ZOYO AUSTRALIA

zoyo.au

Mining capability statement

Perth-based supply and project coordination for mining, processing and site infrastructure across Australia.

WHAT WE SUPPLY

Wear-lined pipework and hose

Polyurethane-, rubber- and ceramic-lined steel pipe, spools and fittings. Layflat dewatering hose and rubber hose assemblies selected for the operating duty.

Fabrication to drawing

Structural steel, frames, platforms, chutes, hoppers and custom components. Machining and assembly coordinated to your drawings, material specifications and tolerances.

Switchrooms and E-houses

Complete switchroom packages can include the enclosure and agreed factory fit-out, with specialist integration coordinated to your specification. Define testing, delivery interfaces and site handover responsibilities up front.

RECENT PILBARA SUPPLY

Supplied abrasion-resistant polyurethane-lined pipe in single 18 m lengths to a mine in the Pilbara.

QUALITY AND HANDOVER

Agree inspection points, material traceability and handover documentation for the scope. Factory acceptance testing (FAT), where required, is defined before manufacture. Site connections and commissioning responsibilities are agreed separately.

Discuss your project

Send your drawings, quantities, operating conditions and delivery location. For switchrooms, include the equipment schedule and target programme.
