BUILDING A LEGACY

60 YEARS of SCUBAPRO INNOVATION

Driven by his passion for the outdoors, Samuel C. Johnson founded Johnson Outdoors in 1970, and SCUBAPRO was one of the first brands to become part of the company. Innovation is, and always has been, core to Johnson Outdoors, and the SCUBAPRO brand continually advances breakthrough diving gear and accessories. In 1999, second generation leader, Helen Johnson-Leipold was named Chairman and CEO, and carries on that same spirit of adventure that her father had and Johnson Outdoors employees have around the world.

For 60 years, SCUBAPRO has been synonymous with innovation. As we celebrate our diamond jubilee, we look back on the legacy SCUBAPRO has built. Founded in 1963 by Gustav Dalla Valle and Dick Bonin, SCUBAPRO has consistently pioneered new innovations that enhance the total diving experience. SCUBAPRO has always been dedicated to “doing it better” for you and the sport of diving.

Looking into the future, SCUBAPRO will continue to build on its legacy of delivering innovative, high quality products to you, whether you’re a new or experienced diver, and help protect the environment whenever possible.

Founders Gustav Dalla Valle and Dick Bonin scuba diving with SCUBAPRO employees.

OUR VALUES

OUR PEOPLE ARE OUR BIGGEST ASSET

INNOVATION IN EVERYTHING WE DO

TRUST & RESPECT FOR ALL

LEAVE THE WORLD A BETTER PLACE

INNOVATION HISTORY

THEN TO NOW: MK2 1ST STAGE

Since the beginning, SCUBAPRO has been known for its regulators. From the very first regulator SCUBAPRO made, the MK2, to the MK1, MK7 and Pilot second stage, G250, and all the way to the present-day MK25 EVO, SCUBAPRO regulators are built to perform reliably. The MK2 was introduced in 1963, the first year of SCUBAPRO, and is still offered to this day with only a few modifications.

TRACK RECORD OF BCD INNOVATION

THEN TO NOW: SEA WING FINN

Introduced in 1986, the original Sea Wing fin was unique in the industry with its innovative blade design. The wing-shaped blades act similarly to aircraft wings, using hydrodynamic lift to push the diver forward. This concept was further refined in 2010 and 2022 with the introduction of the renowned Seawing Nova and Seawing Supernova fins.

In 1971, SCUBAPRO revolutionized the BCD market by introducing the industry's first stabilizing jacket. That was followed by many iconic BCDs over the years. Fast forward to today, and SCUBAPRO continues to lead the industry with the invention of the HYDROS PRO, diving's most innovative BCD.

SCUBAPRO'S TRAJECTORY

Guided by our commitment to improve the overall diving experience, SCUBAPRO continues to raise the bar in performance excellence you can trust. Looking into the future, SCUBAPRO will build on its legacy of creating innovative new products, like our new Everflex Yulex® wetsuits made from 100% neoprene-free plant-based foam.

LIVING OUR VALUES

For 60 years, SCUBAPRO continues to be a leader in the dive industry, innovating with environmentally responsible products, materials, and manufacturing techniques, which is why our equipment is the first choice of scientists, researchers, professional divers and media producers worldwide. We have long-supported global and grassroots conservation organizations and we continue to seek out ways to protect the environments we love to explore.

TAKING ACTION ON SUSTAINABILITY.

SCUBAPRO has been a leader of environmental initiatives in dive wear for many years. In 1999, SCUBAPRO implemented limestone neoprene into its dive wear line, an alternative to petroleum-based neoprene. In 2012, SCUBAPRO introduced X-Foam neoprene in an ongoing effort to reduce pollutants and harmful emissions. In 2016, we introduced solvent-free glue on Everflex suits. We also started using water-saving dope dyed yarn technology and carbon black from recycled tires. In 2022, SCUBAPRO introduced Yulex® dive – a plant-based material extracted from Forest Stewardship Council (FSC) certified renewable rubber tree farms – in our Everflex wetsuits in order to continue pushing the boundaries of sustainable dive wear and offer superb water compression resistance.

RESPONSIBLE PACKAGING.

We are continuously working to protect our environment through our Responsible Packaging program, which is tasked with reducing and eliminating the use of plastics in our product packaging where possible. These are some of the steps we have taken to reduce our plastic use:

- Almost all masks are packaged in either recycled carton boxes or in protective boxes that can also be used for transport and storage of accessories.
- Boots are shipped in fabric bags, which can be reused for transport and storage, or as a laundry or shoe bag.
- Gloves, headbands, neoprene mask straps and other accessories use recycled carton key cards as packaging.
- Regulator maintenance kits are shipped in plastic-free carton packaging.
- The majority of regulators and computers are shipped in recycled carton boxes or fabric bags.
- Almost all fins are shipping in either recycled carton boxes or mesh bags that can be reused for transport and storage or as an ocean clean-up bag to pick up trash while diving.
- Drysuits are shipped in a reusable fabric bag that can be used as a changing mat on the ground.
- New Everflex Yulex® Dive wetsuits are packaged in recycled paper bags for protection during shipping.

PROMOTING DIVING WHILE PROTECTING OUR OCEANS.

It is the SCUBAPRO way. Our mission, our passion. And SCUBAPRO leads by example. SCUBAPRO products help new and experienced divers to discover and experience the amazing undersea world, and we invite everyone to join us in working to preserve it for future generations.

Eliminating plastic and reducing packaging overall is the goal of our Responsible Packaging program. Innovative packaging solutions for other products will be implemented in the near future.

BUILDING AN OCEAN ETHOS.

SCUBAPRO believes in working together to take on the biggest issues facing our oceans, while encouraging every diver to be conservation-minded. For over 60 years, we have partnered with large and small organizations that share these ideals. We continue to do this while supporting the work of our Global Dive Team ambassadors, local dive communities, and in embarking on a substantial coral reef restoration partnership with MOTE Marine Laboratory.

LIVING OUR VALUES.

SCUBAPRO is staffed by avid divers who recognize a personal responsibility to preserve and protect the very thing that our products allow divers to explore. Renowned marine biologist and preservationist Dr. Sylvia Earle sat on our board for many years while employees have served on the boards of prestigious organizations like NOAA and DEMA. SCUBAPRO employees regularly participate in beach cleanups, events that welcome new divers, and other community functions that help build the next generation of ocean advocates.

SCUBAPRO
cares

SCUBAPRO HAS ELIMINATED PLASTIC PACKAGING IN NEARLY HALF OF OUR PRODUCTS. WE ARE CONTINUOUSLY WORKING TO PROTECT OUR ENVIRONMENT!

REGULATORS

BREATHE EASY. UNEQUALLED PERFORMANCE.

SCUBAPRO regulators not only perform well in our testing, but also perform incredibly well over time for warm and cold water divers around the world. Product designs engineered by teams with years of experience and thousands of dives are brought to life with high-end materials and tooling. The result is the ultimate in reliability. Our regulators look good on the outside, but the engineering excellence inside is what counts the most. Every SCUBAPRO regulator carries a 24-month/100-dive service interval and, if purchased through an Authorized Dealer, is covered by a lifetime warranty.

OVER A HALF-CENTURY OF ENGINEERING EXCELLENCE.

SCUBAPRO leads the dive equipment industry in innovation, creating numerous products that have changed the face of scuba. Every decision that goes into our products – from design and manufacturing to engineering and packaging – is based on quality and performance, not price. Nowhere is this commitment more apparent than in our full line of high-performance regulator systems.

FIRST TO OFFER:

- Air-balanced flow-through piston regulator on the market.
- Second stage with an adjustable balanced valve.
- Alternate-inflator regulator integrating the BCD inflator with a second stage.
- Adjustable VIVA (Venturi Initiated Vacuum Assist).
- Patented Extended Thermal Insulating System (XTIS), which transforms the MK25 EVO – widely considered the most powerful first stage in diving – into diving's premier high-performance cold-water regulator.

WE SPARE NO EXPENSE.

SCUBAPRO invests heavily in product development. Our state-of-the-art R&D facility in Italy is equipped with the latest breathing and cycle-testing machines, as well as the most sophisticated data collection tools, all to help ensure bulletproof reliability in our regulator systems. Our tests are comprehensive and intensive, far surpassing industry standards.

FIRST STAGE AIR BALANCED FLOW-THROUGH PISTON

The MK25 EVO first stage features an air balanced flow-through piston making it a first choice for demanding sport divers and professionals!

PERFORMANCE

No other first stage design can reach the high air delivery rate of a balanced piston first stage. Performance is totally unaffected by changing tank pressure or depth.

RELIABILITY

A simpler mechanism uses fewer moving parts for excellent reliability and less long-term maintenance.

RESPONSIVE

The use of lighter and more sensitive components results in an ultra-fast breathing response, instant delivery of air on demand and extra-high air flow, especially in the low tank pressure ranges.

PATENTED EXTENDED THERMAL INSULATING SYSTEM (XTIS)

Fully insulates the inner mechanism from the environment, improving cold-water resistance and delaying ice formation. This radically increases breathing reliability when diving in extreme water temperatures.

MK25 EVO DIAGRAM

FIRST STAGE AIR BALANCED DIAPHRAGM

An air-balanced diaphragm first stage has more moving parts than a piston first stage. However, its body is environmentally sealed to prevent water and pollutants from fouling the inner mechanism. Because of this, it tends to be favored by divers who find themselves in waters containing lots of suspended particles, silt, or contaminating materials. All SCUBAPRO diaphragm first stages deliver reliable and consistent air delivery regardless of tank pressure.

MK19 EVO DIAGRAM

FIRST STAGE CLASSIC DOWNSTREAM PISTON

The MK2 EVO is a bona fide diving classic using a time proven downstream piston design that's been around for decades.

STRAIGHT-FORWARD MECHANISM

The simplest mechanism to control the pressure drop from a tank to feed the second stage.

A REAL WORKHORSE

While it does not compensate for minor pressure changes as air is consumed like an air-balanced first stage does, its simple design requires little maintenance and delivers dependable airflow.

ECONOMICAL

A good choice for new divers looking for an air delivery system they can trust and that's easy to use.

MK2 EVO DIAGRAM

REGULATOR SYSTEMS

A-SERIES

Precision hand-crafted A-Series second stages are built to last. With its striking all-metal casing, screw-down casing cover and metal valve housing, the A700 is muscular in build as well as performance. Its air-balanced valve technology, stainless steel inlet tube and oversized exhaust valve deliver an ease of inhalation and exhalation that is unmatched.

MK25 EVO BT/ A700 CARBON BT

This race car-sleek system works as good as it looks. An upgrade to the A700 Regulator Systems, the MK25 EVO BT/ A700 Carbon Black Tech is a step-up in durability with a carbon fiber front cover and a Black Tech scratch and corrosion resistant coating.

LIGHTWEIGHT PERFORMANCE

Casing is full metal but the front cover is hand-made out of carbon fiber, which is both lightweight and virtually bullet-proof.

HIGH-TECH MATERIALS

Carbon fiber can resist substantial shocks without damage while reducing the overall weight of the casing.

PROTECTIVE COATING

Black Tech scratch-resistant coating on metal parts protects against the ravages of salt water and corrosion. This durable coating includes an inner layer of chemical Nickel (FDA approved) and a glossy DLC (Diamond Like Carbon) outer layer.

A700

Designed for divers who want the best, the full-metal A700 offers excellent breathing performance. Teamed with a MK25 EVO or MK19 EVO, it provides unparalleled breathing performance in all water temperatures.

FULL METAL CASING

Enables you to take advantage of the high heat exchange rate, a huge plus for cold-water diving.

BETTER BREATHING

Metal construction enables the use of a larger diaphragm inside a compact casing, increasing breathing sensitivity.

COLD-WATER CERTIFIED

Meets new EN250-2014 standards for cold-water breathing performance.

MSRP//\$1729.00

MK25 EVO/A700

MK19 EVO/A700

D-SERIES

The D-Series regulator, with its distinctive design, has been a favorite among avid SCUBAPRO regulator enthusiasts for more than three decades. This new generation draws from the iconic heritage of the original D-Series regulator while delivering 21st Century quality, reliability, performance and style to become one of the easiest-breathing and most comfortable regulators in diving.

D420

MSRP//\$899.00

PROGRESSIVE FLOW CONTROL VALVE.

New balanced valve delivers abundant airflow for the best breathing performance, with a natural smoothness not unlike what you might experience breathing on the surface.

DISTINCTIVE FIBERGLASS-REINFORCED NYLON CASING

Is ultra-durable and allows the LP hose to be connected on either the right or left side for maximum rigging flexibility.

INTERNAL WINGLETS

Direct airflow towards the exhaust valve, creating a dramatic improvement in exhalation effort.

SUPER EFFICIENT PURGE

Based on a new concept that gives the D420 its unique face, it is easy to reach and depress, with or without gloves.

DIVE/PRE-DIVE SYSTEM

Includes a switch on the top of the case with a thumb tab for adjusting the direction of airflow right out of the valve.

MK25 EVO/D420

MK19 EVO/D420

Oahu, Hawaii

S-SERIES

S-Series air-balanced second stages are synonymous with SCUBAPRO quality, unbeatable engineering and unmatched breathing performance. With five systems to choose from, dive an S-Series regulator and you will definitely feel the difference.

MK25T EVO/S620 X-TI

Ultra-light and totally corrosion-resistant, the S620 X-Ti includes all of the features of the S620 Ti, plus teams its titanium inlet tube with a durable titanium faceplate. It's a high-performance breather that promises years of trouble-free use.

ULTIMATE LIGHTWEIGHT PERFORMANCE

Low work of breathing [37% lower effort than the S600] means easy breathing at all depths, supply pressures and diving conditions.

STRONG & STYLISH

Rugged reinforced technopolymer case and durable titanium faceplate look good and are able to withstand years of aggressive diving.

ALL-TITANIUM AIR DELIVERY SYSTEM

Pair up your S620 X-Ti to a MK25T first stage, machined from a solid block of titanium which will never corrode, even in concentrated saltwater conditions.

MSRP//\$2759.00

MK25 EVO/S620 TI

The S620 Ti embraces the best features of SCUBAPRO's renowned S600 in an upgraded, state-of-the-art design. It delivers excellent performance, providing efficient airflow in a comfortable, lightweight package.

UNBEATABLE ENGINEERING

A smaller, lighter version of SCUBAPRO's best-selling second stage with improved work of breathing [37% lower effort than the S600].

UNRIVALED INNOVATION

Corrosion-free titanium inlet tube protects against the harsh effects of sea water.

EASY EXHALATION

High-performance exhaust tee improves ease of exhalation while directing bubbles out of the field of view.

MSRP//\$1159.00

MK25 EVO/S600

The S600 is renowned for its powerful performance, user-friendliness and ease of breathing.

EFFORTLESS AIRFLOW

Air-balanced valve smoothes out the inhalation effort when diving at varying depths and supply pressures.

CUSTOMIZABLE COVERS

Changeable purge covers allow you to color-match your regulator with your other gear.

MSRP//\$1079.00

S270

Recreational divers looking for solid performance in a regulator system and ready to step up from their entry-level systems are going to love the S270 Regulator System. Team it with either a MK2 EVO piston or MK11 diaphragm first stage for a reliable regulator system.

AIR-BALANCED DESIGN

Patterned after the S620 Ti whose compact casing and internal aerodynamics produce extremely low work of breathing.

LIGHTWEIGHT YET RUGGED

Fiberglass-reinforced nylon core casing has a special PU outer layer which is extremely durable plus helps reduce jaw fatigue and improve diving comfort.

USER-FRIENDLY

Effective purge and dive/pre-dive switch are easy to use even wearing thick gloves, and the compact exhaust tee is efficient in diverting exhaust bubbles from your field of view.

MK11 EVO/S270

MSRP//\$599.00

MK2 EVO/S270

MSRP//\$539.00

G-SERIES

G-Series second stages are the most imitated air-balanced second stages of all time. Introduced in 1986 as the G250, it was the first regulator to offer an adjustable Venturi Initiated Vacuum Assist (VIVA). Today's modern version, the G260, is a great choice for both rec and tech diving.

G260 CARBON BT

MSRP//\$1499.00

An upgrade to the G260 Regulator Systems, the MK25 EVO BT/ G260 Carbon Black Tech is a step-up in durability with a carbon fiber front cover and a Black Tech scratch and corrosion resistant coating.

HIGH-TECH MATERIALS

Carbon fiber can resist substantial shocks without damage while reducing the overall weight of the casing.

PROTECTIVE COATING

Black Tech scratch-resistant coating on metal parts protects against the ravages of salt water and corrosion. This durable coating includes an inner layer of chemical Nickel (FDA approved) and a glossy DLC (Diamond Like Carbon) outer layer.

MK19 EVO BT/G260 CARBON BT

MK25EVO BT/G260 CARBON BT

G260

MSRP//\$999.00

Offering effortless air delivery and outstanding reliability, this is the go-to air delivery system for cold-water or technical diving. Teamed with the powerful MK25 EVO or MK19 EVO, this system can be relied upon to deliver top-of-the-line performance in the most extreme conditions.

METAL COMPONENTS

Inlet tube, orifice, inhalation control knob and hose connector equal excellent cold-water performance.

HIGH FLOW EXHAUST

Valve reduces exhalation effort for better overall breathing comfort.

VERSATILE DESIGN

Full user controls plus a left-right hose attachment option makes it a great choice for tech diving configurations.

MK19 EVO/G260

MK25 EVO/G260

C-SERIES

Breathe smoothly and silently, at all depths, and all tank pressures, with the air-balanced C370. It's compact & lightweight size make it the ideal choice for dive travelers, female divers and smaller-sized divers. Teamed with the compact, balanced diaphragm MK11 first stage, the C370 is your new favorite travel regulator. Pack it in your dive bag and get ready for some blue-water adventures – anywhere, anytime.

MK11/C370

MSRP//\$639.00

The C370 is the perfect travel companion – compact and lightweight, plus it's an easy breather delivering lots of dependable airflow. Fully adjustable, the C370 includes an inhalation effort control knob along with a small coaxial dive/pre-dive lever. Offering great performance at a mid-tier price, with the C370 in your dive bag you'll be ready to hit the water.

AIR-BALANCED

Effortless airflow at all depths and supply pressures with rock-solid reliability.

TRAVEL FRIENDLY

Lightweight, compact, easy to handle.

BUILT TO LAST

Rugged fiberglass-reinforced nylon casing can take abuse.

FULL USER CONTROLS

Allow you to regulate inhalation effort plus prevent freeflows, both at depth and on the surface.

R-SERIES

Built with classic downstream technology, R-Series 2nd stages are rugged, reliable and economical. With their versatile left or right hose routing capability, they are perfect choices for use on stage or pony bottles, or as octopus regulators. And when teamed with the time-honored MK2 EVO you get a regulator system with proven performance.

MK2 EVO/R195

The R195 design is based on the heritage of the classic R190 second stage, reengineered with modern features and materials. Its simple and robust construction offers the utmost in reliability.

BUILT TO LAST

Rugged fiberglass-reinforced nylon casing can take abuse.

LARGE PURGE BUTTON

Easy to activate, even wearing thick gloves.

MK2 EVO/R105

new

The MK2 EVO/R105 is the regulator system of choice for new divers as well as avid recreational divers looking for a basic backup breathing system. This classic downstream combo is durable, reliable and affordable.

COMPACT CASING

Includes a durable, anti-scratch front cover and reliable metal barrel inside.

HI-FLOW MOUTHPIECE

Improves air flow as well as mouth comfort, fitting all mouth sizes.

MSRP//\$499.00

MSRP//\$519.00

OCTOPUS REGS

SCUBAPRO octos come with high-visibility yellow purge covers and 39-inch-long yellow Superflow hoses with oversized bores that allow more air to flow on each inhalation. These are must-have backup breathers for easy buddy-sharing when you need it most.

R095 OCTO

A super-simple classic downstream design. It has no user controls – simply put it in your mouth and breathe.

CONVENIENT

Preset Inhalation and Venturi-Initiated Vacuum Assist (VIVA) provides hassle-free air delivery.

ULTRA-COMFORTABLE

Orthodontic mouthpiece is easy to grip and doesn't inhibit air flow.

MSRP//\$199.00

R105 OCTO

new

Dependable breathing performance in a classic downstream design with a dive/pre-dive VIVA switch and reversible hose attachment.

COMPACT CASING

Includes a durable, anti-scratch front cover and reliable metal barrel inside.

HI-FLOW MOUTHPIECE

Improves airflow as well as mouth comfort, fitting all mouth sizes.

MSRP//\$229.00

R195 OCTO

MSRP//\$279.00

REINFORCED TECHNOPOLYMER DESIGN

Features a large second stage casing and diaphragm for the ultimate in breathing sensitivity.

REVERSIBLE HOSE ATTACHMENT

Increases mounting options for quick and easy deployments.

S270 BALANCED OCTO

MSRP//\$319.00

The ideal safe second stage for your dive system, the S270 Balanced Octo can always be counted on to deliver top-notch breathing performance.

AIR-BALANCED DESIGN

Smooths out the inhalation effort when diving at varying depths and supply pressures.

DIVE/PREDIVE SWITCH

A simple turn of a Venturi-Initiated Vacuum Assist (VIVA) switch prevents free flows when the regulator is not being used.

HI-FLOW MOUTHPIECE

Super comfortable, it is made with FDA-approved silicone and features a large cross-section to maximize airflow.

DIVE COMPUTERS

AWESOME TECHNOLOGY. INCREDIBLY INTUITIVE.

The personal dive computer's ability to monitor depth and bottom time, track nitrogen loading and calculate decompression helps make diving safer, easier, and a lot more fun. But not all dive computers are created equally. That's why divers choose SCUBAPRO.

UNIQUE, ADVANCED, AMAZING.

SCUBAPRO's dive computers have set the standard for performance and inventiveness. SCUBAPRO's Swiss-based designers and engineers know what divers want in their computers, and they deliver, from the revolutionary Aladin Pro to the game-changing Galileo to the next generation G3, the slim and modern Luna 2.0, and the innovation-award-winning Galileo HUD. When it comes to advanced technology, SCUBAPRO computers are designed to amaze.

A SCUBAPRO COMPUTER TO MEET EVERY DIVE CHALLENGE.

SCUBAPRO's expansive dive computer line includes console computers, wrist-mount computers, compact, wristwatch-style computers that do double-duty as stylish topside timepieces, along with a revolutionary mask-mounted, hands-free dive computer. All models are upgradeable, so you can keep up with the latest in software and technological advancements. Whether you're looking for a fully-loaded multi-gas, air-integrated computing powerhouse or an inexpensive backup, there's a SCUBAPRO dive computer ready to go diving with you.

YOUR BODY SPEAKS. SCUBAPRO LISTENS.

Human Factor Diving™ is SCUBAPRO's revolutionary approach to product development that combines Human Factors Engineering, biometrics and wearable technology to create cutting-edge devices that help make diving safer and more fun. Human Factor Diving™ keeps you at the center of the experience – before, during, and after your dive. SCUBAPRO computers are designed to be incredibly intuitive, easy to use, and most importantly, they are able to provide detailed, on-the-spot personal data.

GALILEO COMPUTERS

G3 (GALILEO 3) new

MSRP//\$1300.00

SCUBAPRO's premium watch-style dive computer combines a modern display with a classic timepiece look. It's everything you need in a dive computer with the comfort, appearance and utility of an everyday wristwatch.

EASY READABILITY

Large, high-contrast color display and bright backlight.

MODERN SCREEN DISPLAY

Customize your data presentation with Light, Classic, Full or Graphical screen options.

CLASSIC DIVERS WATCH

Digital or traditional analog display with a rotatable timing bezel coated with self-luminescent minute markings.

6 DIVE MODES

Nitrox, Trimix, CCR, Sidemount, Gauge & Freediving.

2 ALGORITHMS

Predictive Multi-Gas Bühlmann ZHL-16 ADT MB PMG or ZHL-16 GF (Gradient Factors).

SPORT MODE

Includes a swim stroke counter, activity counter and stopwatch for topside sports.

WIRELESS AIR INTEGRATION

Compatible with the SCUBAPRO Smart+ Pro transmitter for tank pressure monitoring.

G2 CONSOLE

MSRP//\$1284.00

PORTRAIT-SHAPED DISPLAY

Screen is familiar and very easy to read at depth.

QUICK-DISCONNECT

Air-integration system enables you to separate computer from HP hose for easy post-dive data downloading, traveling, and safe storage.

ULTRA-DURABLE BOOT

Protects the casing against bumps and includes hose protection to safeguard the quick-disconnect fitting.

DIVE MODES

Scuba, Gauge and Trimix.

GALILEO HUD HANDS-FREE DIVE COMPUTER

YOUR DIVE DATA HAS NEVER LOOKED SO GOOD.

The Galileo HUD is a revolutionary mask-mounted, hands-free dive computer that displays easily viewable, critical dive information right in front of you. Never again do you have to take your eyes off your surroundings to view your dive data.

HUD: MSRP//\$1197.00

HUD AND TRANSMITTER: MSRP//\$1554.00

EASY TO READ “FLOATING” DISPLAY

Micro OLED screen mounts on a diving mask in close proximity to the human eye. Using precision near-eye optics, this “floating” display creates a screen image that allows you to keep your eyes on both your dive data and the underwater scenery at the same time.

HANDS-FREE DATA MONITORING

Constant, easy-to-view dive data right in front of you for more dive freedom.

SINGLE-KNOB USER CONTROL

When it's time to change screens or make adjustments, an intuitive push-wheel allows you to access functions with one hand.

FLIP-UP HINGE

Convenient Flip-Up feature enables you to tilt the display up and out of the way. When it's time to resume data monitoring, simply tilt the display back down into position and you're ready to track your dive.

A CHOICE OF ALGORITHMS

Predictive Multi-Gas Bühlmann **ZH-L16 ADT MB PMG**, or **ZH-L16 GF [Gradient Factor]** for technical diving.

SELECTABLE DIVE MODES

Scuba, Gauge, Freediving, Trimix, Nitrox & CCR.

UP TO 8 SELECTABLE GASES

In Scuba mode and 2 set points for CCR diving.

WIRELESS AIR INTEGRATION

Compatible with the SCUBAPRO smart transmitter for tank pressure monitoring.

G2 WRIST (GALILEO 2)

MSRP//\$1014.00

Curved ergonomic low-profile shape sits comfortably on the arm. It can also be used on a retractor.

FULL COLOR DISPLAY

Vibrant colors enable maximum readability produced by the TFT (Thin-Film Transistor) dot matrix LCD screen.

USER FRIENDLY

Ultra-intuitive with a simple 3-button control system and loads of diver-friendly functions.

CUSTOMIZABLE MENU & DISPLAYS

You choose how much G2 technology you need and how you want it displayed - Light, Classic, Full & Graphical.

AIR INTEGRATION

Monitors tank pressure, provides true remaining bottom time [RBT], and allows air consumption to be factored into the decompression calculation.

MULTIPLE DIVE MODES

Scuba, Freediving, Gauge, CCR, Trimix and Sidemount for total in-water versatility.

EASY NAVIGATION

Excellent full-tilt digital compass includes compass rose and bearing memory.

G2 TEK new

MSRP//\$1014.00

Designed specifically for technical divers, the G2 Tek replaces SCUBA-PRO's Predictive Multi-Gas ZHL-16 ADT MB algorithm, found on the G2, with the GF algorithm which provides additional options for increased conservatism. The G2 Tek also comes with bungee straps in place of a traditional wrist strap and a blue bezel to differentiate it from the standard G2.

LUNA 2.0 COMPUTERS

new

MODERN OIL-FILLED SLIM DESIGN.

SCUBAPRO's Luna 2.0 wrist-mount computers are sleek, intuitive, and loaded with easy-to-use features. Designed to be among the thinnest of dive computers, they offer reliable performance and always sit securely and comfortably on the wrist. Luna 2.0 dive computers are rated to 394 feet and come with soft silicone blue arm straps plus bungee mounts to allow for alternate securing methods.

EASY-TO-USE DESIGN

Great for new divers and casual recreational divers.

SUPER THIN HOUSING

Is oil-filled and sits comfortably on the arm.

WIDE, HIGH-CONTRAST LCD DISPLAY

Features large characters for easy reading at depth.

INTUITIVE MENU

Plus 2-button control lets you navigate effortlessly through the system.

NITROX COMPATIBLE

Up to 100% O2 with 3 selectable gasses.

PROFILE DEPENDENT INTERMEDIATE STOPS

Calculates an intermediate stop based on N2 loading, current and previous dives, and breathing mixes for safer diving.

6 MICROBUBBLE LEVELS

You can adjust the level of conservatism in the algorithm to match your experience level, age and physical conditioning.

3 DIVE MODES

Scuba, Gauge, and Apnea.

BLUETOOTH LOW ENERGY INTERFACE

Lets you download dives to any iOS or Android device or PC/Mac.

UPDATEABLE FIRMWARE

User-updated by going to scubapro.com.

LUNA 2.0

new

The ultimate entry-level dive computer, offering all the features and functions you need for diving the depths.

PROVEN ALGORITHM

Predictive Multi-Gas Bühlmann ZH-L16 ADT MB for recreational diving or ZH-L16 + Gradient Factor for technical diving.

MSRP//\$510.00

LUNA 2.0 AI

new

Offering all of the easy-to-use features of the Luna 2.0 plus more advanced functions that let you take your diving to the next level.

WIRELESS AIR-INTEGRATION

Monitors tank pressure and provides true remaining bottom time (RBT) calculations based on the workload from breathing.

BIOMETRIC INTEGRATION

With the Digital Heart Rate Monitor (sold separately), records heartbeat and skin temperature that can be factored into the decompression calculation along with workload.

CHOICE OF 2 ALGORITHMS

Predictive Multi-Gas Bühlmann ZH-L16 ADT MB for recreational diving or ZH-L16 + Gradient Factor for technical diving.

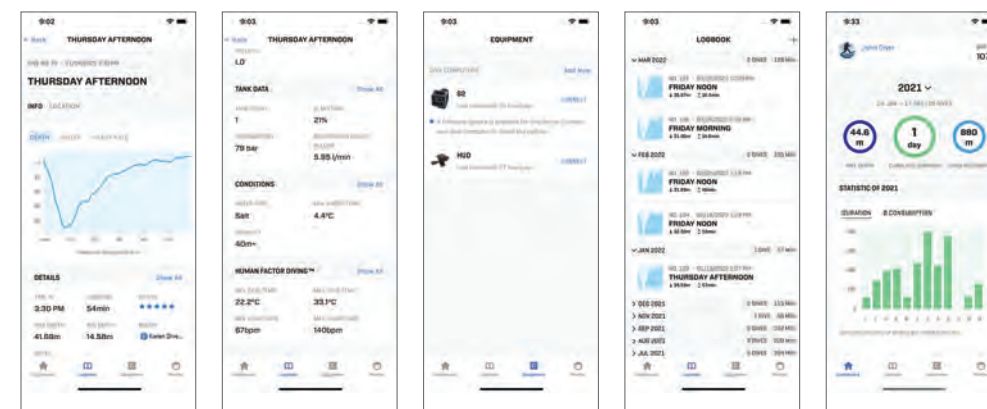

MSRP//\$579.00

LOGTRAK 2.0

new

LogTRAK 2.0 is a cloud-based mobile dive logbook. You can download, store and share your dive logs, easily review key dive data, analyze biometrics, adjust dive computer settings, update dive computer firmware and much more, all from your mobile device. It's the perfect way to view your dives, keep them organized and easily access them wherever you go. You can download the application from the App Store for iOS and from the Google Play Store for Android.

ALADIN COMPUTERS

LIVE YOUR LIFE IN DIVE MODE.

Offering just the right balance of topside features, underwater functions and ease of use, the A1 and A2 dive computers will become an integral part of not just your diving life, but your everyday life as well.

SHARP HYBRID MATRIX DISPLAY

With large numbers that are easy to read underwater, even in adverse conditions.

INTUITIVE MENU

And 4 button control make it easy to navigate through the system.

LIGHTWEIGHT DESIGN

Is so comfortable on the wrist you won't want to take it off.

MICROBUBBLE LEVELS

Let you adjust the level of conservatism in the algorithm to match your experience level, age and physical conditioning.

BLUETOOTH LE INTERFACE

Lets you download dives to any iOS or Android device or PC/Mac. Firmware can be user-updated by going to scubapro.com.

Dahu, Hawaii

A1

The A1 is a single-gas nitrox dive computer designed for new divers and casual recreational divers looking for a simple wrist-style computer that can be worn on the surface as well as underwater.

ZH-L16 ALGORITHM

Accommodates single-gas Nitrox capability from 21% to 100% O2.

3 DIVE MODES

Scuba, Gauge, and Freediving.

SPORT MODE

Provides sport-related functions like a swim stroke counter and stopwatch.

MSRP//\$550.00

BACKLIT

A2

Designed for Advanced Divers who appreciate the compactness and convenience of a wrist-style dive computer, but demand the kind of features that enable them to excel in their sport.

AIR-INTEGRATED

Wireless air-integration can handle multiple transmitters and provides true remaining bottom time (RBT) based on your workload from breathing.

DIGITAL TILT-COMPENSATED 3D COMPASS

Allows for easy surface and underwater navigation.

PMG ZH-L16 ADT MB ALGORITHM

Accommodates 8 gases (21-100% O2) plus 2 in CCR mode.

MULTIPLE DIVE MODES

Scuba, Gauge, Freediving, Trimix, Sidemount and CCR.

ADVANCED SPORT MODE

Offers sport-related functions like a swim stroke counter, activity counter (pedometer) and stopwatch.

HEART RATE AND SKIN TEMPERATURE MONITOR

Records heartbeat and skin temperature that can be factored into the decompression calculation along with workload (with SCUBAPRO HRM Belt only; sold separately).

MSRP//\$765.00

BACKLIT

ALADIN ARM STRAPS

COLORED STRAPS: MSRP//\$74.00

ALADIN NYLON STRAP: MSRP//\$77.00

PVD METAL STRAP: MSRP//\$314.00

TRANSMITTER SMART+ PRO

Compact design features a built-in LED on top of the cap that provides a visual estimate of tank pressure. It screws into a high pressure port on your first stage and relays tank pressure and true remaining bottom time (RBT) to the computer screen.

MSRP//\$399.00

SWISS DESIGN
ENGINEERING

HEART RATE AND SKIN TEMP MONITOR

Factoring your heart rate into your decompression calculations helps make diving safer and a lot more fun. A lightweight waterproof transmitter is clipped on to the elastic belt that straps around the chest, directly against the skin. This belt wirelessly transmits your heart rate data to your SCUBAPRO personal dive computer. Compatible with all air-integrated SCUBAPRO dive computers.

MSRP//\$139.00

ALADIN MATRIX

AFFORDABLE COMPUTERS LOADED WITH FEATURES.

Aladin Matrix computers deliver impressive computing power, eye-pleasing screens and intuitive navigation systems. Available in three models, while they share many functions, each comes with unique features that enable you to match the right model to your individual diving style.

ALADIN ONE (MATRIX): **MSRP//\$421.00**

ALADIN SPORT (MATRIX): **MSRP//\$463.00**

ALADIN H (MATRIX): **MSRP//\$783.00**

INSTRUMENTS & CONSOLES

DIGITAL 330M: **MSRP//\$370.00**

Electronic data delivery system provides actual and maximum depth, ascent speed, dive time and temperature. Rated to 330m/1000ft.

DEPTH GAUGE, WRIST MOUNT: **MSRP//\$159.00**

Oil-filled Bourdon tube design in an impact-resistant nylon case.

2-GAUGE COMPACT CONSOLES

Sturdy, ergonomic and compact consoles for depth and pressure or pressure and compass.

COMPACT METAL PG, STD DG (A): **MSRP//\$239.00**

COMPACT PLASTIC PG, COMPACT DG (B): **MSRP//\$220.00**

COMPACT PLASTIC PG, STD DG (C): **MSRP//\$236.00**

COMPACT METAL PG, COMPACT DG (D): **MSRP//\$295.00**

3-GAUGE IN-LINE CONSOLES

Pressure and depth gauges with 35-degree-tilt FS-2 or FS-1.5 compass.

PLASTIC GAUGES/FS-1.5 COMPASS (A): **MSRP//\$293.00**

METAL GAUGES/FS-2 COMPASS (B): **MSRP//\$399.00**

PRESSURE GAUGES

Compact instruments reading 0-400 bar. Dual gauge model displays imperial and metric units simultaneously.

METAL WITH BRASS CASE (A): **MSRP//\$150.00**

COMPACT ALL-METAL DUAL, PSI/BAR (B): **MSRP//\$173.00**

COMPACT PLASTIC CASE (C): **MSRP//\$132.00**

COMPASSES

FS-1.5 calibrated to the Northern Hemisphere, or the FS-2 for both Hemispheres.

FS-2: **MSRP//\$137.00**

FS-1.5: **MSRP//\$114.00**

F-1.5 W/RETRACTOR: **MSRP//\$138.00**

CORE FEATURES

FOR SCUBAPRO DIVE COMPUTERS

Microbubble levels: A range of microbubble levels allows your body to either take up less nitrogen or off-gas more before returning to the surface. Both work toward reducing the amount of microbubbles present in the body at the end of the dive.

Predictive Multi-Gas (PMG): Lets you enjoy the full benefits of carrying high-oxygen-concentration mixes in addition to your main breathing gas. The computer calculates the decompression schedule for all possible gas combinations and adapts the calculation accordingly.

Continuous average depth reading: Available in gauge mode and can be reset by the user anytime.

Profile-Dependent Intermediate Stops (PDIS): Calculates an intermediate decompression stop based on how much nitrogen uptake your body has endured, taking into account your current dive, previous dives, and breathing mixes.

Enriched air (Nitrox): 21%-100%. The ppO2 is adjustable between 1 and 1.6 bar.

Gauge mode: Turns off all warnings and alarms (except low-battery alerts) and monitors depth, time, and temperature without decompression calculations.

Logbook: Records depth, temperature, and heart rate profiles with a 4-second sampling rate, which can be downloaded to a phone, handheld device or PC/Mac.

Freediving mode: A collection of features developed for freedivers, including a faster sampling rate, manual start, specialized alarms and warnings, adjustable water density, and specific logbook. [Not available on the G2 Console or Aladin H.]

Altimeter: Measures altitude and alerts you when approaching an altitude incompatible with saturation status after a recent dive.

Bookmark: Allows you to highlight specific moments with a simple button press.

Active back light: With push-on and push-off function.

Replaceable battery: By user or dealer.

BCDS

TAKE CONTROL.

The buoyancy compensator device (BCD) is the backbone of scuba rig. A well-designed BCD holds the tank firmly in place, routes HP and LP hoses, and provides clipping-off points for accessories. It offers a high-security integrated weight ditch system and roomy cargo pockets. It also arms you with an efficient system of inflate and exhaust valves for maintaining neutral buoyancy and controlling ascents and descents. And it does all this while maintaining a streamlined profile and stability at depth.

DIVE-TESTED.

SCUBAPRO BCDs go far above and beyond in compliance standards, and they are built to last. SCUBAPRO's commitment to quality shows in every detail and material. Engineers subject BCDs to laboratory tests as well as actual dive testing in harsh conditions, helping ensure maximum ruggedness. This test diving occurs in varied environments, in scenarios from tropical to ice diving. Rest assured that a SCUBAPRO BCD will deliver outstanding performance on the day you buy it, and continue to do so deep into your diving future.

DIVER-TRUSTED.

SCUBAPRO BCDs not only surpass all industry testing and certifications; they are also consistently top-rated for comfort, fit and stability at depth while providing buoyancy and ascent control. Divers know their SCUBAPRO BCDs can be counted on to provide years of trouble-free service.

HYDROS FAMILY

COMFORTABLE, CUSTOMIZABLE.

A true breakthrough in design, dive comfort and convenience, the HYDROS PRO and HYDROS X are the most feature-rich, customizable and comfortable BCDs ever created.

PERFECT FIT

When you are wearing the HYDROS PRO or HYDROS X you won't even know it's there. Each model molds to your specific body shape, and is designed with body grip gel, providing extreme comfort and stability.

ULTRA-DURABLE

Monprene® construction means durability. The HYDROS PRO and HYDROS X stand up to UV, chemicals, and abrasion without showing typical signs of wear.

CUSTOMIZE AND ACCESSORIZE

Easily add, remove, or replace weight systems, bungees, D-rings, accessories and pockets to make the HYDROS PRO and HYDROS X truly your own. With a wide range of mountable accessories and kits, your options are endless.

SPECIALIZED SIZES FOR MEN & WOMEN

Offered in 4 sizes for men [S, M, L, XL-2XL] and 3 sizes for women [XS-S, M, L]. Buoyant lift ranges from 29.2lbs to 44.9lbs for men, and 29.2lbs to 40.5lbs for women, depending on size and model.

HYDROS PRO SHOWN

Indonesia

HYDROS PRO

2-IN-1 BCD

The HYDROS PRO includes both Trav-Tek straps and a fully integrated weight system. So with a quick switch of clips, you can transform it from an integrated-weight BCD to a lightweight harness travel BCD. Now you only need one BCD for both local diving and travel.

MODULAR DESIGN

Virtually every component, including buckles, can be added, removed or replaced by an authorized dealer without stitching.

BODY-MOLDING

Back plate and harness system deliver maximum comfort and stability at depth.

MULTI-MOUNT ACCESSORY MATRIX

Multiple D-Rings and mounting points for a knife + light + SMB + hoses + crotch strap and much more.

TRAVEL FRIENDLY

The HYDROS PRO goes everywhere with you. Lightweight and compact, with a unique smart-pack design, the HYDROS PRO also comes with a customized backpack designed to fit your entire dive kit.

ACCESSORIES (SOLD SEPARATELY)

- Bungee Loops for mounting SMBs, dive lights, octo hoses, etc.
- Mini D-Ring Set for attaching clips, retractors, etc.
- Knife & Accessory Plate for mounting standard BCD knives.
- Add-on roll-up Ninja pocket & thigh cargo pocket.
- Counter weight pockets.

MSRP//\$55.00

HYDROS X

ULTIMATE FIT & COMFORT

Monprene® shoulders and back-pad conform to your specific body shape, and rotating quick-release shoulder buckles allow you to route your shoulder straps to optimize fit.

ULTRA DURABLE

Monprene® shoulders and back-pad are extremely resistant to UV, chemicals and abrasion, and the new EndurTex high-tenacity 420 nylon fabric bladder can handle years of dive use.

PLENTY OF STORAGE

Two big zippered cargo pockets are easily accessible, even when the weight pouches are fully loaded. Two stainless steel D-rings provide additional clip-on points for carrying extra gear.

INTEGRATED WEIGHT SYSTEM

Flat-buckle quick-release weight pouches ditch quickly and easily.

EASY TO ACCESSORIZE

The HYDROS X features a Multi-Mount Accessory Matrix with multiple D-Rings and mounting points that easily attach various dive accessories.

WITH BPI: **MSRP//\$1169.00**

WITH AIR 2: **MSRP//\$1329.00**

BALANCED POWER INFLATOR

The Balanced Power Inflator [BPI] has a streamlined and ergonomic design. The inflation button is easy to locate and requires little effort. A soft mouthpiece has been added. The corrugated hose features an easy to use SQAP lever and a connection between hose and elbow valve.

MSRP//\$159.00

AIR2 5TH GEN BACKUP INFLATOR REGULATOR

As a backup regulator the 5th generation AIR2 breathes like a dream. For pinpoint buoyancy control, the AIR2 fits comfortably in the hand and the large inflate and deflate buttons are easy to distinguish. For reliable performance without dangling hoses, the AIR2 is a standout. It is CE-certified for waters 50°F or warmer.

MSRP//\$319.00

FRONT ADJUSTABLE

GO

Lightweight, easy to pack and extremely comfortable, the GO is a true travel BCD while offering all the performance and convenience features you'd expect from a full-featured front-adjustable BCD.

TRAVEL FRIENDLY

Lightweight BCD folds easy and stows in its own travel bag.

ROTATING QUICK-RELEASE SHOULDER BUCKLES

Allow you to optimize the routing of your shoulder straps to maximize comfort & fit.

INTEGRATED WEIGHT SYSTEM

Quick-release weight pouches ditch easily and secure with low-profile squeeze buckles.

PATENTED QUICK CINCH TANK BUCKLE

Requires minimal effort to buckle & easily adjusts to fit any tank.

WITH BPI: **MSRP//\$724.00**

WITH AIR 2: **MSRP//\$889.00**

QUICK CINCH BUCKLE

LEVEL

The Level brings together all the performance and comfort features you need for any recreational diving scenario. It is lightweight, extremely rugged, and really delivers when it comes to comfort, making it an excellent choice for recreational divers everywhere.

COMFORT & CONFIDENCE

Wraparound bladder hugs your body without squeeze.

MAXIMUM STABILITY

Super Cinch tank buckle system locks the tank in solid and stable.

INTEGRATED WEIGHT SYSTEM

Quick-release pouches each hold up to 11lbs of ballast and ditch easily.

BUILT-IN TRIM WEIGHT POCKETS

Each hold up to 4.4lbs/2kg of weight to help maintain a well-balanced dive position.

WITH BPI: **MSRP//\$639.00**

WITH AIR 2: **MSRP//\$799.00**

GLIDE AND BELLA

updated

With wraparound air bladders and special Y-Fit shoulder designs, the Bella, made specifically for women, and the Gilde are full-featured, front-adjustable BCDs designed to maximize comfort, fit and performance. These BCDs are easy to use and extremely stable at depth.

NEW BACKPACK PADDING

A more streamlined design increases comfort and decreases unwanted buoyancy for maximum control at depth.

LARGER ZIPPERED CARGO POCKETS

Offer more easy-access storage space for carrying those must-have dive accessories.

IMPROVED INTEGRATED WEIGHT SYSTEM

Positions the weight pouches over the cargo pockets, making it easier to manage both cargo and ballast lead.

WITH BPI: MSRP//\$759.00

WITH AIR 2: MSRP//\$919.00

BACK FLOTATION

SEAHAWK 2

The Seahawk 2 embodies the latest and greatest evolution of the popular Seahawk back-inflation BCD.

REDESIGNED SHOULDER ERGONOMICS

With rotating buckles improves fit, helps distribute the load and enhances stability.

WEIGHT INTEGRATION

Quick-release pouches secure with low-profile buckles, backed by two rear trim pouches to create a comfortable swimming position.

SUPER CINCH STAINLESS STEEL TANK BAND

Positioned lower on the backpack and teamed with a second Velcro strap to optimize tank security.

WITH BPI: MSRP//\$829.00

WITH AIR 2: MSRP//\$989.00

REBEL

Specially designed and sized for divers who are too small for standard BCDs, the front-adjustable Rebel's wraparound bladder delivers a stable and secure ride at depth.

INTEGRATED WEIGHT SYSTEM

Front integrated gravity release weight pockets load easily and release weights quickly.

PADDED BACKPACK

Provides extra cushion for greater comfort when strapped to a tank.

ADJUSTABLE FIT

Two different sized cummerbunds, adjustable sternum strap and shoulder strap buckles and clips easily adapt the size range to optimize fit and comfort.

MSRP//\$519.00

LITEHAWK

The ultimate back-flotation travel BCD, the Litehawk is lightweight and delivers a comfortable, stable ride at depth. It has an ultra-slimmed-down design and its soft, flexible backpack lays flat and compact for packing.

COMPACT & LIGHTWEIGHT DESIGN

Soft backpack and low-profile rear air cell are perfect for dive travel.

CLUTTER-FREE ERGO HARNESS

Eliminates bulk and enhances freedom of movement.

EASY ADJUSTMENTS

Rotating quick-release buckles optimize the routing of the padded shoulder straps to maximize fit.

WITH BPI: MSRP//\$559.00

WITH AIR 2: MSRP//\$719.00

STABILIZING

CLASSIC

The Classic builds on decades of evolution in design and technology. This highly regarded BCD incorporates RF welding technology with the "Stab" jacket's unbeatable buoyancy control, performance and durability.

ULTRA DURABLE

Constructed of puncture-resistant, polyurethane-coated 420 denier nylon with RF welding.

HIGH LIFT CAPACITY

Provides from 33.7lbs to 80.9lbs of buoyant lift, depending on size.

SUBSTANTIAL GEAR STORAGE

Two large Velcro pockets with knife attachment grommets, plus two additional zippered pockets, provide lots of cargo-carrying capability.

WITH BPI: **MSRP//\$989.00**

WITH AIR 2: **MSRP//\$1149.00**

Florida Keys

BACKPLATE & WING

S-TEK PRO SYSTEM PACKAGED SETS

The S-Tek Pro System's revolutionary design is built tough and loaded with features, helping to make your time at depth more comfortable and enjoyable. This system features a 3D formed back plate with harness that includes adjustable TEK LOC shoulders to help ensure a snug fit and molded Monprene® pads that provide cushioning without creating bulk or inherent buoyancy. For convenience, the system is sold as a comprehensive kit. Each backplate [Stainless Steel or Aluminum], donut wing and single tank adapter can also be purchased separately.

DIVE SUITS

SCUBAPRO IS THE EXPERT IN THERMAL PROTECTION.

SCUBAPRO dive suits set the standard for comfort, style and thermal protection. Every feature is expertly designed and engineered to keep you protected throughout your entire dive, be it in warm equatorial currents or the frigid waters of the Arctic. Whatever the ocean demands, SCUBAPRO dive suits deliver.

SCUBAPRO engineers believe that a dive suit line is a technical gear category that deserves continuous R&D. That's why SCUBAPRO dive suits undergo a continual evolution in materials, pattern know-how and features.

For example, a number of SCUBAPRO dive suits are built using the Pure Design Concept, which involves fewer panels and seams, allowing maximum stretch and freedom of movement. Various advanced thermal linings are also used, including Diamond Span, and variations like diagonal back zippers are used to simplify self-donning and reduce stress on the zipper mechanism. Each model is specially designed for optimal function, protection and comfort.

SCUBAPRO DIVE SUITS MEET AND EXCEED ALL INDUSTRY CERTIFICATIONS.

All SCUBAPRO wetsuits, semi-drys and drysuits 3mm and thicker must pass the PPE (Personal Protective Equipment) tests, which are required in Europe. Additional testing under these standards includes resistance to high and low temperature testing, sea water resistance testing, resistance to repeated pressurization in water testing, immersed thermal resistance testing, tensile strength of thermal insulating material testing, tensile strength of seams testing, tensile strength of closures testing, resistance to permanent material deformation testing, and finally, actual dive testing.

CLASS A Water temperature between 7°C/45°F and 12°C/54°F.

CLASS B Water temperature between 10°C/50°F and 18°C/64.5°F.

CLASS C Water temperature between 16°C/60.8°F and 24°C/75.2°F.

CLASS D Water temperature > 22°C/72°F.

DRYSUITS

EVERTECH DRY BREATHABLE

Lightweight and breathable on deck, dry and comfortable at depth, this premium trilaminate suit is designed for avid divers and is loaded with features. Top quality throughout, updated semi-rigid dive boots improve comfort and non-slip capability, a neoprene neck collar protects the latex seal, and two large cargo pockets provide lots of storage space. This drysuit will keep you dry and comfortable in all water conditions.

OH-SO-COMFORTABLE

Breathable nylon/PU/nylon trilaminate design allows body perspiration evacuation, but keeps water out.

ERGO BOOTS

They protect your feet from beach rocks and shells and keep you from slipping on wet boat decks, yet are soft and comfy.

QUALITY SI-TECH VALVES

Ensure efficient and trouble-free airflow control to maintain warmth and buoyancy.

CLIMB IN, ZIP UP, ALL BY YOURSELF

Front diagonal BDM metal dry zipper not only keeps water out, it makes self-donning easy.

HASSLE-FREE FIELD REPAIRS

With the Si-Tech ring system you can easily replace damaged latex wrist and neck seals, or switch them out for optional silicone seals.

CARRY MORE STUFF

Two large cargo pockets equipped with D-rings, blue bungee, high-security over-flaps and Velcro closures for accessories.

MSRP//\$2559.00

DRYSUIT BAG

BUNGEE POCKET DETAIL

SI-TECH TRIGON P-VALVE

With no buttons or moving parts to contend with, the Trigon P-valve provides effortless, hands-free relief for maximum comfort for the duration of your dive.

MSRP//\$140.00

DRYSUIT BOOT

A sturdy boot that handles the most rugged shoreline terrain. Designed to fit comfortably over the sock of any drysuit.

MSRP//\$125.00

NEOPRENE DRYSUITS

EVERDRY 4MM

MSRP//\$1668.00

SCUBAPRO is known for our neoprene drysuits, and the Everdry 4 demonstrates why. This premium-plus high density neoprene drysuit offers the streamlined fit, comfort and flexibility of a wetsuit with the thermal properties and watertightness of a drysuit.

BUILT TO LAST

Seams are triple-glued and double-thread blind-stitched on the outside; inside they are coated with liquid polymer to create a long-lasting water-proof seam.

WARM & COMFORTABLE

Gray plush interior lining is comfortable and enhances cold water protection. Smooth-skin fold-under neoprene neck seal and ultra-smooth wrist seals provide comfortable, watertight sealing surfaces.

SUPER-SOFT FOOTWEAR

Neoprene soft socks can be worn inside heavy-duty drysuit boots or standard neoprene dive boots. They also enable the suit to be turned completely inside-out for cleaning and drying.

QUALITY COMPONENTS

Si-Tech balanced side-activated inlet and adjustable outlet valves allow for pinpoint buoyancy control, increasing stability and control at depth.

EXODRY 4MM

MSRP//\$1587.00

Illustrating SCUBAPRO's commitment to innovation in all areas of dive equipment design, the premium-plus Exodry 4 fuses 4mm high-density neoprene with latex wrist and neck seals. This hybrid design is extremely effective, delivering minimal inherent buoyancy, maximum range of motion and an excellent sealing system. The Exodry 4 offers all of the construction, comfort and convenience features as the Everdry 4, with these additional features:

NEOPRENE COLLAR

Made of neoprene, it covers the latex neck seal to eliminate cold spots and increase comfort.

ERGO DIVE BOOTS

They protect your feet from beach rocks and shells and keep you from slipping on wet boat decks, yet are soft and comfy.

SEMI-DRY SUIT

The semi-dry concept is simple: Combine the fit of a wetsuit with some of the sealing elements of a drysuit. It's a smart solution for staying warm and relatively dry in cold or temperate water environments.

NOVASCOTIA 7.5MM TEMPERATE-WATER THERMAL PROTECTION

MSRP//\$899.00

Snug-fitting and flexible, the NovaScotia keeps you very warm and relatively dry while exploring the depths. With its easy-zip YKK Aquaseal Vislon dry zipper, Diamond Span plush lining, double zippered seals on ankles and wrists and long list of convenience features, the NovaScotia offers the ultimate fit, warmth and durability in cold-water and multi-dive thermal protection. Hood included.

All SCUBAPRO drysuits come with a hood, carry bag, low pressure hose, repair kit, and owner's manual.

Channel Islands, CA

DRY GLOVES

OBERON DRY GLOVE SYSTEM

Here's a convenient and reliable method for attaching virtually any model of dry glove to a Släggö Flex Ring. Developed and manufactured by Si Tech, the Oberon Dry Glove System consists of 13 components per arm, connects to large and medium Släggö Flex Rings, and fits most common dry glove models (not included). The Släggö Flex Ring is a modular quick-change solution designed to make it easy to replace a broken or torn wrist seal on a drysuit.

EASY TO MOUNT & USE

For each arm the system includes an Oberon Ring (with Lock and Release Ring, Rubber Ring and O-Ring), a Glove Ring, 4 O-Rings, and red, green, blue and yellow Spanner Rings.

LOCK & RELEASE RING

Is made of rubber for maximum grip, plus it protects the O-ring from dust.

MSRP//\$384.00

DRY GLOVES

These versatile drysuit gloves come with a comfortable high-viz yellow liner. Resistant to puncturing and tearing, the anatomic shape of the gloves allows prolonged use without increasing hand fatigue. They are designed to be used with an Oberon Dry Glove System (sold separately). Available in three sizes.

MSRP//\$149.00

EASY DON

High quality, vulcanized, elastic cuff, latex gloves for use with dry, semi-dry and wet suits. With separate interior knitted glove for additional warmth.

MSRP//\$193.00

K2 DRY SUIT UNDERGARMENTS

The undergarments of choice for drysuit diving, the K2 line keeps you warm while you're diving dry. Sporting a modern, eye-catching design, these undergarments are available in two thicknesses to suit a variety of thermal warmth requirements.

K2 LIGHT TEMPERATE-WATER THERMAL PROTECTION

Pants and long-sleeve tops, made with a light grid plush material [164g/m²] that's breathable, warm and stretchy. Includes elastic wrist loops on the tops and heel straps on the pants. Compatible with semi-dry and tight fit dry suits.

TOP: MSRP//\$86.00

PANTS: MSRP//\$86.00

TOP

PANTS

K2 EXTREME COLD-WATER THERMAL PROTECTION

One-piece steamer design made of a breathable and stretchy dual fleece material [629 and 919 g/m²] for maximum thermal protection. Includes compression padding on shoulders, chest and knees, hip pockets with zippers, and elastic wrist loops, heel straps and p-valves holes on legs

K2 Socks are designed to be worn inside drysuit boots to keep your feet toasty warm.

MSRP//\$418.00

LEGENDARY WETSUIT PROTECTION.

Because SCUBAPRO uses high quality neoprene and industry-leading design and engineering, our 7.5mm neoprene dive suits are CE certified Class A suits, 5mm suits are CE certified Class B suits, and our premium Everflex Yulex® 3/2mm is CE certified a Class C suit.

SCUBAPRO DIVE SUITS ARE LOADED WITH FEATURES.

ANTI-ABRASION MATERIALS

In all high-stress areas for longer suit life.

EXCLUSIVE LININGS

Like Diamond Span allow for quicker draining and drying.

DIAGONAL BACK ZIPPERS

Provide long-term durability and ease of use.

THERMAL SEALS

On wrists and ankles minimize water intrusion.

PROTECTING DIVERS & THE OCEAN.

From the introduction of X-Foam, petroleum-free limestone neoprene, to the usage of solvent-free glue, and now to YULEX® dive plant-based foam made from certified-natural rubber in our premium Everflex wetsuit line, SCUBAPRO continues to find ways to better protect divers and reinforce our long-standing commitment to help protect our planet.

A SCUBAPRO DIVE SUIT TO MEET EVERY DIVING CHALLENGE

When divers think gear, they think SCUBAPRO, and dive suits are no exception. Available in a variety of thicknesses with a variety of features, and available at a variety of price points, there is a SCUBAPRO dive suit for every diver, every dive scenario, and every budget. Offering a comfortable fit, durability and excellent thermal protection, SCUBAPRO dive suits are simply the best.

EVERFLEX YULEX® WOMEN'S WETSUIT SHOWN

EVERFLEX YULEX®

YULEX® dive: Plant-based foam made from FSC-certified-natural rubber. 100% neoprene-free. YULEX® dive is specifically formulated to resist wetsuit compression while diving.

MAXIMUM COMFORT. 100% NEOPRENE-FREE.

SCUBAPRO's premium Everflex steamers are known for their award-winning comfort features and superb thermal protection, making them the wetsuits of choice among divers the world over. Built with YULEX® dive plant-based foam made from certified-natural rubber and assembled using an eco-friendly solvent-free glue, multi-thickness panels provide more foam around the body's core to keep you warmer for longer, while thinner foam in the extremities increases flexibility and comfort. All Everflex YULEX® steamers come with a Diamond Span water-draining inside lining that features a second lining for improved stretch and cold-water protection.

EVERFLEX YULEX® 7.5/5MM

new

MSRP//\$759.00

CE certified as a Class A dive suit.
Rated for water temperatures ranging from 45°F to 54°F.

EXCLUSIVE PURE DESIGN CONCEPT

Uses fewer seams & panels for better fit and unrestricted range of motion.

THERMAL SEALS

Internal cuff seals with zippered cuffs on ankles & wrists for watertightness and easy donning.

EVERFLEX YULEX® 5/4MM

new

MSRP//\$579.00

CE certified as a Class B dive suit.
Rated for water temperatures ranging from 50°F to 64.5°F

EXCLUSIVE PURE DESIGN CONCEPT

Uses fewer seams & panels for better fit and unrestricted range of motion.

THERMAL SEALS

Internal cuff seals with zippered cuffs on ankles for water tightness. combined with fuse-cut wrists for easy donning

EVERFLEX YULEX® 3/2MM

new

MSRP//\$495.00

CE certified as a Class C dive suit.
Rated for water temperatures ranging from 60.8°F to 75.2°F.

EXCLUSIVE PURE DESIGN CONCEPT

Uses fewer seams & panels for better fit and unrestricted range of motion.

THERMAL SEALS

Fust-cut finished cuffs on ankles & wrists are super stretchy for easy donning.

DEFINITION

Definition & Sport suits are made from X-Foam, a petroleum-free limestone neoprene.

All SCUBAPRO dive suits thicker than 1.5mm are assembled using a solvent-free glue, a 100% green process.

DEPENDABLE THERMAL PROTECTION.

Definition steamers offer more stretch, more comfort and more features than ever before. Special tailoring and strategically placed panels in the chest area, sides, arms and legs, and behind the knees, create a suit that fits like a glove and provides extra stretch where it's needed most. This level of thermal protection is well-suited for active temperate-water and warm-water divers.

DEFINITION 5MM

Delivering outstanding thermal protection, this suit features seamless single arm and leg stretch panels with double zippered seals to make donning and doffing even easier. Abrasion-resistant printed shoulders, elbow and knee pads cover more exposed areas and increase long-term durability.

Certified as a Class B dive suit.
Rated for water temperatures ranging from 50°F to 64.5°F.

MSRP//\$454.00

DEFINITION 3MM

This 3mm dive suit takes many of the exterior design elements found on the Definition 5mm and includes special tailoring to create a suit that fits the body like no other. Single zippered seals on ankles and wrists feature YKK brass sliders for durability, water-tightness and ease of use.

Certified as a Class D dive suit.
Rated for water temperatures above 72°F.

MSRP//\$337.00

DEFINITION SHORTY 2.5MM

Stylish and sporty, the Definition Shorty is great for layering and tropical conditions. Made from ultra-soft neoprene, this shorty offers the perfect level of warmth and comfort for tropical diving.

MSRP//\$147.00

DEFINITION 1.0MM

new

Delivering optimal comfort and flexibility, this new lightweight steamer is made with 1mm X-foam neoprene with a Nylon 2 Sides lining. Easy-to-use diagonal rear zipper, abrasion resistant panels and foot loops to prevent ride-up make this steamer durable and comfortable to wear.

MSRP//\$271.00

DEFINITION TOP 1MM

new

The new Definition Top looks good and delivers a boost of warmth in the core torso area where you need it most. Thumb loops plus an additional loop at the hem prevent ride-up when wearing beneath a wetsuit. Ideal for pool training or as a base layer beneath a wetsuit when diving or snorkeling.

MSRP//\$137.00

SPORT

SOFT AND STRETCHY.

Sport suits are great for new divers, casual divers, and first-time suit buyers who enjoy diving in moderate to shallow depths. These suits are made of ultra-soft neoprene and feature a triathlon cut for enhanced range of motion in the shoulders and arms.

SPORT 5MM

The 5mm Sport offers must-have thermal protection for recreational divers who love leisurely warmer water diving. Softer and more flexible neoprene makes it easy to put on and take off, maximizes range of motion and improves overall comfort. Includes wrist and ankle zippers.

CE certified as a Class B dive suit.

Rated for water temperatures ranging from 50°F to 64.5°F.

MSRP//\$399.00

SPORT 3MM

The 3mm Sport is a super-comfortable dive suit designed for the tropics. The perfect choice when heading to the islands, this suit is built with flatlock stitching which is comfortable against bare skin, a vertical rear zipper and plush-lined single-cuff ankles and wrists.

CE certified as a Class D dive suit.

Rated for water temperatures above 72°F.

MSRP//\$214.00

SPORT 0.5MM

new

Made from extremely soft 0.5mm neoprene with a stretchy lining, this new lightweight steamer is comfortable, easy to don and doff and includes printed kneepads for long-term durability.

MSRP//\$183.00

SPORT SHORTY 2MM

This stylish shorty offers lots of warmth, comfort and stretch for tropical divers. Made from ultra-soft 2mm neoprene with an inside/outside polyester lining, the shorty features a triathlon cut that allows for lots of freedom of movement in the shoulder areas plus a vertical-cut rear zipper.

MSRP//\$138.00

EVERFLEX YULEX® 3MM LONG SLEEVE TOP & PANT

new

This functional 2-piece ensemble is offered as an alternative to the Everflex YULEX® 3/2 steamer. Super flexible, the top is fitted with a vertical front zipper, and wrists and ankles feature fuse-cut finished cuffs that are super-stretchy for easy donning. The abrasion-resistant fabric print on the seat and knees protects the pant, and a fabric print on the shoulders protects the top from BCD wear.

LONG SLEEVE TOP: MSRP//\$299.00

PANT: MSRP//\$249.00

EVERFLEX YULEX® 5/3MM HOODED VEST

new

MSRP//\$299.00

Wear this hooded vest with a SCUBAPRO steamer or shorty and enjoy increased thermal protection in your core area. The vest provides 5mm of foam in front and back with 3mm side panels to increase range of motion. To warm the head area the hood offers 3mm of thermal protection and a 2mm face seal.

EVERFLEX YULEX® 2MM HOODED VEST

new

MSRP//\$159.00

A lighter-weight version of the 5/3mm hooded vest. Wear it by itself or for layering to increase warmth and comfort. Both vest and hood offer a black stretch polyester inside lining, and the hood comes with a face seal.

EVERFLEX YULEX® 2MM WOMEN'S SLEEVELESS SWIMSUIT

new

MSRP//\$149.00

This stylish swimsuit is perfect for pool training or ocean swimming in warm water destinations. It can also be worn as a first layer in an exposure protection ensemble.

EVERFLEX 1.5MM

TOP CHOICE IN TROPICAL THERMAL WEAR.

SCUBAPRO's Everflex 1.5mm family of neoprene tops, pants, leggings and shorts offer warmth, comfort, lots of range of motion and protection from scrapes and stings, plus they dry quickly. Made with high-stretch neoprene with a fleece/plush inner lining, these garments are ideal for tropical diving, snorkeling or pool training. Wear them alone or together for a total warm-water ensemble. They're great for layering too.

TOPS

These form-fitting tops in men's and women's styling feature slightly higher neck collars for comfort and to prevent BCD chafing. Thumb holes on the long sleeve models prevent ride-up when used as an under layer. Women's long sleeve top includes a front zipper for easy donning and doffing.

LONG SLEEVE: MSRP//**\$214.00**

SHORT SLEEVE: MSRP//**\$199.00**

SHORTS

Warm and cozy and they dry quickly. The high-stretch neoprene offers excellent range of motion. Men's shorts feature a drawstring waist; women's shorts include a high waist to optimize comfort.

MEN'S
AEGEAN

MSRP//**\$120.00**

LEGGINGS AND PANTS

Flattering leggings for women and full-length pants for men protect against stings and abrasion plus provide outstanding thermal protection. They're form-fitting and stretchy and dry quickly.

MEN'S
AEGEAN

MSRP//**\$215.00**

HYBRID

WARM WATER SEPARATES.

Built with a mix of quality 1mm X-Foam neoprene for warmth and durable nylon for stretch and comfort, this family of blended garments is certainly unique. On the underside of the nylon panels a micro-plush interior enhances comfort. This fleece fabric absorbs less water, which keeps heat against the body, increasing overall warmth.

HYBRID LONG SLEEVE TOP 1MM

MSRP//**\$112.00**

With smooth-skin 1mm neoprene in the torso area and high-stretch nylon material on the sides, sleeves and collar, this stylish warmer can be worn by itself or as a thermal under-layer beneath a traditional wetsuit. It can also act as a barrier to the sun's rays when snorkeling or swimming, and it dries quickly.

HYBRID MENS CARGO PANTS & SHORTS

Comfortable and stretchy, the Hybrid Cargo Shorts form-fit to your body. Designed to be worn by themselves or over a dive suit, they include an adjustable waist belt and two large cargo pockets for carrying money, sunglasses or other accessories when enjoying a day on the beach or dive boat.

The Hybrid Cargo Pants offer all the features of the Hybrid Cargo Shorts in a full-length design for total lower body comfort and protection.

CARGO PANT: MSRP//**\$167.00**

CARGO SHORT: MSRP//**\$135.00**

HYBRID HOODED VEST 1MM

MSRP//**\$84.00**

This Hybrid vest's ultra-comfortable neoprene/nylon blend does a great job of protecting your torso and head, two critical areas for minimizing heat loss, providing comfort, warmth and protection where you need it most. Wear it by itself or over a long sleeve thermal rash guard to increase warmth and protection.

HOODS

Constructed of the same high-stretch and warm materials of our Everflex suits for maximum comfort and durability. Silver-skin lining feels good against the skin and provides a good seal to minimize water transfer.

EVERFLEX BIBBED HOODS 6/4MM AND 3/2MM: MSRP//**\$95.00**

This hood provides comfortable head protection with a warmth-enhancing bib design made of 100% high-stretch Everflex Nylon and a comfortable plush inside lining. Face seal cuts down on heat loss from water transfer.

EXODRY/EVERTECH DRYSUIT HOOD 6/4MM: MSRP//**\$95.00**

This hood is made for the Exodry and Evertech drysuits. Comfortable diamond span inner lining enhances cold-water protection.

EVERFLEX HOOD 3MM: MSRP//**\$82.00**

A welcome thermal addition for warm-water diving. This 3mm hood features a smart design and pattern, plus a plush interior lining for comfort. No face seal.

NOVASCOTIA/EVERDRY DRYSUIT HOOD 6/4MM: MSRP//**\$95.00**

This hood is made for the Novascotia semi-dry and Everdry drysuit. Comfortable diamond span inner lining enhances cold-water protection. Has 2 snaps on the back to attach to the suit

FOOTWEAR

When diving, your entire body needs to be protected from the cold, and that includes your feet. SCUBAPRO draws on decades of experience in design, materials and construction, which is why SCUBAPRO boots and socks are the best.

HEAVY DUTY 6.5MM: MSRP//**\$114.00**

Built to handle the tough stuff, this boot is durable and comfortable, making it the ideal wetsuit boot for cold water and harsh conditions. With a Diamond Span interior for improved warmth and heavy-duty anti-slip sole to protect feet from sharp surfaces.

DIAMOND SPAN LINING 

EVERFLEX 5.0MM: updated MSRP//**\$93.00**

The Everflex Arch Boot just might be the most comfortable dive boot you've ever slipped your foot into. The innovative arch design matches the foot's natural anatomy for the ultimate in comfort, creating a cramp-free fit.

DIAMOND SPAN LINING 

DELTA 5.0MM: MSRP//**\$86.00**

Best-selling dive boot for comfort and protection. Sturdy outsole and rubberized armor provide excellent protection and increase comfort when traversing rocky shorelines, yet still feel light on the foot.

BASE 4.0MM: MSRP//**\$67.00**

The 4mm Base Boot is an economical and durable boot built for temperate water diving. The long zipper makes it easy to put the boot on and secures with a Velcro tab.

 Bimini, Bahamas

DELTA SHORT 3.0MM: MSRP//**\$61.00**

This comfortable 3mm short boot is designed for tropical diving and snorkeling. Low-cut, lightweight, with just the right amount of protection, it slips on and off without the need for a zipper.

GO SOCK 3.0MM: MSRP//**\$59.00**

Designed to be worn with the GO travel fin. Also ideal for tropical beaches and training pools.

HYBRID SOCK 2.5MM: MSRP//**\$46.00**

Soft neoprene, textured sole and plush interior lining for warmth and comfort. Expanded sizing is great for smaller divers.

K2 SOCK: MSRP//**\$40.00**

Designed to be worn inside drysuit boots to keep feet toasty warm. Made from breathable fleece material.

KAILUA BEACHWALKER: MSRP//**\$36.00**

This popular water shoe provides lots of breathable comfort while allowing water to drain.

GLOVES

Nothing ruins a dive faster than cold hands or barnacle-cut fingers. SCUBAPRO's extensive line of super-comfortable gloves delivers five-fingered warmth and protection for all water temperatures and all diving conditions.

EVERFLEX 5.0MM: MSRP//\$72.00

Made from extremely soft and flexible neoprene, this 5mm cold water glove offers the ultimate in warmth and comfort while providing maximum finger dexterity.

DIAMOND SPAN LINING 

EVERFLEX 3.0MM: MSRP//\$60.00

Made from extremely soft and flexible neoprene, it offers excellent warmth, comfort and protection while its contoured shape provides maximum finger dexterity.

DIAMOND SPAN LINING 

D-FLEX 2.0MM: MSRP//\$49.00

Delivering the perfect balance of warmth and protection for tropical diving, this super-soft glove's contoured shape provides a comfortable fit. A textured non-slip palm lets you maintain a good grip.

SEAMLESS 1.5MM: MSRP//\$54.00

This lightweight 1.5mm glove is an extremely soft, flexible and tactile hand warmer. Using heat taping instead of traditional stitching provides extra dexterity in the fingers, making it easier to push dive computer buttons and handle gear at depth.

TROPIC 1.5MM: MSRP//\$43.00

The ever-popular Tropic glove features unique patterns and comes in colors that match other SCUBAPRO gear. This soft tropical glove features a 1.5mm neoprene back for comfort and warmth, plus an Amara fabric layer on palm to protect against punctures.

AEGEAN FLAMINGO GRAY CARIBBEAN

UPF

DESIGNED TO PERFORM, WORN FOR FUN IN THE SUN.

When it comes to protection from the elements, SCUBAPRO's UPF Collection has you covered. Built with the best technical materials available to ensure the highest quality, the UPF Collection protects you above the surface from harsh UV rays and below the surface from stings and abrasion. Choose from a variety of tops, steamers and leggings in Men's and Women's styling.

Created by divers for divers – with thoughtful details like non-abrasive seams and high necklines to ensure the gear looks great and functions well.

- Stands up to the elements – stands out anywhere.
- Stylish skin protection increases comfort during warm-water dives and surface fun.
- Designed to be worn by themselves or under a wetsuit.
- The perfect choice for before, during and after a dive.
- Materials dry quickly to enhance comfort between dives.
- Made from 86% super-soft nylon/14% spandex (T-Flex) or high-quality polyester fabric.
- Flattering color panels and cut.
- Highly versatile – ideal for snorkelers, paddle boarders, swimmers and other water enthusiasts too.

FINS

TRUSTED FIN TECHNOLOGY.

SCUBAPRO offers a selection of fins to suit every diver and every dive scenario, from time-honored traditional to high-tech modern, blade fins and split fins, adjustable and full foot.

BLADE FINS

Traditional Blade Fins tend to be simple in design with relatively stiff blades that produce lots of feedback. Fins of this type are known for their ability to generate lots of thrust, making them smart choices if you have to move through the water carrying a lot of gear. Technical and commercial divers tend to favor this type of fin. SCUBAPRO's rugged Jet Fin remains the best example of the traditional fin design.

Modern Blade Fins represent fin technology at its finest. With their innovative designs and advanced materials and construction, these fins dominate the field in kicking performance and comfort. They are more flexible than traditional blade fins so you can generate a lot of power without over-stressing legs and ankles, yet they're stiffer than split fins so they excel in low-speed cruising and maneuverability. SCUBAPRO's award-winning Seawing Supernova offers an innovative blade fin shape that brings speed and power to the next level.

SPLIT FINS

Split Fins are fun. Featuring "propeller technology," they're quick and nimble, and by keeping the fins within your body's slipstream and using a relaxed flutter kick, you can comfortably cover a lot of ground without cramping leg muscles or straining ankles. Split fins don't offer as much feedback as blade fins do, which can take some getting used to, but for divers looking for acceleration, speed and efficiency, these fins are just the ticket.

OPEN HEEL FINS

Also referred to as "adjustable" fins, these kickers are designed to be worn with boots, making them the fins of choice for temperate and cold-water diving. However, they also have a solid following among warm-water divers, especially those who do beach entries over rocky shorelines. Their adjustability means you can use them with different boots while always maintaining a snug, cinched-up fit.

FULL FOOT FINS

Full foos are designed to be worn barefoot, making them favorites among tropical boat divers. Full foos feel good on the feet and contribute to that sense of freedom you get when cruising the depths wearing minimal neoprene. They also tend to be smaller and lighter than adjustable fins, making them ideal traveling companions. However, because there's no adjustability, more care must be taken in sizing.

SEAWING SUPERNOVA

MSRP//\$299.00

The Seawing Supernova represents the next generation of powerful SCUBAPRO fins. Offering the ultimate in performance, construction, fit and versatility, the Supernova is the go-to fin for avid recreational and professional divers seeking maximum speed, power and kicking control in all diving conditions.

INNOVATIVE BLADE SHAPE

Produces more power, more speed and better maneuverability.

CENTRAL PANEL MEMBRANE

Auto-adjusts the angle of attack based on kicking strength, providing easier kicking when cruising and maximum power when needed.

PIVOT CONTROL TECHNOLOGY

Ensures that the most efficient 40° to 50° range of angle of attack is always maintained.

TWIN-TIP WINGLETS

Improve control and maneuverability for excellent frog and alternate kicks.

TWO-PIECE DESIGN

Blade and foot pocket are molded separately with a durable Socket-Lock Connecting System that makes transport easy and increases versatility.

MONPRENE® ELASTOMER CONSTRUCTION

Virtually indestructible for long-lasting durability.

OPTIONAL FULL-FOOT FOOTPOCKET (SOLD SEPARATELY)

Easily replace the open heel foot pocket with a full foot footpocket for warm-water diving.

SOLD PRE-ASSEMBLED

MASKS

TECHNOLOGY AT ITS BEST.

With SCUBAPRO, you dive clear-eyed and comfortable. SCUBAPRO masks are available in a variety of styles with a choice of features to suit your diving style.

SINGLE LENS

The absence of a solid nose bridge creates a broad, uninterrupted view of the underwater world. When looking slightly off-center it enables you to maintain binocular vision, a real plus for some divers.

TWIN LENS

Lenses are positioned closer to the eyes to increase peripheral vision while decreasing internal volume, making them easier to clear. Twin lens masks are also better-suited to prescription lenses.

SIDE WINDOWS

By adding an additional side window on each side of the mask, more light is allowed in, creating a more open airy feel, while increasing peripheral vision.

BLACK & CLEAR SKIRTS

Black skirts block out distracting light and reflections and reduce glare. This makes them popular among photographers, hunters and divers with light-sensitive eyes. Clear skirts let in lots of light, creating a more open effect, and if the skirt is transparent, it can actually expand field of view. Divers prone to claustrophobia or who dive in darker water favor clear skirts.

PURGE VALVES

The one-way purge valve is a handy feature. Located in the nose pocket, a purge valve makes clearing water from the mask easy – all you have to do is exhale.

Masks showing this ICON are compatible with the hands-free Galileo HUD.

Similar to a ski goggle strap, the Comfort Strap attaches easily to a variety of mask models.

Our Ultra Clear lenses do not have the greenish tint of normal glass, and offer exceptional clarity under water.

Forms a watertight seal on virtually any face, allowing for a secure fit without sacrificing comfort.

D-MASK

ICONIC DESIGN, INCREDIBLE COMFORT.

Sharing the sleek styling of the D-Series D420 regulator, the D-Mask is a premium mask well-suited for all types of diving. This low-volume, wide-view mask is available in a choice of skirt sizes and features true color UV protective lenses that deliver the best balance of surface protection and underwater clarity. The mask also features an interchangeable lens system for optional optical lenses. A Comfort Strap is included.

D-MASK

MSRP//\$215.00

UNRIVALED LENS CLARITY

True color UV protective lenses offer protection from UV light on the surface without affecting colors under water.

PERFECT FIT

D-Mask comes with a choice of black or clear skirts in medium or narrow as well as in a special wide fit.

OPTICAL ENHANCEMENT

Interchangeable lens system makes it easy to install optional optical lenses (ranging from -1.5 to -5.0 or +1.5 to +4.0 in .5 diopter increments).

BI-FOCUS LENSES

Optional bi-focus lenses can be interchanged to correct for farsightedness (ranging from +1.0 to +3.0).

MAXIMUM COMFORT

Rotating buckles work with the black-on-black Comfort Strap to optimize range of motion for a comfortable, watertight fit.

HUD ADAPTER

Is included for mounting a GALILEO HUD hands-free dive computer.

COLOR KITS: MSRP//\$26.00

Are available in Black, Blue, Turquoise, Pink and Yellow for color-coordinating with your fins, masks and dive wear.

SYNERGY MASKS

SYNERGY MINI MASK

Downsized design, with a smaller frame and skirt to accommodate smaller faces. The special TruFit skirt is extremely comfortable and ensures a watertight seal, and the dual lens design is low volume and offers a wide field of view. The mask comes with a color-coordinated Comfort Strap.

TRUFIT TECHNOLOGY

Silicone skirt near the mask frame is thicker and firmer with a matte finish for additional support and rigidity. The silicone contouring the face is thinner, providing a pliable, comfortable watertight seal.

SYNERGY 2 TRUFIT

Single lens mask features a thin, soft inner skirt for fit and comfort, and a separate, thicker outer skirt to provide support near the mask frame. Called the most comfortable dive mask on the market, you have only to try on a Synergy 2 TruFit to feel the difference.

SILVER/BLACK MIRROR: MSRP//\$179.00

SYNERGY 2 TWIN TRUFIT

Dual lens TruFit design incorporates not one but two separate silicone skirts — a thin, soft inner skirt for fit and comfort, and a thicker outer skirt to provide support near the mask frame. An ideal combination, it creates the ultimate in comfort for virtually all face shapes.

SNORKELS

WITH SCUBAPRO SNORKELS YOU CAN ALWAYS BREATHE EASY.

The ideal snorkel is always within reach when it's time to do some surface swimming. SCUBAPRO snorkels are hydro-dynamically designed for exceptional breathing performance, feature purge valves for easy clearing and specially-designed silicone mouthpieces for maximum comfort.

Have it your way with a variety of SCUBAPRO snorkel designs perfectly matched for scuba diving, snorkeling, or both.

DRY TOP

This design completely seals the upper tube when the snorkel is submerged, so upon resurfacing no clearing is needed.

SEMI-DRY

This design's splashguard top limits the amount of water able to enter the airway, making it easier to clear the snorkel.

OPEN TOP

Traditional design with a bare upper tube. Some are designed to be folded and stowed in a BCD pocket.

PURGE VALVES

One-way valves positioned just below the mouthpiece make clearing a snorkel much easier, because rather than having to force unwanted water out the top of the tube with a massive blast of air, you can expel it out the bottom of the tube using gravity and just a puff of air.

SPECTRA DRY

Large-bore tube allows plenty of airflow. Dry top closes when submerged so no clearing is needed upon resurfacing.

MSRP//\$80.00

TURQUOISE

FUSION DRY

Modern design features a splashguard top and a lower flex hose. The comfortable silicone mouthpiece is interchangeable.

MSRP//\$75.00

YELLOW

NEXUS

Low-drag design features a splashguard top and angled purge to divert bubbles out of your line of sight. The snorkel easily attaches to your mask strap, and can be folded and stowed in an accessory pocket.

MSRP//\$80.00

RED

Grand Cayman Islands

SPECTRA

new color

Semi-dry splashguard top deflects surface splash while the rigid upper tube provides plenty of airflow. Lower purge valve takes care of any water that enters the airway. Convenient corrugated lower tube hangs out of the way when not being used.

SNORKELING

JUMP IN, THE WATER'S WONDERFUL!

Open your eyes to a whole new world. The water is warm and clear and the sea life is flourishing. All you have to do is cruise along on the surface and enjoy the view.

Before you jump in, make sure you're outfitted with SCUBAPRO's ultra-comfortable snorkeling equipment. With options to fit every type and size of diver, the only thing left to do is grab your gear and go. We offer a full line of high-quality, long-lasting and stylish snorkeling gear for every type of adventure.

MASKS

Comfortable to wear while providing a clear-eyed view of the underwater world.

SNORKELS

Easy-breathers enable you to keep your eyes on the underwater prize as you're swimming along on the surface.

FINS

Compact, lightweight and easy to use, they propel you through the water with minimum effort.

COMBO KITS

Color-coordinated masks, snorkels and fins perfectly matched for performance and style.

SNORKELING VESTS

A little extra buoyancy makes snorkeling stress-free and fun.

UPF COLLECTION

And don't forget our full line of stylish UPF rash guards for protection on the surface from harsh UV rays and below the surface from stings and abrasion.

RUBBER FULL FOOT

A classic SCUBAPRO fin for both scuba diving and snorkeling. Featuring all-rubber construction for maximum durability, the open-toe, full foot design offers lots of comfort while providing solid kicking performance for tropical watersports. Available in a wide range of sizes, including smaller sizes to accommodate smaller divers. This is an excellent all-purpose fin for dive resorts.

CRUISER SNORKELING VEST

The secret to enjoying safe and stress-free snorkeling is being comfortable on the surface. The Cruiser snorkeling vest is constructed of durable nylon and stretchable neoprene to provide maximum comfort and a snug fit. The inflatable front bladder provides extra buoyancy for comfort while snorkeling. It's offered in high-visibility yellow for surface safety and includes a security pocket for stowing accessories. Available in 7 sizes from XS - 3XL.

CURRENTS LARGE/SMALL VEST

This easy-to-use high-visibility yellow vest comes in two sizes - large and small - to accommodate all snorkelers. The high visibility yellow increases safety and fun by providing additional buoyancy support on the surface. The adjustable strap lets any sized snorkeler dial in a snug and comfortable fit.

SMALL: MSRP//\$82.00

LARGE: MSRP//\$84.00

LIGHTS

TAKE THE LEAP WITH SCUBAPRO DIVE LIGHTS.

Unveil the mysteries of night diving, or turn the most routine day dive into a memorable adventure, with a SCUBAPRO Nova light. Light-years ahead in design, Nova lights are equipped with high-intensity LED's that provide brilliant illumination. Producing higher lumens than most primary dive lights - including many pistol-grip styles - and out-pacing virtually all secondary dive lights, Nova lights lead the market in sheer light intensity. Brilliant illumination, lots of burn time and ease of use - Nova lights deliver on all counts.

- Rugged aluminum body includes a rugged matte black finish with blue accents, combining lightweight long-term durability and a high-quality look.
- Extended light head shroud prevents the light beam from blinding other divers.
- Double O-ring seals ensure watertight integrity.
- Multiple operating modes to extend burn time.
- Over-pressure valve releases battery off-gassing, a great safety feature.
- Special Safety Lock mode on Nova 850 lights prevents accidental activation.

NOVA 850R / 850R WIDE

The Nova 850R and 850R Wide delivers intense illumination, ideal for lighting up the dark spaces and bringing out the vibrant colors on night dives as well as day dives. For divers looking for a powerful yet compact rechargeable dive light, these get the job done.

850R - DIMENSIONS 6.3 X 1.8",
8 DEGREE BEAM

NOVA 850R WIDE

MSRP//**\$237.00**

NOVA 850 TEC

This rugged single-mode dive light delivers intense 850 lumen illumination with a focused 8° beam. Machined from heavy-duty aluminum, it is lightweight and built to last, and with simple twist-on/twist-off activation it is also easy to use. The light comes with an attachment point for attaching to a D-ring and delivers up to seven hours of burn time on three C-cell batteries (sold separately).

DIMENSIONS: 9.6 X 1.8"

MSRP//**\$119.00**

NOVA 250

The Nova 250 is a versatile dive light that can be stored in the smallest BCD pocket. It offers three modes: 100% power, 50% power and Flash, plus is equipped with an over-pressure valve to release battery off-gassing, making it the safest small light on the market. Batteries not included.

DIMENSIONS: 3.9 X 1"

BAGS

TRANSPORT YOUR EQUIPMENT WITH TOTAL CONFIDENCE.

Whether it's transporting gear from the trunk of the car to the dive boat, from the hotel to the beach, or from home to halfway around the world, gear bags play a major role in the active diver's life. SCUBAPRO's extensive line of dive bags has been designed with the specific needs of divers in mind. Each bag is engineered for strength and durability, providing just what you need to get you and your gear where you want to go.

ROLLER BAGS

- Made from a combination of 420D Nylon NT and 450D Rip-stop for strength and durability.
- Reinforced saltwater-resistant wheels can stand up to long-term use.
- Telescopic double-bar tow handle or adjustable top pull handle for maximum bag control.

- Padded lift and carry handles let you conveniently tote or heft the bag over uneven terrain.
- Durable YKK saltwater-resistant double-slider zippers allow for easy access to main compartments.

DRY BAGS

- 100% dry to protect gear and valuables while out on diving tours or other outdoor activities.
- Built with a blend of 500D nylon (85%) and polyester (15%) backed by a TPU coating.
- YKK weatherproof zipper or reliable roll-and-close sealing systems protect contents from the elements.
- Backpack straps make for effortless gear hauling.

SPECIALTY BAGS

- Mesh bags, duffel bags, regulator bags, beach bags, mask bags, weight bags and more, all designed to stow your gear, protect your gear, make traveling easy and diving more fun.

Bimini, Bahamas

DIVE 'N ROLL LIGHT

This 2-in-1 wheeled bag concept takes the hassle out of dive travel. The back portion of the main compartment is semi-rigid and provides outstanding protection. Remove the soft top bag for carry-on convenience, then zip them together and you're ready to roll again.

DIMENSIONS (APPROXIMATE): 26X16X13IN.
WEIGHT: 8.77LBS.
VOLUME: 22.2GAL.

MSRP//\$442.00

CARAVAN BAG

Easy to move from the car to the boat or roll through an airport, the Caravan is the ideal large dive gear storage and travel bag. Features include a corrosion-resistant zipper, reinforced saltwater-resistant wheels, exterior side pockets and telescopic handle.

DIMENSIONS (APPROXIMATE): 30X16X14IN.
WEIGHT: 10.25LBS.
VOLUME: 28GAL.

MSRP//\$287.00

DRY 120

Built with a blend of 500D nylon (85%) and polyester (15%) backed by a TPU coating. Reinforced base and saltwater-resistant wheels.

DIMENSIONS (APPROXIMATE): 34X16X14IN.
WEIGHT: 5.73LBS.
VOLUME (MAIN COMPARTMENT ONLY): 31.4GAL.

MSRP//\$400.00

XP PACK DUO

Lightweight yet durable, this rolling dive bag is an ideal gear carrier for world travelers. It now offers two main compartments instead of just one, with new internal mesh pockets for organizing smaller items. Size complies with new IATA rules.

DIMENSIONS (APPROXIMATE): 32X17X14IN.
WEIGHT: 11.24LBS.
VOLUME: 31.2GAL.

MSRP//\$338.00

PORTER BAG

Although a bit smaller than its predecessor, you still get lots of volume for transporting gear. Reinforced "off-road" skate-style roller wheels plus a backpack system let you easily roll or shoulder the bag wherever you want to go.

DIMENSIONS (APPROXIMATE): 34X23X14IN.
WEIGHT: 5.84LBS.
VOLUME: 45.4GAL.

MSRP//\$232.00

DUFFEL BAG, HEAVY-DUTY

This rugged gear transport duffel is simple yet highly practical. It is made of heavy-duty material for maximum durability, yet is lightweight and folds easily. Features include a double-slider U-shaped zipper for easy gear loading, compression straps for security, plus side handles and double duffel straps for lifting and carrying.

DIMENSIONS (APPROXIMATE): 26X13X10IN.
WEIGHT: 2.40LBS.
VOLUME: 14.3GAL.

MSRP//\$142.00

DRY 45, DRY 15 & DRY 5

The Dry 45 and Dry 15 are backpack-style dry bags that are ideal for transporting gear while providing protection from water, sand and dust. A comfortable padded backpack system makes for effortless gear carrying. The Dry 5 is a compact dry bag made from a super-light fabric, perfect for keeping valuables safe and dry.

DRY 45: **MSRP//\$150.00**

DIMENSIONS (APPROXIMATE): 76X33X20IN.
WEIGHT: 1.43BS. VOLUME: 11.6GAL.
(MAIN COMPARTMENT ONLY).

DRY 15: **MSRP//\$111.00**

DIMENSIONS (APPROXIMATE): 23X10X6IN.
WEIGHT: 0.96LBS. VOLUME: 4.0GAL.
(MAIN COMPARTMENT ONLY).

DRY 5: **MSRP//\$28.00**

DIMENSIONS (APPROXIMATE): 17X8X5IN.
WEIGHT: 0.10LBS.
VOLUME: 1.3GAL (MAIN COMPARTMENT ONLY).

MSRP//\$120.00

REPORTER BACKPACK

A full 15% smaller than its predecessor, you get more inside padding and three roomy compartments.

DIMENSIONS (APPROXIMATE): 14X9X18IN.
WEIGHT: 1.98LBS.
VOLUME: 9.5GAL.

MSRP//\$28.00

MASK 2

Protect your mask and its lenses from damage. Includes two Velcro loops on back for attaching your favorite snorkel. Made from 600D polyester PU and 450D Rip-stop for strength and durability.

DIMENSIONS (APPROXIMATE): 7X5.5X3IN.
WEIGHT: 0.32LBS.
VOLUME: 0.5GAL (MAIN COMPARTMENT ONLY).

WEIGHT 7

Carry your ballast weight safely and with ease. Double-handle webbing encircles the entire bag for added strength. Made from durable 600D polyester PU and 450D Rip-stop.

DIMENSIONS (APPROXIMATE): 12X6X6IN.
WEIGHT: 0.86LBS.
VOLUME: 1.9GAL (MAIN COMPARTMENT ONLY).

MSRP//\$34.00

MESH 'N ROLL

A mesh water-draining bag is a diver's favorite. SCUBAPRO's convenient wheeled mesh bag, made from heavy-duty PVC-coated mesh, translates into less post-dive hassle transporting a bag full of water-soaked gear.

DIMENSIONS (APPROXIMATE): 31X15X14IN.
WEIGHT: 5.73LBS.
VOLUME: 27.2GAL.

MSRP//\$152.00

FOLDED

MESH BAG

This popular duffel-style dive bag is made of durable coated nylon mesh that lets water drain easily. Roomy enough – and strong enough – for a full set of gear, it is still lightweight and folds easily for storage.

DIMENSIONS (APPROXIMATE): 29X16X13IN.
WEIGHT: 1.10LBS.
VOLUME: 25.0GAL.

MSRP//\$79.00

MESH SACK

Durable nylon mesh backpack is perfect for carrying snorkeling gear or tropical dive gear. Includes padded shoulder straps.

DIMENSIONS (APPROXIMATE): 28X16X16IN.
WEIGHT: 1.10LBS.
VOLUME: 28.8GAL.

MSRP//\$50.00

REGULATOR BAG + COMPUTER BAG

Make sure your regulator, gauges and dive computer are protected for your next dive outing. Rip-stop nylon.

REGULATOR BAG:

REGULATOR BAG DIMENSIONS (APPROXIMATE): 14X10X4IN.
WEIGHT: 0.93LB.
VOLUME: 2.4GAL.

COMPUTER BAG:

DIMENSIONS (APPROXIMATE): 4X3X6IN.
WEIGHT: 0.22LB.
VOLUME: 0.3GAL.

REGULATOR BAG

COMPUTER BAG

MSRP//\$47.00

TRAVEL REG BAG VINTAGE

Features a large main compartment with straps to secure your regulator while in transit. Heavy-duty PVC (Tarpaulin).

DIMENSIONS (APPROXIMATE): 13X13X4IN.
WEIGHT: 1.59LBS.
VOLUME: 2.6GAL.

MSRP//\$76.00

BEACH BAG

Designed for a complete snorkel set with extra compartments for keys and wallet. Top handle and shoulder strap provide convenient carrying.

DIMENSIONS (APPROXIMATE): 28X11X2IN.
WEIGHT: 0.99LB.

VOLUME: 9.6GAL

MSRP//\$90.00

OCEAN CLEAN UP BAG

new

Do your part to keep the oceans clean by carrying a SCUBAPRO Cares Ocean Clean Up Bag folded away in a BCD pocket. Fabric and mesh construction allows water to flow through, minimizing drag, plus makes for easy cleaning after returning to the surface.

DIMENSIONS (APPROXIMATE): 21.5IN X 14.5IN X 4IN
WEIGHT: 4.7OZ.
VOLUME: 5GAL

MSRP//\$20.00

Bimini, Bahamas

KNIVES

INDISPENSABLE TOOLS FOR SERIOUS DIVERS.

SCUBAPRO knives offer quality blades with excellent cutting edges that are both durable and corrosion-resistant.

BLADE MATERIAL

Marine-grade stainless steel or hardened titanium for excellent corrosion-free cutting performance.

CUTTING EDGES

All SCUBAPRO knives offer a combination of serrated edges – great for sawing through rope, and plain edges – best for making clean slicing cuts. Almost all knives include line-cutting notches and many include additional features like shackle keys and bottle openers.

BLADE TIPS

Choose between a pointed tip – great when you want to get a cut started when tackling a tightly bound line, or a Tanto tip – a hybrid of blunt and pointed with an angled tip that's sharpened for cutting and capable of light prying.

GOOD GRIPPING HANDLES

Much of a knife's cutting ability comes from the leverage and pressure brought to bear through the handle. SCUBAPRO knives feature contoured handles with finger grooves and blade guards that keep the knives from slipping and protect fingers.

SHEATHS

All SCUBAPRO knives come with sheaths and include straps or loops for easy mounting.

JAWZ Ti

More than a dive knife, the JAWZ Ti™ is a versatile, all-in-one multi-purpose rescue tool.

Made from Grade 38 ATI 425 ballistic titanium with 316 stainless steel hardware, the tool features two main cutting surfaces with three distinct cutting areas and a heat-injected molded polypropylene thermoplastic handle with pointed breaker. Choose between a flat black or glow-in-the-dark handle for working in low-light conditions. A sheath and TacWare™ J-clip are included.

BLACK/YELLOW: MSRP//**\$302.00**

BLACK/BLACK: MSRP//**\$324.00**

TK15

The 6in single-piece stainless steel blade features both smooth and serrated edges along with a shackle key and a line cutter. The knife comes with a heavy-duty handle and fiberglass-reinforced polyamide sheath.

MSRP//**\$308.00**

K6

The 6.1in stainless steel blade offers smooth and serrated edges plus a line-cutting notch. Includes an injected molded sheath.

MSRP//**\$155.00**

MAKO

Compact dive knife offered in stainless steel or titanium with a 3.5in blade.

TITANIUM: MSRP//**\$155.00**

STAINLESS: MSRP//**\$89.00**

WHITE TIP

Excellent 2.56in stainless steel blade resists surface oxidation. Includes locking sheath and BCD/hose attachment.

MSRP//**\$83.00**

X-CUT KNIFE

This lightweight, multi-function knife with its 2.5-inch blade offers both serrated and smooth cutting edges, along with a line cutter. The blade is specially designed and shaped to maintain a highly-durable cutting edge for a long life of corrosion-free performance.

MSRP//**\$105.00**
