

Biocontrol (Organic) Solutions Results
CalPoly Botrytis Control Strawberry Trial 2021
 CalPoly Strawberry Center, San Luis Obispo, CA

test method

- strawberry variety "Monterey"
- weekly application to disease-promoted furrowed field via handheld boom CO² sprayer at 45 psi and 150 gal/acre volume
- evaluation on May 27, 2021, 37 days after initial application
- rating represents percentage berries unmarketable
- no phytotoxicity from all organic solutions
