

MEDIA RELEASE – The Suspended Dr William Bay and the #StopTheSteal2023 High Court Case

FOR ALL POINTS DISTRIBUTION

11th October 2023

(The Suspended) Dr William Bay is the leader of Freedom and Truth Australia and founded Queensland Peoples' Protest. Since August 2022 he has been one of the 11 indefinitely but emergency suspended doctors in Australia for speaking out to warn the public against the dangers of the Covid-19 injectables.

He is currently suing AHPRA, the Medical Board of Australia, and the State of Queensland in the High Court to reclaim the lawful right to warn patients of medical risks, to uphold the primacy of freedom of speech, and the sanctity of the doctor-patient relationship. A decision on that case is expected tomorrow at 9:15am AEDST.

More importantly, as of yesterday, the 10th October 2023, he is now also attempting to bring an urgent injunction to delay the 2023 Referendum and has filed case B54/2023 (documents available at <https://qpp.life/legal>) to allow for the issuance of a writ of mandamus to force the Electoral Commissioner Tom Rogers to reproduce the 2023 Referendum Ballot paper according to law.

The key points of William's case are that:

- a) The 2023 Referendum ballot paper does NOT disclose the correct referendum question in conflict with the requirements of the Referendum Writ of the Governor-General, the *Referendum (Machinery Provisions) Act 1984 (Cth)* and s 128 of the *Commonwealth Constitution*.
- b) The reference to the title of the proposed law is incorrect and misleading because such a title cannot be found in the Federal Register of Legislation (www.legislation.gov.au) nor can it be found in the Official Your Referendum booklet.
- c) Even if the Court determines that the title on the 2023 Referendum Ballot paper is lawful and the correct reference, the Australian people are still being disenfranchised of their right to vote in the 2023 Referendum because not all of them are being provided with supplementary voting materials (like the Official Your Referendum booklet) in polling booths and no one is receiving them in the postal vote packages.

As such, this unlawful ballot paper is invalidating the entire 2023 Referendum and will likely be the subject of ongoing litigation thus meaning the Yes campaign is destined to lose even if they win the votes required because none of the votes will have been lawfully cast.
