# MEASURING TIPS

- Measure your child's feet on a hard surface (not a carpet), in the afternoon (feet typically swell during the day).
- Have your child wear the same type of socks he/she would normally wear with the type of shoes you plan to purchase.

# MEASURING INSTRUCTIONS

1. Place the measurement chart on the floor.
2. With your child standing, align his/her heel with the horizontal black line near the bottom of the chart.
3. Using a pencil, mark the spot to indicate where your child's longest toe ends. Repeat for the other foot.
4. If the mark is between two sizes, buy the larger size. For example, if your child's foot is between a 5.5 and 6, buy the 6.
