

“LIGHT UP THE NIGHT” Porch Light Pilot Program

Meadows Eastside Community Resource Organization and the ComEd Energy Efficiency Program have teamed up to install ENERGY STAR® certified LED Dusk to Dawn lights in South Shore and surrounding neighborhoods to improve energy efficiency, safety, and security in the community.

LED porch lights help to:

Improve the readability of address numbers. This is especially valuable during critical situations in which first responders need to locate homes, or when drivers are visiting unfamiliar neighborhoods.

Deter or capture unsavory activity. Studies show that enhanced lighting on the outside of a home not only provides a sense of safety, but it also mitigates criminal activity. Optimal light also provides security cameras an additional measure to capture more vivid pictures.

Reduce energy use, save money, and add convenience. According to ENERGY STAR, its certified LED bulbs use about 75 percent less energy, and last at least 15 times longer than traditional incandescent light bulbs. The Dusk to Dawn porch lights installed through this initiative come equipped with automatic daylight shutoff and motion sensor technology to make your life easier.

Get started.

To volunteer or register your home or block for this corridor initiative please log on today at www.meadowseastside.org/LUTN for your LED Dusk to Dawn light enhancements.

Terms and conditions apply.
Actual savings will vary by customer's energy usage and rate.
