

Chevron Cuff

Chevron Cuff

Instructions by Joyce Trowbridge

Materials:

6 inches Chevron Chain
8 inches 5mm Flat Wire
3 feet 24 gauge Wire
12 4mm Fire Polish Beads

Tools:

1 Bead Mat
1 Chain Nose Plier
1 Round Nose Plier
1 Wire Cutter

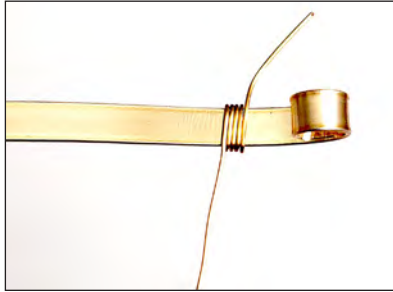

Step 1

Use Round Nose Pliers to start to curl one end of the **5mm Flat Wire**. Continue to curl the wire into a slight spiral. Use Chain Nose Pliers, if needed, to pull the curl inward.

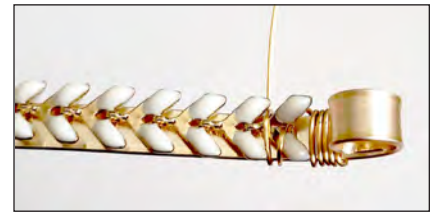

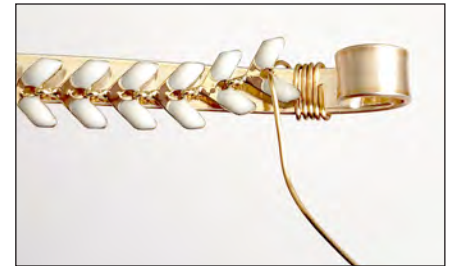

Step 2

Take one end of the **24 gauge Flat Wire** and wrap around 4-6 times near the curl end of the Flat Wire. Trim the small tail end of the 24 gauge Wire. Slide wraps closer to the curl end.

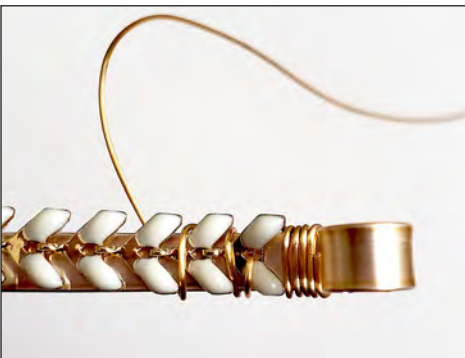

Step 3

String the **Chevron Chain** (through the hole between the wings of the Chevron) onto the 24 gauge wire. Secure the end of chain by wrapping the wire around the Flat Wire and the Chain (between the first and second links).

Step 4

Wrap the 24 gauge Wire around both the Flat Wire and the Chevron Chain, securing the next link.

Step 5

String **1 Fire Polish Bead** onto the 24 gauge. Let the Fire Polish slide down the 24 gauge and sit over the Chevron Chain. Bring the 24 gauge wire around to the back.

Step 6

Wrap the 24 gauge around the Flat Wire and the Chevron Chain to secure the next two links. String **1 Fire Polish Bead** and secure with a wrap.

Step 7

Follow Step 6 until you reach the last link of the chain.

Secure the end by wrapping the 24 gauge wire 4-6 times.

Step 8

Follow Step 1 to curl the second end of the Flat Wire. Trim the tail of the 24 gauge wire.

Step 9

Form the wire wrapped Flat Wire into a cuff shape.
