## GOING GREEN PRODUCTION

Accu-Blend has been dedicated to going green to pursue the knowledge and practices which can lead to more environmentally friendly and ecologically responsible production. We have been making efforts to help protect the environment and sustain its natural resources for current and future generations.

Soy wax is a 100% natural wax derived from the vegetable soybeans. Soybeans are one of the major agriculture crops grown in the United States, behind only corn. Soy wax is made from environmentally friendly, renewable resources; whereas classic paraffin wax is made from petroleum and is non-renewable.

Accu-Blend is one of the first manufacturers to formulate and create all natural soy candle blend in the United States. Accu-Soy is our historic famous brand for soy wax products. Accu-Soy candle can last 50% longer than paraffin-based candle. Accu-Soy candle can burn slower and cooler, helping to better distribute fragrance. It can burn cleanly for you without soot or smoke.

Accu-Pure all natural candle waxes are made from 100% soy wax, coconut wax, palm wax, organic vegetable wax, olive oil, apricot wax, and other natural ingredients.

Recycling is an important part of going green for Accu-Blend. Accu-Blend is the first manufacturer to collect and recycle the waste wax on the West Coast. We set up an innovative and unique process line for recycling waxes.

The waste wax is processed and turned into the recycled wax by hydrating and removing impurities through our recycling process line. We have achieved the desired balance of costs and benefits of recycling wax by means of our patented recycling process procedures and equipment.

Accu-GoGreen Campfire Wax is made from 100% recycled soy wax and recycled paper briquettes infused with soy oil or lemon oil. It is an outdoor campfire for warmth or cooking, as you are at the camp, on the beach, or in the backyard.

Accu-GoGreen Casting Wax is an unfilled pattern wax made from recycled casting wax, resin, paraffin, and other ingredients. It is applied to investment casting or lost wax casting.

Our innovative Accu-Pure candle waxes and Accu-GoGreen recycled waxes offer you a superior performing and practical solution to meet your environment concerns.
