

Liquid propane coil style torches are used when quick spot heating is required. The long, two handled design allows the operator a convenient and easy way to operate the torch for long periods of time. This coil style torch incorporates an on-board, liquid vaporizer. This allows you to fuel the burner directly with liquid L.P. Gas (liquid withdrawal propane).

**\*IMPORTANT - The use of liquid L.P. Gas requires the use of special system components and a hydro-static pressure relief valve. Please refer to NFPA-58 and your local municipal governing agency.**
