

— OUR STORY —

A JOURNEY OF HEART, LOSS, *and a Mission to Save Lives*

My name is Trish, and I'm the founder of **Elite Mobile Phlebotomy**. I bring over 25 years of experience in the medical field. My journey into starting my own lab, health and wellness was born out of personal tragedy that reshaped my perspective on life and the importance of regular blood testing.

At the age of 42, my husband was diagnosed with Leukemia and cardiovascular disease. It was a diagnosis that came as a shock to the both of us; he had always been active and pretty much healthy. He rarely got a cold. By the time we discovered the illness it was already at the critical stage. Despite the best efforts of doctors and the most aggressive treatments, we lost him exactly six months from his diagnosis in 2024. This heartbreaking experience taught me a lesson that I carry with me every day; **EARLY DETECTION IS VITAL**.

The 2 C's I called it is cancer and cardiovascular disease often develop quietly, without any noticeable symptoms until they reach advanced stages. Regular blood tests are crucial in identifying potential health issues before they become life threatening. I cannot stress enough how important it is to prioritize your health and get tested.
