Lake Maintenance Service Report

ACCOUNT: Viewpoint Lake, Sun City Recreation
10626 West Thunderbird Blvd, Sun City, AZ 85351
TO: Eddy Renio / Terry Klatt
FROM: Janet Scheffman / 950158
DATE: Week of 26 January 2026
FAX #: (623) 876-8341

The water levels remain at normal full levels after the lake was refilled in November (2023) and not enough rainfall during the week to affect water levels or water quality.

All four of the fountains are operational; 103rd Av, Bayside, Cameo and the Rec Center and all fountains running this week. Waterfall pump was operational and there is water movement in the lagoon and down the streams into the main lake.

No bottom algae seen and limited planktonic algae growth in the water column so overall conditions remain excellent.

The last week has been warm in the afternoon and only cool evening temperatures so little change in chemical readings and every warmer afternoon temperatures in the forecast for early February.

The 4 street grates adjacent to the lake are treated with dry larvicide dunks once a month.

There were no midges seen this week and I finished a larvicide treatment earlier in the month so no additional vectobac larvicide added this week.

Normal trash removal and debris was skimmed off the surface and just the usual trash with no appreciable wind the past several weeks.

Average surface temp: 55.3 F

Average bottom temp: 54.8 F

Salinity: 0.2 ppt

Dissolved oxygen: 6.71 mg/L (surface) / 6.20 (bottom)

Secchi: 5 feet 09 inches

pH: 8.2

Current water levels: +3.00

No waterfowl or fish mortality seen this week.

Removed a few feet of fishing line and a bobber but no fish were on the line.

The trout seem to have acclimated well and only one fish lost between the stocking and this week.

Periodic treatments are done twice a month with algaecide on the boat ramp have been suspended in the cooler weather and there is no new algae growth.

Warning: None

Pesticides can be hazardous. Please keep children and pets away until applications are dry, dissipated, or aerated. For additional information contact Hurricane Aquatics (license # 5746) at (602) 619-8492.
