

ENERGY
CORP.

Advanced Exploration Project in Guyana

Investor Presentation
June 2026 : Rev 2

U92 Energy Corp | TSXV:UTWO

DISCLAIMER

This presentation, as supplemented or amended from time to time, is for information purposes only and does not constitute an offer to sell or a solicitation of an offer to buy securities. The information contained herein has been prepared for the purpose of providing interested parties with general information to assist them in their evaluation of U92 Corp. ("U92" or the "Company") and this presentation should not be used for any other purpose.

This presentation does not contain, nor does it purport to contain, a summary of all of the material information concerning the Company or the terms and conditions of any potential investment in the Company. If and when you determine to proceed with discussions and investigations regarding a possible investment in the Company, prospective investors are urged to carry out independent investigations in order to determine their interest in investing in the Company. Prospective investors should not construe the contents of this presentation as legal, tax, regulatory, financial or accounting advice and are urged to consult with their own advisers in relation to such matters. This presentation is not, and under no circumstances is to be construed as, a prospectus, an advertisement or a public offering of securities in Canada, the United States, or any other jurisdiction. No securities commission or similar authority of Canada, the United States, or any other jurisdiction has reviewed or in any way passed upon this document or the merits of the securities described herein, and any representation to the contrary is an offence.

FORWARD-LOOKING STATEMENTS: This presentation contains "forward-looking statements" and/or "forward-looking information" (collectively, "forward-looking statements") within the meaning of applicable securities legislation. All statements, other than statements of historical fact, are forward-looking statements. Generally, forward-looking statements can be identified by the use of forward-looking terminology such as "plans", "expect", "is expected", "in order to", "is focused on" (a future event), "estimates", "intends", "anticipates", "believes" or variations of such words and phrases or statements that certain actions, events or results "may", "could", "would", or the negative connotation thereof. In particular, statements regarding the Company's future operations, future exploration and development activities or other development plans constitute forward-looking statements. By their nature, statements referring to historical mineral resources constitute forward-looking statements. Forward-looking statements in this presentation include, but are not limited to statements with respect to the results (if any) of further exploration work to define and expand or upgrade mineral resources and reserves at the Company's Kurupung Project in Guyana (the "Project"); the anticipated exploration, drilling, development, construction and other activities of the Company and the results of such activities; the anticipated exploration budget and program for the Project; the plans to define a mineral resource at the Project; statements regarding the future outlook for nuclear power and uranium supply; the ability of exploration work (including drilling) to accurately predict mineralization; and any other information herein that is not a historical fact.

The Company considers its assumptions to be reasonable based on information currently available but cautions the reader that these assumptions regarding future events, many of which are beyond the control of the Company, may ultimately prove to be incorrect since they are subject to risks and uncertainties that affect the Company, its properties and business. Such risks and uncertainties include, but are not limited to, changes in demand for and price of uranium and other commodities (such as fuel and electricity) and currencies; changes or disruptions in the securities markets; legislative, political or economic developments in Latin America; the need to obtain permits and comply with laws and regulations and other regulatory requirements; the possibility that actual results of work may differ from projections/expectations or may not realize the perceived potential of the Company's projects; risks of accidents, equipment breakdowns and labour disputes or other unanticipated difficulties or interruptions; the possibility of cost overruns or unanticipated expenses in development programs; operating or technical difficulties in connection with exploration, mining or development activities; the speculative nature of exploration and development, including the risks of diminishing quantities of grades of reserves and resources; and the risks involved in the exploration, development and mining business, among others. The Company's anticipation of and success in managing the foregoing risks could cause actual results to differ materially from what is anticipated in such forward-looking statements. Although management of the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. The Company disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, future events or otherwise, except as required by applicable securities laws.

An investment in the Company is speculative and involves substantial risk and is only suitable for investors that understand the potential consequences and are able to bear the risk of losing their entire investment. Investors should consider the foregoing risks, in addition to many others, and consult with their own legal, tax and financial advisors with respect to all such risks before making an investment.

DISCLOSURE FOR MINERAL PROJECTS: In this presentation, the definitions of proven and probable mineral reserves, and measured, indicated and inferred mineral resources are those used by the Canadian provincial securities regulatory authorities and conform to the definitions utilized by the Canadian Institute of Mining, Metallurgy and Petroleum ("CIM"), as the CIM Definition Standards on Mineral Resources and Mineral Reserves adopted by the CIM Council, as amended.

This presentation also contains information in respect of historical exploration activities conducted on the Project. Certain of the potential quantities and grades included in this presentation are conceptual in nature, that there has been insufficient exploration to define a mineral resource in respect of the Project and it is uncertain if further exploration will result in such targets being delineated as a mineral resource.

The technical information contained in this presentation has been reviewed and approved by Richard Spencer, B.Sc (Hons). Ph.D, registered Professional Geoscientist with the Association of Professional Geoscientists of Ontario and Chartered Geologist with the Geological Society of London (England). Dr Spencer is a Qualified Person within the meaning of NI 43-101.

HISTORICAL RESOURCE ESTIMATES: This presentation includes historical resource estimates in respect of the Project as set out in the Company's technical report entitled "Updated Technical Report on the Kurupung Project, Cuyuni-Mazaruni Region, Guyana" dated August 4, 2025, with an effective date of July 30, 2025. The historical resource estimates were detailed in two prior technical reports: 1. A Technical Review of the Aricheng North and Aricheng South Uranium Deposits in Western Guyana for U3O8 Corp.. and Prometheus Resources (Guyana) Inc. by R.B Alexander and K. Breede, dated January 14, 2009. and 2. Technical Review and Mineral Resource Estimates of the Aricheng C and Aricheng West Structures, Kurupung Uranium Project, Mazaruni District, Guyana for U3O8 Corp. by A. Workman and K. Breede, dated June 26, 2012. (i) Historical resource estimates have been classified in accordance with the CIM Definition Standards; (ii) Historical resource estimates are not Mineral Reserves or Mineral Resources and do not have demonstrated economic viability; (iii) The Qualified Person considers that the historical resource estimates are relevant for the proper understanding of the Project and additional exploration, including drilling, would be needed to verify the historical estimate as current Mineral Resources; (iv) A Qualified Person has not done sufficient work to classify the historical estimate as current Mineral Resources or Mineral Reserves; and (v) The Company is not treating the historical estimate as current Mineral Resources or Mineral Reserves.

THIRD PARTY INFORMATION: This presentation includes market and industry data which was obtained from various publicly available sources and other sources believed by the Company to be true. Although the Company believes it to be reliable, the Company has not independently verified any of the data from third-party sources referred to in this presentation, or analyzed or verified the underlying reports relied upon or referred to by such sources, or ascertained the underlying assumptions relied upon by such sources. The Company does not make any representation as to the accuracy of such information.

TAXATION: Prospective investors should be aware that the purchase of securities of the Company or any entity related thereto may have tax consequences. The Company assumes no responsibility for the tax consequences of any investment. Each prospective investor is strongly encouraged to consult its own tax advisor concerning any purchase of securities of the Company or any entity related thereto.

CAUTIONARY NOTE TO UNITED STATES INVESTORS: This presentation does not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of the securities of the Company in any jurisdiction in which such offer, solicitation or sale would be unlawful. The securities of the Company described herein have not been and will not be registered under the United States federal or state securities laws and may not be offered or sold in the United States, or to, or for the account or benefit of, "U.S. Persons" as such term is defined in Regulation S under the United States Securities Act of 1933, as amended (the "U.S. Securities Act"), unless an exemption from registration is available. Prospective investors will be required to represent, among other things, that they meet the definition of "accredited investor" (as defined in Rule 501(a) of Regulation D under the U.S. Securities Act) and are familiar with and understand the terms of the offering and have all requisite authority to make such investment. Any securities of the Company that are sold in the United States will be "restricted securities" within the meaning of Rule 144 under the U.S. Securities Act and may only be resold, pledged or otherwise transferred pursuant to an effective registration statement under the U.S. Securities Act or pursuant to an applicable exemption from the registration requirements of the U.S. Securities Act.

Guyana

A Strategic Mining Jurisdiction

Shear-hosted mineralisation with regional-scale magmatic body comprised predominantly of granites and granodiorites

Exploration targets associated with structures mineralized by late-stage magmatic and/or metasomatic uranium-bearing fluids

Uranium mineralisation hosted within demagnetized shear zones identifiable as magnetic-low features within airborne magnetics

Guyana Resource Sector

4

Mining and Oil & Gas support export earnings & regional employment

MAJOR COMMODITY INVESTMENTS

- Zijin Mining (USD \$350M)
- G Mining (USD \$4B)
- Exxon Mobil (USD \$50B)

SECTOR TRENDS

Emergence of base and critical metals highlighting the prominence of Guyana as a global resource partner

EXECUTIVE MANAGEMENT AND DIRECTORS

- Experienced management and board
- Strong uranium track record
- Qualified Person and technical governance
- Disciplined milestone-driven execution

Investor Highlights

Historic MRE – 10.6Mlb Ind + 10.0Mlb Inf *

Significant Exploration Upside - 92km²

129,000m of Historic Drilling

88,000m Diamond Drill Core on-Site

MRE Update 2026 (Pit Constrained) - WGM

+5,000m Drill Program Starting Q3, 2026

2nd Fastest Global Economy: GDP +19% **

Valuation Disparity to Peers

*Please see "Historical Resource Estimates" disclaimer on Page 2 & details on Page 9

** <https://dpi.gov.gy>

A photograph of a lumber yard or mill. In the foreground, there are several long wooden tables or racks filled with stacks of cut lumber, likely 2x4s. The racks are made of reddish-brown plastic or wood. In the background, several workers wearing hard hats and safety vests are standing near more stacks of lumber. The setting is outdoors, with trees and foliage visible in the background. The lighting is somewhat dim, suggesting an overcast day or a shaded area.

A Clear Market Disconnect: Mispriced with Compelling Upside

- U92 Corp represents a rare valuation disparity on a tier-one asset
- High-grade positioning, and cost advantages materially disconnected from peer benchmarks
- Significant re-rating potential

URANIUM MARKET PEER VALUATIONS

Cautionary Note Regarding the Use of Comparables (source data in Appendix A):
The above analysis outlines valuation multiples or “comparables” for certain publicly traded uranium companies (the “Peers”). Comparables are intended to permit investors to assess the relative market valuations of similar issuers and whether an issuer trades appropriately relative to its peers. These Peers displayed are considered appropriate as each represents a pre-construction company advancing a uranium-focused deposit. EV/MI&I is an appropriate metric on which to base comparison with U92 as it is generally accepted in the mining industry to compare relative valuation of exploration stage companies. This information has been obtained from public sources and has not been independently verified by U92. A potential investor should not place undue reliance on these comparables when making an investment decision and comparables should not be the sole criteria used for making investment decisions. If any comparable information included herein contains a misrepresentation, investors do not have a remedy therefor under securities legislation.

URANIUM MARKET PEER VALUATIONS

EV/MI&I (US\$/lb U₃O₈) – Current Resources

Poised for Immediate Growth:

Geology Extends Significantly Beyond
Current Resource – Drilling Underway

- Mineralisation open in all directions
- Large-scale structural corridors and continuous mineralization from surface

U92 LICENSE AREA MAGNETIC LOW CORRIDORS

Location of deposits (Aricheng North, C, West and South) with other targets drilled

- All uranium mineralization encountered to date is in magnetic low corridors that trend from East to West across the licenses (white dashed lines)
- Gap of 5km along each magnetic corridor is prime exploration ground that has not been drilled

HIGHLY PROSPECTIVE URANIUM SYSTEM

EASTERN LICENSE HOSTS

** Wilde, A., 2020. Shear-Hosted Uranium Deposits: A Review. Minerals, MDPI, 10, 954 & NI 43-101 2014 Mineral Resource Estimate, effective 26 June 2014, Paladin Energy Ltd.

*** NI 43-101 Preliminary Economic Assessment Update (revised), prepared by John I Kyle of Lyntek Incorporated, dated August 19, 2013.

This presentation includes historical resource estimates in respect of the Project which are set out in the Company's technical report entitled "Updated Technical Report on the Kurupung Project, Cuyuni-Mazaruni Region, Guyana" dated August 4, 2025, with an effective date of July 30, 2025. The historical resource estimates were detailed in two prior technical reports: 1. A Technical Review of the Aricheng North and Aricheng South Uranium Deposits in Western Guyana for U3O8 Corp.. and Prometheus Resources (Guyana) Inc. by R.B Alexander and K. Breede, dated January 14, 2009. and 2. Technical Review and Mineral Resource Estimates of the Aricheng C and Aricheng West Structures, Kurupung Uranium Project, Mazaruni District, Guyana for U3O8 Corp. by A. Workman and K. Breede, dated June 26, 2012. (i) Historical resource estimates have been classified in accordance with the CIM Definition Standards; (ii) Historical resource estimates are not Mineral Reserves or Mineral Resources and do not have demonstrated economic viability; (iii) The Qualified Person considers that the historical resource estimates are relevant for the proper understanding of the Project and additional exploration, including drilling, would be needed to verify the historical estimate as current Mineral Resources; (iv) A Qualified Person has not done sufficient work to classify the historical estimate as current Mineral Resources or Mineral Reserves; and (v) The Company is not treating the historical estimate as current Mineral Resources or Mineral Reserves.

CLEAR STEPS TO GROW RESOURCE BASE

Multiple untested targets with confirmed uranium mineralization

EXPLORATION / DISCOVERY COSTS

U92 Advantage:

Low-Cost Exploration and Predictable Geology in Competent Hard Rock Granite

Aricheng North (first target drilled):

115 holes / 18,000 m for drilling cost of USD \$2.52M

Discovered 3.409 Mlbs

Total cost to discover 1.0Mlbs = USD \$739,000

Aricheng C (fourth target drilled):

34 holes / 9,350 m for drilling cost of USD \$1.309M

Discovered 4.214 Mlbs

Total cost to discover 1.0Mlbs = USD \$310,000

Approximate Cost to Grow Resource to 50Mlb USD \$9.3M (CAD \$12.75M) to BFS

All in Cost of drilling at Kurupung for 2026 approximately USD \$130/m

The \$/lb Discovery Cost at Aricheng C (and predicted going forward) = USD \$0.31

Clear Understanding of the Geological Model Provides for Efficient
Deployment of Capital and Low Risk Exploration

KURUPUNG URANIUM 2026 WORK PROGRAM

Thank You

Adam Clode
CEO & Executive Chairman

TECHNICAL SLIDES

FOLLOW ORE SHOOTS BELOW EXISTING DEPOSITS

- The mineralisation at Aricheng North is comprised of 3 ore shoots that remain open at depth below ~200m
- The original 2009 historical mineral resource estimate over the Aricheng North and South deposits excluded the mineralisation potential of the saprolite ore material
- Shallow drilling and/or trenching was recommended to incorporate the mineralised saprolite material into the MRE
- The mineralisation at Aricheng South is comprised of 2 sub-parallel ore shoots that remain open at depth below ~250m

FOLLOW ORE SHOOTS BELOW ARICHENG SOUTH

Long Section through the mineralized vein

Cross Section through the mineralized vein

PLANNED DRILL HOLES ARICHENG SOUTH

DISPARITY BETWEEN: GRADE & PRODUCTION COSTS

Production Cost vs Grade - Athabasca Basin vs Emerging Markets (Namibia)

APPENDICES

APPENDIX A

1. Attributable resources are calculated based on the expected ownership of the applicable property by the owner, taking into consideration any other 3rd party interests in the property
2. Attributable resources are calculated using historical resource estimates and may not be compliant with NI 43-101 standards
3. Resources are as reported by the applicable company from documents sourced from: S&P Capital IQ, Company reports and press releases
4. The following technical reports and releases (available on SEDAR+) are the source material for the resource and asset details provided for each company:

U92 Corp.

"A Technical Review of the Aricheng North and Aricheng South Uranium Deposits, in Northwestern Guyana for U3O8 Corp. and Prometheus Resources (Guyana) Inc." effective 2009

"Technical Review and Mineral Resource Estimates of the Aricheng C and Aricheng West Structures, Kurupung Uranium Project, Mazaruni District, Guyana, for U3O8 Corp." effective 2012

American Uranium Ltd

mining.com.au, "American Uranium grows Lo Herma's resource", Maddison Elliott, 3.31.2026

Anfield Energy Inc.
