healthy and move towards better health with a Natural Holistic approach.

Our goal is to educate, equip and empower you to achieve health by understanding the Oral Systemic Connection. We bring our services to you with your comfort in mind. Our van is eco-friendly and produces less emissions than if you were to drive your family out to the dentist.

Hope for Health strives to use green practices and organic and natural products for the health of you and our planet.
