MAKES PERFECT TEE
BISICLICK

UMA GTV Bib Shorts C2 EVO

WHAT IT IS

The new pinnacle of the UMA GT endurance line, the GTV is re-engineered for added freedom and comfort during the longest rides. GTV is defined by a quick-release bib strap system, silky-smooth compression, and our plushest women’s insert.

BEHIND THE PRODUCT

The new generation of GTV includes critical updates for comfort, from a new waist construction to a new insert – our plushest women-specific model. The waist incorporates a lighter textile with more body-wrapping elasticity, adding a supportive fit without restriction across all riding positions. The new insert features two layers of shock-absorbing foam, with targeted support under the ischial bones. Two additional cut-ins reduce bulk at the front of the insert, letting it conform to the body throughout the pedal stroke without folding or impediment. The innovative bisiClick system uses two magnetic closures to facilitate long-distance rides with convenient bib strap release.

WHEN/HOW TO USE IT

For the pinnacle endurance performance of the GTV Summer 1/3 layering system, these bib shorts are engineered to seamlessly pair with a Summer Skin Layer and the UMA GTV Jersey C2.

FINER DETAILS

FEATURED FABRICS

The Volcano body textile provides silky-smooth elasticity, compression, and UPF 50+. Odor control and active cooling are permanently integrated into the material itself, not applied as a topical treatment. The ClickFit textile wraps the front of the waist in lighter, more breathable, and more elastic support, accommodating aggressive bar drop and deep breathing during hard efforts.

CONSTRUCTION/FIT

C2 AEPD regularFit is based on our performance race models but tuned for comfort with a zeroPressure Waist and a standard leg length.

ENGINEERING

- Bisiclick: Twin magnetic closures anchor the lower bib straps. Intuitive to connect and release, but secure enough to prevent unintentional unclasp.
- X-Frame : An A-frame suspension inherited from DYORA RS. Limits sag on the lower back, stabilizing the insert and main body panel during high-intensity riding.
- rollBar: A patented bracing design that stabilizes the insert and locks it in place as your weight transfers while sprinting, climbing, and cornering.

UMA C2 Ultra Distance

- Shock-Absorb Damping Twin19: A dual-layer construction combining 9mm of high-density microShock foam with 10mm of ultralight filterFoam under the ischial bones. Our plushest women’s insert.
- 3D Waffle: A patented, three-layer, perforated foam that increases breathability and eliminates excess weight.
- goldenGate 2.0: The insert is attached at front and rear with floating sides and center, letting it move with your body rather than against it. Cut-outs on wings reduce volume and friction.
- whirlKrater: Perforations strategically distributed throughout the insert, creating a whirlwind of cooling airflow instead of just a unidirectional breeze.

SHORTS / WOMEN

CLIMA CODE	SUMMER 1/3
ARTICLE NO.	12.10.271.18
SIZES	XS – S – M – L – XL – XLG
COLORS	Black Series
REPLACES	NEW
