ACCU-GOGREEN CAMPFIRE WAX

Accu-GoGreen Campfire Wax is made from 100% recycled soy wax and recycled paper briquettes infused with soy oil or lemon oil. It is an outdoor campfire for warmth or cooking, as you are at the camp, on the beach, or in the backyard. There is no smoky smell or soot while it is burning. The waste soy wax is processed and turned into the recycled soy wax by hydrating and removing impurities through the recycling process line at our factory in Perris, California. Our innovative Accu-GoGreen Campfire Wax offers you a superior performing and practical solution to meet your environment concerns.

The packages of Accu-GoGreen Campfire Wax are available in 4 lb round metal tin container with lid; Size: 8" diameter X 3.5" height. The custom botanical oils, fragrances, or tin containers are available for your private labels.

Safety Warning

Be aware of that putting water on burning wax will spread fires!
Never use it when there is water on wax surface or it is raining.
Smother the fire with the lid rather than put water on the flame.
Never touch or move it when it is burning or tin container is hot.
Keep flame away from children, pets, and flammable objects.
Use baking soda or sand to extinguish flame in emergencies.

ACCU-GOGREEN CASTING WAX

Accu-GoGreen Casting Wax is an unfilled pattern wax made from recycled casting wax, resin and other ingredients for investment casting or lost wax casting process. It has good dimensional stability, small linear shrinkage, low ash content, high strength, and good mold release. The exceptional flow property, excellent surface finish, and dimensional consistency make it suitable for mass production to meet critical dimension requirements.

Physical Properties

R & B Softening Point (°F)	166-170
Paste Injection Temperature (°F)	137-140
Needle Penetration (dmm@77°F)	7-10
Residual Ash Content (wt%)	0.03
Specific Gravity (g/ cm ³)	0.98
Color (Visual)	Green
